FAIRCHILD Power Switch and PFC IC's

FAIRCHILD SEMICONDUCTOR

OFFLINE IC'S - FAIRCHILD POWER SWITCH

e Fairchild Power Switch(FPS) product family is specially designed for an off line SMPS with minimal external mponents. The Fairchild Power Switch(FPS) consist of a high voltage power SenseFET and a current mode PWM IC. cluded PWM controller features integrated fixed oscillator, the under voltage lock out, the leading edge blanking, the timized gate turn-on/turn-off driver, the thermal shutdown protection, the over voltage protection, and the temperature mpensated precision current sources for the loop compensation and a fault protection circuitry. compared with a screte MOSFET and a controller or a RCC switching converter solution, a Fairchild Power Switch(FPS) can reduce al component count, design size, and weight and at the same time increase efficiency, productivity, and system liability. It has a basic platform well suited for the cost effective LCD monitor power supply.

Fairchild Power Switch Designer Software (10.5M)
This software currently only works with Windows 95 and Windows 98.
Contains:
- FPS Designer Software Installation Notes - Instructions and Requirements (.txt file)
- FPS Designer Software Installer (.exe file)
- FPS Designer User Guide (.doc file)

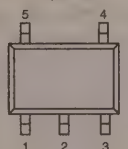
HIGH PRECISION VOLTAGE DETECTORS

SOT-23-5

Top View



S-1000 Series

The S-1000 series is a series of high-precision voltage detectors developed using CMOS process. The detection voltage is fixed internally with an accuracy of ±1.0%. It operates with low current consumption of 350 nA typ.

- Ultra-low current consumption 350 nA typ. (VDD = detection voltage + 1.5 V)
- High-precision detection voltage ±1.0%
- Operating voltage range 0.95 to 5.5 V
- Hysteresis characteristics 5% typ.

For quantities 2000 and up, call for quote.

S-801 Series

The S-801 series is a series of high-precision voltage detectors with a built-in delay time generator of fixed time developed using CMOS process. The detection voltage is fixed internally, with an accuracy of ±2.0%. Internal oscillator and counter timer can delay the release signal without external parts.

- Ultra-low current consumption: 1.3 μA Typ. (at VDD = 3.5V)
- High-precision detection voltage: ±2.0%
- Delay times: 100 ms Typ.
- ON/OFF switch of delay time (DS pin)
- Operating voltage range: 0.95V to 10.0V
- Detection voltage: 2.2V to 6.0V (0.1V step)

S-808 Series

The S-808xxC series is a series of high-precision voltage detectors developed using CMOS process. The detection voltage is fixed internally with an accuracy of ±2.0%. Ultra-low current consumption and miniature package lineup can meet demand from the portable device applications.

- Ultra-low current consumption: 1.3 μA Typ. (at VDD = 1.5 V) (Products with detection voltage of 1.4 V Typ. or less)
  0.8 μA Typ. (at VDD = 3.5 V) (Products with detection voltage of 1.5 V Typ. or less)
- High-accuracy detection voltage: ±2.0%
- Operating voltage range: 0.65 V to 5.0 V (Products with detection voltage of 1.4 V Typ. or less)
  0.95 V to 10.0 V (Products with detection voltage of 1.5 V Typ. or less)
- Hysteresis characteristics: 5 % Typ.

SII Seiko Instruments HIGH PRECISION VOLTAGE DETECTORS CONT.

S-809 Series

The S-809xxC series is a high-precision voltage detector developed using a CMOS process. The detection voltage is fixed internally, with an accuracy of ±2.0%. A time delayed reset can be accomplished with the addition of an external capacitor.

- Ultra-low current consumption: 1.0 μA Typ. (at VDD = 2.0 V); Detection voltage: less-than or equal to 1.4 V
  1.1 μA Typ. (at VDD = 3.5 V); Detection voltage: greater-than or equal to 1.5 V
- High-precision detection voltage: ±2.0%
- Operating voltage range: 0.7 V to 10.0 V
- Detection voltage: 1.3 V to 6.0 V (0.1 V step)
- Hysteresis characteristics: 5% Typ.

For quantities 2000 and up, call for quote.

SII Seiko Instruments BATTERY PROTECTION ICS

NEW FROM SUPPLIER

S-8241 Series for 1-Cell Batteries

The S-8241 Series is a protection IC for lithium-ion/lithium polymer rechargeable batteries and includes a high precision detection circuit and a delay circuit. It is the optimal IC for protection against overcharge, overdischarge and overcurrent in 1-cell lithium-ion/lithium polymer rechargeable battery packs.

For quantities 2000 and up, call for quote.

S-8242 Series for 2-Serial Cell Batteries

The S-8242 Series is a protection IC for 2-serial cell lithium-ion/lithium polymer rechargeable batteries and includes a high precision detection circuit and a delay circuit. These ICs are suitable for protecting 2-cell rechargeable lithium-ion/lithium polymer battery packs from overcharge, overdischarge and overcurrent.

For quantities 2000 and up, call for quote.

SII Seiko Instruments HIGH PRECISION VOLTAGE REGULATORS

S-812 Series

The S-812 Series is a three-terminal positive voltage regulator made using the CMOS process. Since this has higher precision output voltage and consumes less current than existing three-terminal voltage regulators, battery-powered portable equipment can have a higher performance and a longer service life.

For quantities 2000 and up, call for quote.

SII HIGH PRECISION VOLTAGE REGULATORS (CONT.)

S-814 Series

The S-814 Series is a low dropout voltage, high output voltage accuracy and low current consumption positive voltage regulator developed utilizing CMOS technology. Built-in low ON-resistance transistors provide low dropout voltage and large output current. A power-off circuit ensures long battery life. Various types of output capacitors can be used in the S-814 Series compared with the past CMOS voltage regulators. (i.e., small ceramic capacitors can also be used in the S-814 Series). These are recommended to be used for configuring portable devices and large output current applications, respectively.

For quantities of 2000 and up, call for quote.

S-817 Series

The S-817 Series is a three-terminal positive voltage regulator made using the CMOS process. Since this has higher precision output voltage and consumes less current than existing three-terminal voltage regulators, battery-powered portable equipment can have a higher performance and a longer service life.

For quantities of 2000 and up, call for quote.

S-818 Series

The S-818 Series is a positive voltage regulator developed utilizing CMOS technology featured by low dropout voltage accuracy and low current consumption. Built in low ON-resistance transistor provides low dropout voltage and large output current. A ceramic capacitor of 2uF or more can be used as an output capacitor. A power-OFF circuit ensures long battery life. The packages available are recommended for configuring portable devices and large output current applications.

For quantities of 2000 and up, call for quote.

SII LOW DROP OUT VOLTAGE REGULATORS

S-1111 Series

The S-1111 Series is a positive voltage regulator with a low dropout voltage, high output voltage accuracy, and low current consumption developed based on CMOS technology. A built-in low on-resistance transistor provides a low dropout voltage and large output current, and a built-in overcurrent protector prevents the load current from exceeding the current capacitance of the output transistor. An ON/OFF circuit ensures a long battery life, and small SOT-23-5 package realizes high-density mounting.

For quantities of 2000 and up, call for quote.

SEIKO INSTRUMENTS LOW DROP OUT VOLTAGE REGULATORS (CONT.)

S-1112 Series

The S-1112 series is a positive voltage regulator with a low dropout voltage, high output voltage accuracy, and low current consumption developed based on CMOS technology. A built-in low on-resistance transistor provides a low dropout voltage and large output current, and a built-in overcurrent protector prevents the load current from exceeding the current capacitance of the output transistor. An ON/OFF circuit ensures a long battery life. Compared with the voltage regulators using the conventional CMOS process, a larger variety of capacitors are available, including small ceramic capacitors. A small SOT-23-5 package realizes high-density mounting.

For quantities of 2000 and up, call for quote.

PWM CONTROLLED STEP-UP SWITCHING REGULATORS

S-8330 Series

The S-8330 Series is a CMOS PWM control step-up switching regulator which mainly consists of a reference voltage source, an oscillation circuit, a power MOSFET and an error amplifier. The new output voltage can adjust by a built-in electronic volume circuit and is equipped with a shutdown function. It is a low current consumption device because of the CMOS structure. A step-up switching regulator can be constructed by externally connecting only a coil, a capacitor and a diode.

For quantities of 1000 and up, call for quote.

PWM/PFM CONTROLLED STEP-UP SWITCHING REGULATOR/CONTROLLERS

S-8341 Series

The S-8341 Series consists of CMOS step-up switching regulator/controllers with PWM/PFM switched control. These devices contain a reference voltage source, oscillation circuit, error amplifier, phase compensation circuit, PWM control circuit, and other components. Since the oscillation frequency is a high 600 kHz, with the addition of a small external component, the ICs can function as step-up switching regulators with high efficiency and large output current. The speed of the output stage is enhanced so that the Nch power MOS with a low ON resistance can be switched quickly. This device contains a PWM/PFM switching control circuit so that it operates using PWM control with a duty ratio of 27% or higher and using PFM control with a duty ratio of lower than 27% to ensure high efficiency in all load ranges. These ICs serve as ideal main power supply units for portable devices when coupled with the 8-pin TSSOP package and high oscillation frequencies.

For quantities of 1000 and up, call for quote.

PFM CONTROLLED STEP-UP SWITCHING REGULATORS

SOT-89-5

S-8351 Series

The S-8351 Series is a CMOS PFM-controlled step-up switching regulator that mainly consists of a reference voltage source, an oscillator, and a comparator. The PFM controller allows the duty ratio to be automatically switched according to the load (light load: 50%, high output current: 75%), enabling products with a low ripple over a wide range, high efficiency, and high output current. With the S-8351 Series, a step-up switching regulator can be configured by using an external coil, capacitor, and diode. The built-in MOSFET is turned off by a protection circuit when the voltage at the CONT pin exceeds the limit to prevent it from being damaged. This feature, along with the mini package and low current consumption, makes the S-8351 Series ideal for applications such as the power supply unit of portable equipment.

For quantities of 1000 and up, call for quote

PWM CONTROLLED STEP-UP SWITCHING REGULATORS

S-8353 Series

The S-8353 Series is a CMOS step-up switching regulator which mainly consists of a reference voltage source, an oscillation circuit, a power MOSFET, an error amplifier, a phase compensation circuit and a PWM controller. The step-up switching regulator can be configured simply by attaching a coil, capacitor, and diode externally. In addition to the above features, the small package and low power consumption of this series make it ideal for portable device applications requiring high efficiency. The S-8353 Series realizes low ripple, high efficiency, and excellent transient characteristics due to its PWM controller, which can vary the duty ratio linearly from 0% to 83% , optimally-designed error amplifier, and phase compensation circuits.

For quantities of 1000 and up, call for quote

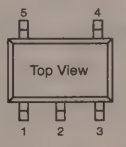
PWM/PFM CONTROLLED STEP-UP SWITCHING REGULATORS

SOT-23-5



S-8354 Series

The S-8354 Series is a CMOS step-up switching regulator which mainly consists of a reference voltage source, an oscillation circuit, a power MOSFET, an error amplifier, a phase compensation circuit, and a PWM/PFM switching controller. The step-up switching regulator can be configured simply by attaching a coil, capacitor, and diode externally. In addition to the above features, the small package and low power consumption of this series make it ideal for portable device applications requiring high efficiency. The PWM/PFM switching controller that can switch the operation to a PFM controller with a duty ratio is 15% under a light load to prevent a decline in the efficiency due to the IC operating current.

PWM CONTROLLED STEP-UP/STEP-DOWN SWITCHING REGULATOR/CONTROLLER

S-8460 Series

The S-8460 is a PWM controlled step-up and step-down switching regulator-controller consisting of an automatic-selection control circuit for step-up and step-down, a reference voltage source, an oscillation circuit, an error amplifier, a phase compensation CMOS circuit, etc. The automatic selection control circuit for step-up and step-down in PWM control realizes a high performance step-up and step-down switching regulator operating on one coil. Adopting N-channel power MOS transistors for external switches, in addition, enables high efficiency and high output current. It provides low-ripple output, high-efficiency and excellent transient characteristics which come from the PWM control circuit capable of varying the duty ratio linearly from 0%, the optimized error amplifier and the phase compensation circuit.

PWM/PFM CONTROLLED STEP-DOWN SWITCHING REGULATOR/CONTROLLERS

S-8521 Series

The S-8521 Series consists of a CMOS step-down switching regulator/controllers with PWM/PFM-switched control. These devices contain a reference voltage source, oscillation circuit, error amplifier and other components. It works in either PWM control or PFM control and can switch from one to the other. It normally operates using PWM control with a duty ratio of 25% to 100%, but under a light load, it automatically switches to PFM control with a duty ratio of 25%. This ensures high efficiency over a wide range of conditions, from standby mode to operation of peripheral equipment. With the addition of an external P-Channel MOSFET or PNP transistor, a coil, capacitors and a diode connected externally, these can function as step-down switching regulators.

SII Seiko Instruments S-8813 SERIES CHARGE PUMP DC-DC CONVERTER, SURFACE MOUNT

The S-8813 Series is a PFM controlled charge pump DC-DC converter with a built-in constant-current circuit, and was developed using CMOS technology. Its constant current output makes this series ideal as a power supply for current drive LEDs. The S-8813 Series features three output channels and can drive three LEDs. Since small ceramic capacitors can be used as external capacitors (pump capacitors, input capacitors, output capacitors), the S-8813 Series contributes to set miniaturization.

- PFM control CMOS charge pump
- Built-in constant current circuit

For quantities of 1000 and up, call for quote.

SII Seiko Instruments S-89431 SERIES RAIL-TO-RAIL CMOS OPERATIONAL AMPLIFIERS, SURFACE MOUNT

The S-8943xA/B series are CMOS type operational amplifiers that feature Rail-to-Rail I/O and an internal phase compensation circuit. These features enable driving at a lower voltage (from 0.9V) and with lower current consumption (0.5 μA typ.) than existing general-purpose operational amplifiers, making the S-8943xA/B series ideal for use in battery-powered compact portable devices. The S-8943xA series is a single operational amplifier, with one circuit incorporated in the ultra-small SC-88A. The S-8943xB Series is a dual operational amplifier, with two circuits incorporated in the slim and small 8-pin MSOP package.

For quantities of 1000 and up, call for quote.

SII Seiko Instruments S-89110 SERIES LOW CURRENT CONSUMPTION CMOS OPERATIONAL AMPLIFIERS, SURFACE MOUNT

The mini-analog series mounts a general purpose analog circuit within a small package. The S-89110A is a CMOS type single operational amplifier having a phase compensation circuit, that can be driven by lower voltage with lower consumption current than former bipolar operational amplifiers. This makes it the optimum solution for small battery powered portable equipment.

For quantities of 1000 and up, call for quote.

SII Seiko Instruments VOLTAGE COMPARATORS, SURFACE MOUNT

S-89531 Series

The mini analog series is a group of ICs that incorporates a general purpose analog circuit in an ultra-small packages. The S-89530A/89531A Series are CMOS type comparators that feature rail-to-rail input/out and can be driven at a lower voltage and with lower current consumpsion than existing compartors, making them ideal for use in battery-powered compact portable devices.

Features:
- Lower operating voltage than the conventiona general purpose comparators: VDD = 1.8 to 5.5V
- Low current comsumption: IDD = 50 uA
- Low input offset voltage: 4.0 mV (max)

Applications:
- Celluar phones
- Digital cameras
- PDAs
- Digital Video Cameras
- Notebook PCs

For quantities of 1000 and up, call for quote.

STMICROELECTRONICS POWER FACTOR CORRECTOR EVALUATION BOARDS

These demonstration boards have been realized to provide the user with a simple evaluation tool for the operation of the PFC controller L4981A or L6562. The application is a typical boost PFC pre-regulator with a power rating suitable for most office equipment. To help the user in the design stage, the demonstration board is delivered with WINDOWS compatible software covering all ST's PFC controllers.

MOUSER STOCK NO.	STM Part No.	Description	Price Each 1-99
511-EVAL4981A	EVAL4981A	For L4981A power factor corrector	140.00
511-EVAL6561-80	EVAL6561-80	For L6561 power factor corrector (80 watt)	56.00
511-EVAL6562-80W	EVAL6562-80W	For L6562 power factor corrector (80 watt)	14.00
511-EVAL6562-250W	EVAL6562-250W	For L6562 power factor corrector (250 watt)	42.00
511-EVAL6562-375W	EVAL6562-375W	For L6562 power factor corrector (375 watt)	56.00

Features:

- PFC pre-regulator in boost topology
- Wide-range mains supply (88 to 264 Vac)
- 400 V, 200 W output
- 100 kHz switching freq.
- Over voltage and over current protection
- 0.999 Power Factor
- Less than 3.5% Total Harmonic Distortion
- Over 95% efficiency

STMICROELECTRONICS EVALUATION BOARDS

MOUSER STOCK NO.	STM Part No.	Description	Price Each 1-99
511-EVAL5970D	EVAL5970D	For L5970D switching regulator	14.00
511-EVAL5972D	EVAL5972D	For L5972D switching regulator	14.00
511-EVAL5973AD	EVAL5973AD	For L5973AD switching regulator	14.00
511-EVAL5973D	EVAL5973D	For L5793D switching regulator	14.00
511-EVAL6902D	EVAL6902D	For L6902D switching regulator	14.00

These demonstration boards are complete tools to evaluate the L5970D, L5972D, L5973AD, L5973D and L6902D switching regulators. The system is a buck topology converter with a sense resistor to set the constant output current from 50mA up to 1.5A (in according to package power dissipation). The demo board supports maximum input/output voltages of 16V/10V, above this voltage rating of the input /output capacitors must be changed.

DIP-8

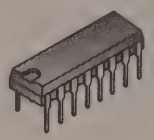
SO-16



DIP-16

HV9100 through HV9103 and HV9110 through 9113 are a series of BiCMOS/ DMOS single-tput, pulse width modulator ICs intended for use in h-speed high-efficiency switchmode power pplies. They provide all the functions necessary to plement a single-switch current-mode PWM, in any pology, with a minimum of external parts.

HV9105 and HV9106 are high-efficiency high tage SMPS ICs intended for use in nverters requiring extreme efficiency at output wer levels of 5.0W or less. The low supply current 5mA max) allows them to be used to build supplies ich meet CCITTI.430 performance ommendations (60% efficiency at .025W out).

HV9120 and HV9123 are Switch Mode Power pply (SMPS) controller subsystems that can start d run directly from almost any DC input, from a 12V battery to a rectified and filtered 240V AC line. They contain all the elements required to build a single-switch converter except for the switch, magnetic assembly, output rectifier(s) and filter(s).

- **HV9605C** is a BiCMOS/DMOS single-output, current mode, pulse width modulator IC designed to meet the requirements of ETR-080 for ISDN applications. In a 14 pin package, it provides all the necessary functions to implement a single-switch PWM with a minimum of external parts.

- **HV9606** PWM controller allows the design of high efficiency (>90%) power supplies for distributed board mounted power (BMP) applications. Due to its high frequency capability it can provide high currents (20A @ 3.3V) with small transformers and due to its low internal operating voltage and current is also able to achieve high efficiencies in low power applications.

- **HV9904** is a second order PWM controller designed to provide a constant average current output or a constant average voltage output from an input of 10V to 400V DC or directly from rectified AC mains up to 280V. The second order topology is capable of extremely high dynamic control range, allowing operation directly from rectified AC mains without the need for bulky and expensive high voltage input electrolytic capacitor.

- **HV9906** allows the development of the smallest possible, most reliable, offline and wide DC/DC conversion range converters for driving LEDs and other applications. The HV9906 combines internally all the components required to operate directly from the rectified AC line with a feedback mechanism that eliminates filters & compensation components, and which can close the loop with feedback from a discontinuous waveform (eg. LED current).

- For Evaluation/Design Shortcut see DEMO BOARDS (IC Included)

Demo Boards	Price Each
689-HV9112DB3	180.00
689-HV9605DB1	180.00
689-HV9606DB1	180.00
689-HV9606DB2	180.00
689-HV9906DB2	140.00
689-HV9906DB6	140.00
689-HV9906DB7	180.00

pertex proprietary BiCMOS/DMOS technology results in a device with one tenth of the operating power of conventional bipolar PWM ICs, which can rate at more than twice their switching frequency. Dynamic range for regulation is also increased, to approximately 8 times that of similar bipolar parts

For quantities of 2000 and up, call for quote.

BUS INTERFACE-DRIVER AND RECEIVER

Si9200EY is designed to interface between the Intel 82526 CAN controller and the physical bus to provide drive capability to the bus and differential receive capability to the controller. It is designed to absorb typical electrical sients on the bus which may occur in an automotive or industrial application, and protect itself against any abnormal bus conditions. The transmitter will be disabled during these conditions and will be re-enabled when the abnormal dition is cleared. The Si9200EY is built using the Siliconix BiC/DMOS process. This process supports CMOS, DMOS, and isolated bipolar transistors and uses an epitaxial layer to prevent latchup. The bus line pins are diode ected and can be driven beyond the VDD to ground range. The Si9200EY is offered in the space efficient 8-pin high-density surface-mount plastic package and is specified over the automotive temperature range (–40 to 125°C).

For quantities of 2000 and up, call for quote.

BOURNS SMD Diodes

MD SWITCHING DIODES

ms offers small-signal high-speed Switching Diodes for switching digital signal applications, in compact chip package size format, which offer PCB real te savings and are considerably smaller than competitive parts. The diodes are lead-free with Cu/Ni/Au plated terminations and are compatible with -free manufacturing processes, conforming to many industry and government regulations on lead-free components. Bourns® Chip Diodes conform to EC standards, easy to handle on standard pick and place equipment and their flat configuration makes roll away much more difficult.

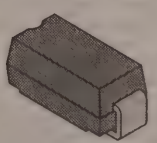
ID SCHOTTKY RECTIFIER DIODES

s offers Schottky Rectifier Diodes for rectification applications, in compact chip package DO-214AC (SMA) size format, which offer PCB real estate gs and are considerably smaller than competitive parts. The Schottky Rectifier Diodes offer a forward current of 1 A to 3 A with a choice of repetitive reverse voltage of 20 V up to 100 V.



ures:
A package
face mount
y low forward voltage drop

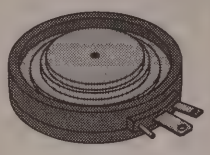
EUPEC Power Modules

HIGH POWER THYRISTORS AND DIODES

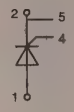
Thyristor

Features:
- Reverse Voltage up to 2800 Volts
- Metal Ceramic Package

Applications:
- DC Motor Control (for machine tools)
- Controlled Rectifier (for battery charging)
- AC Controllers (for temperature control)



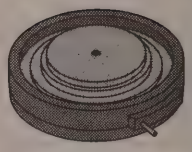
Thyristor



Diode

Features:
- Reverse Voltage up to 4900 Volts
- Metal Ceramic Package

Applications:
- All Purpose Rectifier Diode
- Free-wheeling Diodes
- Industrial High Power Drives, and Medium Traction Applications



Diode

For quantities of 20 and up, call for quot

HIGH POWER THYRISTOR AND DIODE PACKS

Thyristors

Features:
- Reverse Voltage up to 1500 Volts
- Isolated Aluminum Baseplate

Applications:
- Soft Start for Induction Motors
- Input Rectifier for Inverter Drives
- Field Supply for DC Motors

Diodes

Features:
- Reverse Voltage up to 1500 Volts
- Isolated Aluminum Baseplate

Applications:
- Soft Start for Induction Motors
- Input Rectifier for Inverter Drives
- Field Supply for DC Motors

LOW LEAKAGE DIODES

e PAD/JPAD/SSTPAD series of extremely low-leakage diodes provides a superior alternative to conventional diode technology when reverse current akage) must be minimized. They feature leakage currents ranging from –1 pA (PAD1) to –100 pA (SSTPAD100) to support a wide range of applications. ese devices are well suited for use in applications such as input protection for operational amplifiers. The hermetically sealed TO-206AF (TO-72) package ows full military processing per MIL-S-19500. The TO-226A (TO-92) plastic package provides a low-cost option. The TO-236 (SOT-23) package provides rface-mount capability.

For quantities of 2000 and up, call for quote.

CURRENT REGULATOR DIODES

ese current regulators are designed for demanding applications in test equipment and instrumentation. These devices utilize the JFET techniques to produce device which is extremely simple to operate. With nominal current ranges from 0.24 mA to 4.7 mA, these devices will meet a wide array of design requirements. ese come in the low-cost TO-92 and SOT-23 package for cost-effective design solutions and the TO-18 hermetically sealed package for high reliability designs.

For quantities of 2000 and up, call for quote.

ZETEX 12 AND 25 VOLT HYPERABRUPT VARACTOR DIODES

Features:
- Close tolerance C-V characteristics
- High tuning ratio
- Low IR (typically 200pA)
- Excellent phase noise performance
- High Q
- Range of miniature surface mount packages

Applications:
- VCXO and TCXO
- Wireless communications
- Pagers
- Mobile radio

For quantities of 2000 and up, call for quote.

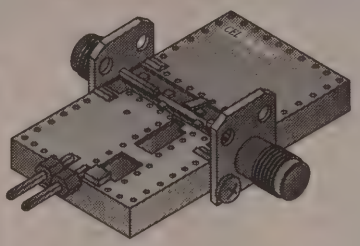
IEC/CEL RF Transistor Evaluation Boards NEC CEL California Eastern Laboratories

luation boards help speed the design process by providing our customers with good examples of working circuit igns. Prototypes are designed, etched and tested in the engineering facility at California Eastern Laboratories.

atures:

- Layout is done in AutoCad®
- Boards are produced on FR4 board material to simulate the production environment
- RF and IF inputs and outputs are ported through SMA connectors
- DC connections are through header pins
- On-board bypass capacitors are provided
- Includes assembly drawings, schematics, datasheet and typical test data

nsistor evaluation boards have been designed for use at industry standard frequencies (900 MHz, 1.9 GHz, 2.4 GHz, etc.) l have been optimized for a variety of specifications (Noise Figure, Gain, Power or Intercept Point)



(Small Signal GaAs Field Effect Transistor Shown)

SOT-89

From its advanced process technology platforms, Zetex produces an extensive range (100 to 500 volts) of bipolar transistors with a global reputation for quality, high performance and package innovation.

Renowned for their low Vce(sat), high hfe and continuous current capability, Zetex bipolar transistors are optimized to provide circuit designers and extremely low on-state losses and high efficiency operation.

Developments in bipolar transistors continue to position the technology to rival or exceed MOSFET performance in many applications. The summary below list the key parametric differences between the 2 technologies.

Characteristics	Bipolar Transistor	MOSFET
"ON" Resistance	Excellent-down to half that of the best MOSFET, depending on drive current available	• Good at full enhancement • Moderate at low gate drive
Blocking Voltage	• Bi-directional blocking capability. • BVces,BVcev or BVcbo may be appropriate for some applications	Mono-directional, may require a series Schottky diode or back-to-back MOSFET pair in some applications
Pulse Current	High	Moderate
Drive Voltage	Less than 1V	1.8 V to 10V, depending on the optimization.

Characteristics	Bipolar Transistor	MOSFET
Temperature stability	Excellent: • Vbe: approx. 2mV per °C • Rce(sat) approx. 0.38% Per °C	Moderate: • Vth: approx. 4-6mV per °C • Rds(on) approx. 0.64% per °C
Drive Power	Moderate	• DC: excellent • High frequency: moderate
Speed	Fast	Very Fast
ESD Sensitivity	Very rugged	Sensitive
Price per area of silicon	Comparable	Comparable

ALD Precision Matched Small Signal MOSFET Arrays

ADVANCED LINEAR DEVICES, INC.

w Threshold Voltage
tented EPAD® Technology
• Near Infinite Current Gain
• Ideal Current Sources and Current Mirrors
• Temperature Range: 0 to 70°C
• Drain Source Breakdown: 10V Min.
• Drain Source on Resistance Match: 0.5% Typ
• Low Voltage and Nanopower Circuits

CHANNEL ENHANCEMENT MODE

♦ Surface Mount

PLETION MODE N-CHANNEL MOSFETs

nced Vertical DMOS Technology
annel Depletion Mode Vertical DMOS FETs

depletion-mode (normally-on) transistors utilize an advanced vertical DMOS structure and Supertex's well-proven silicon-gate acturing process. This combination produces devices with the power handling capabilities of bipolar transistors and with the high npedance and positive temperature coefficient inherent in MOS devices. Characteristic of all MOS structure, these devices are m thermal runaway and thermally-induced secondary breakdown.

ex's vertical DMOS FETs are ideally suited to a wide range of switching and amplifying applications where high breakdown , high input impedance, low input capacitance, and fast switching speeds are desired.

Features:
- High input impedance
- Low input capacitance
- Fast switching speeds
- Low on resistance
- Free from secondary breakdown
- Low input and output leakage

Applications:
- Normally-on switches
- Solid state relays
- Converters
- Constant current sources
- Power supply circuits
- Telecom

For quantities 2000 and up, call for quote.

nced Lateral DMOS Technology
annel Depletion Mode MOSFETs

ND1 and LND2 are high voltage N-channel depletion-mode (normally-on) transistors utilizing Supertex's lateral DMOS logy. The gate is ESD protected.

ND1 and LND2 are ideal for high voltage applications in the areas of normally-on switches, precision constant current sources, ramp generation and amplification.

Features:
- High input impedance and low CISS
- Low power drive requirement
- ESD gate protection
- Ease of paralleling
- Free from secondary breakdown
- Excellent thermal stability
- Integral source-drain diode

Applications:
- Normally-on switches
- Solid state relays
- Converters
- Constant current sources
- Power supply circuits
- Input protection circuits

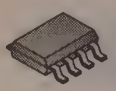
SILICONIX MOSFET Transistors



SO-8

SOT-23

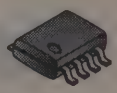
TO-263

TSOP-6



TSSOP-8

N-CHANNEL LITTLEFOOT PLUS™ MOSFETs (SINGLE CONFIGURATION)

High performance MOSFET with a compatible Schottky rectifier for commonly for applications were space savings and efficiency are a requirement.

For quantities of 1000 and up, call for quo

N-CHANNEL TRENCHFET MOSFETs (SINGLE CONFIGURATION) (CONT.)

TrenchFET power MOSFETs provide efficient power control with extremely low on-resistance.

For quantities of 1000 and up, call for quote.

ZETEX MOSFETs

ZETEX SEMICONDUCTORS

Zetex uses both planar and trench technology platforms, to produce a wide portfolio of N & P-Channel MOSFETs with operating ranges of 450 volts. The latest trench MOSFET technology is used for N & P-Channel devices ranging in voltage from 20 to 100 Volts. This technology offers very low on-resistance and high current handling from small packages. A high density planar process is used to achieve a range of N & P-Channel 20 and 30 Volt products, with low on-resistance and low gate charge. This process results in improved efficiency solutions in higher frequency switching applications. Complementing the range, Zetex offers a series of small signal devices, with voltages up to 450V. The devices are commonly used in general purpose, low current switching applications.

BOURNS Thyristor Surge Protectors

BOURNS®
Reliable Electronic Solutions

BOURNS TISP THYRISTOR OVERVOLTAGE PROTECTORS

Continuing to provide the most complete solutions to your circuit protection needs, Bourns recently introduced the TISP® line of products. The TISP® products are specially designed to provide protection for telecommunications equipment in instances where high voltages occur as a result of lightning strikes, power line crosses or a/c power surges. Coupled with Bourns' Multifuse® PPTC overcurrent protectors and Bourns, Line Protection Networks, the TISP® products offer telecom customers a more comprehensive total protection product line.

Dual Bidirectional Thyristor Surge Protector

LEAD-FREE

This TISP® device series protects central office, access and customer premise equipment against overvoltages on the telecom line. These devices are housed in a through-hole-3-pin single-in-line (SL) plastic package.

For quantities of 2,000 and up, call for quote.

Quad-Forward-Conducting Buffered P-Gate Thyristor

This small-outline package consists of a circuit mounted on a lead frame and encapsulated within a plastic compound. The compound will withstand soldering temperature with no deformation, and circuit performance characteristics will remain stable when operated in high humidity conditions. Leads require no additional cleaning or processing when used in soldered assembly.

Independent Overvoltage Protection for Two SLICs in Short Loop Applications:

- Wide 0 to -90 V Programming Range
- Low 5 mA max. Gate Triggering Current
- High 150 mA min. (85°C) Holding Current
- Specified 1.2/50 & 0.5/700 Limiting Voltage
- Full -40°C to 85°C Temperature Range

LEAD-FREE

For quantities of 2,000 and up, call for quote.

dium and High-Voltage Triple Element Bidirectional Thyristor Overvoltage Protectors

small-outline package consists of a circuit mounted on a lead frame and encapsulated within a plastic compound. The compound will withstand ering temperature with no deformation, and circuit performance characteristics will remain stable when operated in high humidity conditions. Leads ire no additional cleaning or processing when used in soldered assembly.

TISP7xxxF3 series are 3-point overvoltage protectors designed for protecting against metallic (differential mode) and simultaneous longitudinal mon mode) surges. Each terminal pair as the same voltage limiting values and surge current capability. This terminal pair surge capability ensures the protector can meet the simultaneous longitudinal surge requirement which is typically twice the metallic surge requirrment.

al Forward-Conducting P-Gate Thyristor Programmable Overvoltage Protectors

small-outline package consists of a circuit mounted on a lead frame and encapsulated within a plastic compound. The compound will withstand ring temperature with no deformation, and circuit performance characteristics will remain stable when operated in high humidity conditions. Leads re no additional cleaning or processing when used in soldered assembly.

TISP61089B is a dual forward-conducting buffered p-gate thyristor (SCR) overvoltage protector. It is designed to protect monolithic SLICs scriber Line Interface Circuits) against overvoltages on the telephone line caused by lightning, a.c. power contact and induction. The TISP61089B voltages that exceed the SLIC supply rail voltage. The TISP61089B parameters are specified to allow equipment compliance with Bell core GR-CORE, Issue 2 and ITU-T recommendations K.20, K.21 and K.45.

AVX Ceramic Transient Voltage Suppressors

TRANSFEED™ MULTILAYER CERAMIC TRANSIENT VOLTAGE SUPPRESSORS

as combined the best electrical characteristics of its TransGuard™ Transient Voltage Suppressors (TVS) and dthru Capacitors into a single chip for state-of-the-art overvoltage circuit protection and EMI reduction over a ange of frequencies. This unique combination of multilayer ceramic construction in a feedthru configuration he circuit designer a single 0805 chip that responds to transient events faster than any TVS device on the today, and provides significant EMI attenuation when in the off-state.

designers are concerned with both transient voltage protection and EMI attenuation, either due to the al performance of their circuits or due to required compliance to specific EMC regulations, the TransFeed™ is an ideal choice.

MULTIGUARD™ MULTILAYER CERAMIC TRANSIENT VOLTAGE SUPPRESSION ARRAYS

ansient Voltage Suppression (TVS) Arrays address six trends in today's electronic circuits: (1) mandatory ESD protection, (2) mandatory EMI control, (3) signal improvement, (4) PCB downsizing, (5) reduced component placement costs, and (6) protection from induced slow speed transient voltages and currents.

AVX TransGuard™ Ceramic Transient Voltage Suppressors

The AVX TransGuard Transient Voltage Suppressors (TVS) with unique high-energy multilayer construction represents state-of-the-art overvoltage circuit protection. Monolithic multilayer construction provides protection from voltage transients caused by ESD, lightning, Nuclear Explosion Magnetic Pulse (NEMP), inductive switching, etc. True surface mount product is provided in EIA industry standard packages.

TransGuard products are zinc oxide(ZnO) based ceramic semiconductor devices with non-linear voltage-current characteristics (bi-directional) similar to back-to-back zener diodes.
They have the added advantage of greater current and energy handling capabilities as well as EMI/RFI attenuation. Devices are fabricated by ceramic sintering process that yields a structure of conductive ZnO grains surrounded by electrically insulating barriers, creating varistor-like behavior.

Marking
All standard surface mount TransGuard chips are unmarked.

Features:

- Ni/Sn Alloy(Plated)
- Operation temp: -55°C to +125°C
- Meets IEC 1000 -4 specifications

NTE Semiconductors

NTE ELECTRONICS, INC.

s semiconductor line provides an invaluable alternative to original brand, hard to find, and discontinued devices. Each part is quality tested to assure that it meets or exceeds the specifications demanded of it. Mouser has NTE's full reference database and specification sheets online at www.mouser.com, so the customer can quickly and easily find the right replacement for over 426,000 Asian, European and US industry devices.

NTE THERMO-PADS

rmo-Pads do away with the old fashioned mica wafer and conductive grease method of mounting power conductors. These thermally conductive insulators offer low heat transfer resistance while still providing electrical isolation between the parts of the assembly. The elastomeric material combines the electrical tion of rigid insulators with the ability to conform to rough surfaces and reduce contact resistance in much ame manner as thermal grease. Proper selection and use of these THERMO-PADS results in a securely- nted power semiconductor and minimum resistance to the heat transfer between it and the heat sink.

NTE WINDRAFT® - WINBOARD®

WinDraft® schematic design tool on your PC and in minutes you'll be designing schematics. Everything is included for wiring, drawing, printing and finishing your design. A full graphical library editor and title block editor are included. A library part may be created from scratch, shapes imported from other parts, and graphical definitions can easily be edited. WinDraft® provides all you expect and more. User definable on-line ERC identifies problem areas in the circuit so they do not make their way into the final design. Bill of Materials (BOM), cleanup to remove overlapping wires, and annotation are included. On-line help is only a click away and includes the complete reference manual. WinDraft® is the ideal front end tool for our PCB layout. You can even specify track widths and isolations right in the schematic.

526-WD650	WD650	650	250.00
526-WDUNL	WDUNL	Unlimited	495.00

WinBoard® PCB layout delivers the most sophisticated interactive routing capability available for the Windows environment. It has the power needed for even complex board design, and the tools for high speed circuits, analog design and dense SMT boards. WinBoard® comes complete with a library of over 700 module footprints including over 350 SMT footprints. Pad stacks may be edited on-line by just double clicking on the pad. A graphical editor is included to create custom module footprints or edit existing ones. Placing multiple copper pours is as quick and easy as routing. Outputing to In-Circuit Test, NC Drill, Gerber, Pick and Place plus others is included.

METAL OXIDE VARISTORS HEAVY DUTY APPLICATIONS ("P SERIES")

ures:

Series" are especially dedicated to heavy duty
lications encountered in the AC power network.
her surge current and energy ratings provide an
roved protection and a better reliability
ial lead varistors
rating voltage range from 130 V to 625 V (Vrms
/E types) or 205 V to 1000 V (V1mA for VF types)
ilable in tape and reel for use with automatic
rtion equipment

ifications:

age temperature: -40°C to +125°C
operating temperature: +85°C
ponse time: < 25 ns
• Voltage coefficient temp.: IKI < 0.09%/°C
• Voltage proof: 2500 V
• Epoxy coating: Flame retardant UL94-VO

* VE13: For models with $V_{RMS} \leq 320$ V other version/suffixes available with:
E = 5.08 (0.20) Suffix:
Ø = 0.6 (.024) Bulk: HB
D = 12.5 (.492) max Tape: DA, DB, DC, DD, DQ, ...
**VE24: For lead diameter = 1.0 (.039), please consult us.

VE TYPE METAL OXIDE VARISTORS ("M SERIES")

lications:

nsient suppression in automotive environments
ch as ignition pulses, alternator field, mutual harness
pling, inductive load switching fan, heater and booster starts)
nsumer appliances connected to 110 or 220 VAC lines
tection of expensive semiconductor components
tection of industrial equipment and motors endangered by AC
transients (computers, traffic controls, ground fault
mpters, etc.)
tection of equipment connected to telephone or signal lines,
ch as railroad and communications equipment, security and fire
m systems
tage regulation and ARC suppression across relay contacts
ditional uses are found in instrumentation to protect input
minals from encountering destructive high voltages

Features:

- Superior response time of less than 25 ns
- Maximum clamping voltage up to 1350V
- Superior clamping characteristics
- Three different case sizes
- Voltage range from 48 through 510 V_{RMS}
- Polycrystaline zinc oxide dielectric
- Standardized lead spacings

**VE24: For lead diameter = 1.0 (.039), please consult us.

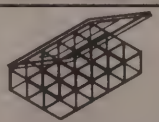
METAL OXIDE VARISTOR KIT

0 piece kit contains 2 of the VZC Series, 2 of the VZD Series, 3 of ZA Series, and 3 of the VZC Series. For a Customized Kit with other s, please contact a Mouser Customer Service Representative.

Contains:

3 each, VZA Series: 48, 130, 150 (Vrms)
3 each, VZC Series: 130, 150 (Vrms)
2 each, VZC Series: 250 (Vrms)
2 each, VZD Series: 130, 150, 275, 510 (Vrms)



For quantities greater than listed, call for quote.

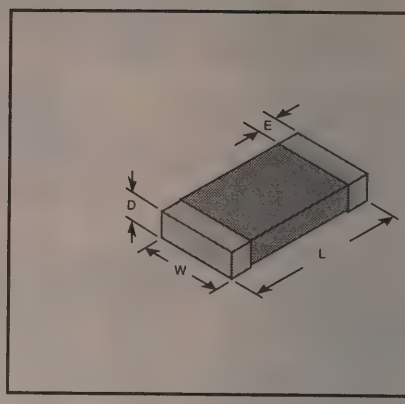
Littelfuse SURFACE MOUNT ML SERIES VARISTORS

The ML Series family of Transient Voltage Surge Suppressions devices is based on the Littelfuse Multilayer fabrication technology. These components are designed to suppress a variety of transient events, including those specified in IEC 61000-4-2 or other standards used for Electromagnetic Compliance (EMC). The ML Series is typically applied to protect integrated circuits and other components at the circuit board level.



Features:

- Leadless Chip Size: 0603, 0805, 1206 and 1210
- Multilayer Ceramic Construction Technology
- Operating Temperature Range: -55°C to +125°C
- Operating Voltage Range: V_M(DC) = 5.5V to 120V

Applications:

- Suppression of inductive switching or other transient events such as EFT
- Provides on-board transient voltage protection for ICs and transistors
- Used to help achieve electromagnetic compliance of end products
- Replace larger surface mount TVS Zeners in many applications

ETAL OXIDE VARISTORS ZA SERIES

- de Operating Voltage Range Vm (AC) MS: 4V to 460V
- Voltage Ratings: 5.5V to 615V
- Derating up to 85°C Ambient
- 5 Model Sizes Available: 5,7,10,14 and 20mm
- Radial-Lead Package Design

The ZA Series of transient voltage surge suppressors are radial-lead varistors (MOVs) designed for use in the protection of low and medium voltage circuits and systems. Typical applications include motor control, telecom, automotive systems, solenoid, and power supply circuits to protect circuit board components and maintain data integrity.

nergy rating for impulse duration of 30ms minimum to one half of peak current (auto load dump). ** 10mA DC test current.

For quantities of 500 and up, call for quote.

ETAL OXIDE VARISTORS LA SERIES

- de voltage / energy range
- cellent clamp ratio
- t response time
- Low standby power
- No follow-on current
- Radial package
- Line voltage operation
- UL recognized

Littelfuse varistors are voltage dependent, symmetrical, metal-oxide semiconductor devices. Their characteristics enable them to protect against high transient voltage spikes (when properly selected) to meet anticipated loads. When the protected equipment or circuit encounters high voltage spikes, the varistor impedance changes from a very high standby value to a very low conducting value, thus clamping the transient voltage to a protective level. The excess energy of the incoming high voltage pulse is absorbed by the Harris varistor, protecting voltage sensitive components against damage.

For quantities of 500 and up, call for quote.

AYCHEM METAL OXIDE VARISTORS

chem's ROV (Radial-leaded Metal Oxide Varistor) products help to provide protection against overvoltage faults such as lightning, power contact, and power induction, for a wide variety of er systems. Suitable for a broad range of applications including, but not limited to, security systems, power supplies, surge strips, motors, and telecommunications equipment, ROV devices to protect valuable equipment from potential power surge damage by clamping high-energy, shortduration impulses. The ROV devices have high current handling and energy absorption ability and fast response times to help protect against transient faults.

For quantities of 2,500 and up, call for quote.

322 59X XXXX SERIES RADIAL LEADED METAL OXIDE VARISTORS

e varistors consist of a disc of ceramic material with two ed solid copper leads.

y are coated with a layer of epoxy, which provides ctrical, mechanical, and climatic protection.
e encapsulation is resistant to all cleaning solvents in ordance with "IEC 60068-2-45".

etures:
Zinc oxide disc, epoxy coated
Non-flammable

r Lead-Free version,
e 594-2381-59X-XXXXX

BOURNS Gas Discharge Tubes

Reliable Electronic Solutions

1669 SERIES TRANSIENT PROTECTOR

DIMENSIONS: mm (I

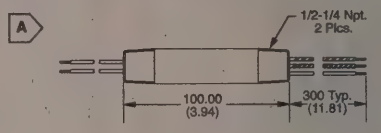
Used for full weather protection of field transmitters and instrumentation operating on 24-28V systems, the 1669 Series protects sensitive I/O circuitry from surges of any polarity or magnitude. Principal use is on 4-20 mA control loops and can be used on grounded (+ or -) or ungrounded circuits. Able to survive and protect even from direct lightning strikes to the transmitter ground or field wiring. Automatic recovery after passage of the surge. Construction is hybrid 3-stage design, using a high surge capacity Balanced Trigard• Gas Tube protector, coordination impedance and silicon suppressors to provide differential and common mode protection with very low clamping levels for delicate loads. The housing is thick walled schedule 40, type 303 stainless steel. Wiring is #20 (.5 mm2) 1000V, PVC insulated. Solid red and black colors are used for the input; striped colors signify the protected output. The protector ground wire (green) is electrically bonded to the metallic housing; it is for connection to the grounding screw within the field device. Intrinsically Safe (IS) and Flame Proof (FP) versions available conforming to EU Atex Directive 94/9/EC IS version II 1 G Certificate No. SIRA99ATEX2154X, EEx ia IIC T4 (P1=1.13W) T5 (P1=0.73W) FP version II 2 G Certificate No. SIRA99ATEX1143X, EEx d IIC T6 Ta=55C Use Model 1669-02/06 for standard ground resistance conditions. Use Model 1669-01 / 05 with higher voltage isolation to ground for sites with high resistance soil conditions or where significant ground potential differences are known to exist.

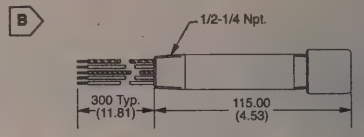
Characteristics:

- Ambient Temperature Range, Storage: -65°C to +130°C
- Operating Temperature: Non-hazardous areas: -40°C to +100°C; Hazardous areas: -20°C to + 55°C
- Maximum Load Current: 150 mA Except when limited for T5 conditions (.73W) 129 mA
- Component Response Time: <1 ns
- Surge Life (L+L)-G: 20 kA 8/20 µs: 20 times; 1 kA 10/1000µs: 1000 times

Features:

- Fits single or dual conduit ports
- Intrinisically Safe (IS) and Flameproof (FP) models available
- Weatherproof
- Long life, high operational reliability
- Stainless steel construction





For quantities of 50 and up, call for quote.

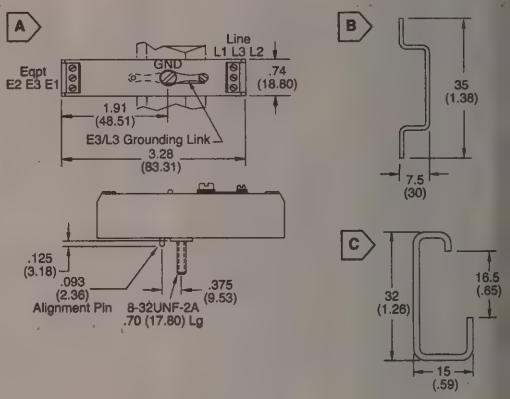
1800 SERIES SIGNAL AND DATALINE PROTECTOR

DIMENSIONS: mm (I

Bourns 1800 Series Signal and Dataline Protectors are designed to protect sensitive electronic circuits and components from damaging surge voltages and currents. Their extremely fast response and low clamping voltages make them particularly suitable for the protection of signal and data lines associated with computer, data communication, instrumentation, broadcasting and industrial controls. They may be used directly with EIA standard interfaces RS-232, RS-422, RS-423, RS-485 and with 20mA and 50mA instrumentation loops. Model 1800 Series Signal and Dataline Protectors are fast, rugged and capable of protecting against fast rising voltage transients as well as the severe current surges associated with lightning discharges. Method of Operation: Bourns 1800 Series are heavy-duty, multi-staged protectors. A solid-state section intercepts the leading edge of the surge with subnanosecond response time. Within microseconds a 3-pole common chambered Gas Tube capable of handling 200,000 ampere lightning currents operates and crowbars the surge to ground. The protector remains in the crowbar state until the surge has passed and line voltages return to safe levels, then automatically restores the line to normal operation. There is no need for resetting a breaker or replacing a fuse. Application: Protectors are generally placed at each end of a signal or data line or current loop. In the case of daisy-chain configurations (such as RS-485), protectors are placed at each node. 1820 models provide both line-to-ground and line-to-line protection and are designed to use on differential signals (such as RS-422 or RS-485) and most current loops. 1810 models provide line-to-ground protection for two separate circuits and are designed for use on ground referenced signals (such as RS-232) and 4-20 mA loops where the return wire is grounded at the protector. The 1811 and 1821 models provide the same protection modes for high frequency applications. Related Bourns Protectors: For outdoor applications with 1/2 inch NPT ports (such as field-mounted 4-20mA transmitters), please refer to Bourns 1669 Series Protector. In this application, the mixed use of an 1800 Series Protector at the controller and a 1669 Series Protector at the field is recommended.



Characteristics:

- Surge Life:
  - >100 operations with 200 Amps: 10 x 1000 µsec
  - >10 operations with 10,000 Amps: 8 x 20 µsec
- DC Leakage Current at Rated L/G Voltage: >10 µAmps
- Signal/Data Attenuation at Maximum Data Rate: 3db with 600 Ω termination
- Operating Temperature: -40°C to + 60°C
- Response Time: 50 pico-seconds
- Wire Size: 22-14 AWG

Features:

- Low peak clamping voltage even during severe current surges
- Ability to repeatedly protect against surge currents in excess of 10,000 amperes
- Convenient mounting and grounding to any flat surface or to Din 1 (TS-32) or DIN-3 (TS-35) rail
- Cable shields are passed through and may be either grounded or not grounded at the protector
- Vibration-proof screw-type clamp terminals
- Flame-resistant epoxy-filled housing

For quantities of 50 and up, call for quote.

2027 SERIES - 2-POLE GAS DISCHARGE TUBE

DIMENSIONS: mm (I

Characteristics:

- DC Holdover Voltage 1: 135 V (52 V for Model 2027-09, 80 V for Model 2027-15)/< 150 ms
- Impulse Discharge Current: 25000 A, 8/20 µs 2/1 operation minimum; 10000 A, 8/20 µs/> 10 operations; 500 A, 10/1000 µs/> 400 operations; 100 A, 10/1000 µs or 10/700 µs/> 1000 operations
- Alternating Discharge Current: 65 Arms, 11 cycles 2; 1 operation minimum
- Operating Temperature: -55°C to +250°C

Features:

- 8mm diameter, 6mm long
- UL recognized
- Custom configurations available
- High surge current rating
- Stable breakdown throughout life

Applications:

- Telecommunications
- Industrial electronics
- Commercial electronics
- Consumer electronics
- Automotive, aircraft, military electronics

For quantities greater than 1000, call for quote.

SURGE PROTECTOR TEST SET FOR GAS DISCHARGE TUBES

DIMENSIONS: mm (I

Features:

- Lightweight, hand-held design
- Easy to read LCD display
- Simple operation
- High accuracy peak reading circuit
- Wide 10-1000V Test Range
- Precise auto-sensing shutoff

Applications (Suitable for Testing):

- Gas Tubes
- Carbon Gaps
- MOVs
- Zener and avalanche diodes
- Thyristor devices
- Finished product

2035 SERIES PRECISION GAS DISCHARGE TUBE SURGE PROTECTOR

urns now offers a surface mount (SM) 2-electrode GDT surge protection device. The industry-leading quality and features of the Bourns® miniature 35 Series GDT continue in this new SM version. Compatible with "pick and place" assembly systems, the SM is ideal for high-density applications ch as PCBs for telecommunications, commercial and industrial applications.

ecifications :

nsulation Resistance: 100V (50V for 2035-09); >$10^{10}\Omega$
Glow Voltage: 10 mA; -70V
Arc Voltage: >1A; -10V
Glow-Arc Transition Current: <0.5A
Capacitance: 1 MHz; <1 pF
DC Holdover Voltage: >135V, 52V for 2035-09, 80V for 2035-15); <150ms

- Impulse Discharge Current:
  20000A, 8/20μs[2]; 1 operation min.
  5000A, 8/20μs; >10 operations
  100A, 10/1000μs; >300 operations
  100A, 10/700μs; >500 operations
- Alternating Discharge Current:
  20Arms, 11 cycles[2]; 1 operation min.
  5Arms, 1s; >10 operations
- Operating Temperature: -55 to 80°C

Features:

- Leadless, surface mount for economical assembly
- Compact mini-size
- High surge current rating
- Low capacitance and insertion loss
- Stable breakdown throughout life
- UL recognition pending

arkover limits after life ±20% (-25%, +30% for 2035-09, 2035-60, IR>$10^{\circ}\Omega$
letwork applied
ube may exceed ±0% but will continue to protect without venting

For quantities greater than 1000, call for quote.

C follow current (Apeak): 5 Arms
mpulse Life (No. of Pulses): 100 A, 10/1000 μs >300 operations
mpulse Life (No. of Pulses): 100 A, 10/700 μs >500 operations

Features:

- 5mm diameter, 4mm long (2035 series)
- 5mm diameter, 5mm long (2037 series)
- UL recognized
- High surge current rating
- Stable breakdown throughout life

Applications:

- Telecommunications
- Industrial electronics
- Commercial electronics
- Consumer electronics
- Automotive, aircraft, military electronics

For quantities greater than 1000, call for quote.

2026 SERIES 3-POLE GAS DISCHARGE TUBE

aracteristics:

ingle Impulse AC Discharge Current (A): 130 Arms
C follow current (Apeak): 20 Arms
mpulse Life (No. of Pulses): 20 kA, 8/20 μs >10 operations
mpulse Life (No. Oof Pulses): 1 kA, 10/1000 μs >400 operations

Features:

- Balanced TRIGARD®
- 8mm diameter, 11mm long
- UL recognized
- Custom configurations available
- High surge current rating
- Stable breakdown throughout life

Applications:

- Telecommunications
- Industrial electronics
- Commercial electronics
- Consumer electronics
- Automotive, aircraft, military electronics

For quantities greater than 1000, call for quote.

SL1002 SURFACE MOUNT SERIES

Features:
- RoHS compliant
- Ultra Low Insertion Loss
- Surface mountable
- 5KA surge capability tested with 8/20μS pulse as defined by IEC 61000-4-5
- Excellent response to fast rising transients.
- Can be used to meet Telcordia GR1089 without series resistance
- 10/700 6KV capability, as per ITUT k.21, enhanced test level
- 2000 Amp 2/10μS surge rating
- Meets FCC part 68 10/160μs waveform, 200A test and 10/560μs waveform 100A test.

Mechanical Specifications:
- Weight: 0.63g (0.022 oz.)
- Materials: Electrode Base: Nickel Iron Alloy
- Electrode Plating: Bright Sn
- Body: Ceramic
- Device Marking: 'LF' logo, Voltage and date code

Applications:
- Broadband equipment
- ADSL equipment
- XDSL equipment
- Satellite and CATV equipment
- General telecom equipment

SL1024A SERIES

Features:
- RoHS compliant
- Low insertion loss
- Excellent response to fast rising transients.
- Ultra low capacitance.
- 10KA surge capability tested with 8/20μs pulse as defined by IEC 61000-4-5
- Available with thermal failsafe option (add 'F' or 'S' suffix topart number)

Applications:
- Broadband equipment.
- ADSL equipment.
- XDSL equipment.
- Satellite and CATV equipment.
- Splitters
- General telecom equipment.

SL0902A SURFACE MOUNT SERIES - BROADBAND OPTIMISED™

Features:
- 2.5KA surge capability tested with 8/20mS pulse as defined by IEC 100-4-5
- Excellent stability on multiple pulse duty cycle.
- Excellent response to fast rising transients.
- Surface mountable
- GHz working frequency.

Applications:
- Broadband equipment.
- ADSL equipment, Incl. ADSL2+.
- XDSL equipment.
- Satellite and CATV equipment.
- General telecom equipment.

AVX Fuses and Thermistors

ACCU-GUARD® II - SMD THIN-FILM FUSE

Accu-Guard® II is a version of Accu-Guard® fuses for a wider range of current and voltge ratings. Constructed on alumina substrates, Accu-Guard® II fuses display superior electrical, mechanical and environmental properties.

Features:

- Accurate Current Rating
- Fast Acting
- Completely Compatible with all Soldering Systems used for SMT

Applications:

- Cellular Telephones
- Two-Way Radios
- Computers
- Battery Chargers
- Rechargeable Battery Packs
- Hard Disk Drives
- PDA's
- LCD Screens
- SCSI Interface
- Digital Cameras
- Video Cameras

Electrical Specifications:

- Operating Temperature: -55°C to +125°C
- Current Carrying Capacity: At -55°C ~ 107% of Rating, At -25°C - 100% of Rating, At +125°C - 80% of Rating
- Interrupting Rating: 50A
- Insulation Resistance: >20MΩ quaranteed (after fusing at rated voltage)

NTC SMD THERMISTORS

Chip thermistors are a high quality and low cost device especially developed for surface mounting applications. They are widely used for temperature compensation but can also achieve temperature control of printed circuits. Its silver - palladium - platinum metallization provides a high degree of resistance to dewetting of the terminations during soldering (typically 260°C / 30s).

Applications:

- LCD Compensation
- Battery Packs
- Mobile Phones
- CD Players
- Heating Systems
- Air-conditioning Systems
- Temperature Control of Switch Mode Power Supplies
- Compensation of Pressure Sensors
- Protection of Power Transistors in Various Electronic Circuits

URATA POSISTOR® PTC CHIP THERMISTORS RCUIT PROTECTION FOR OVERCURRENT PROTECTION

rcurrent protection device with resettable function suitable for current limiting resistor.
product is chip type PTC thermistor for overcurrent protection. Suitable for
nformeasure for short circuit testing in protable equipment and current limiting resistor.

atures :
apid operation to protect the circuit in an overcurrent condition abnormality such
s a short circuit. By removing the overcurrent condition, these products automatically
turn to the initial condition and can be used repeatedly.
table resistance after operation due to ceramic PTC.
603 SMD type for reflow soldering
ead is not contained in the terminations
perating temperature: -10°C to +60°C

LEAD-FREE

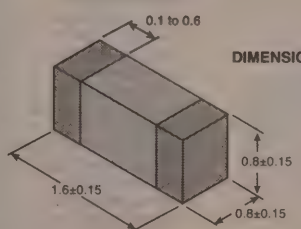
URATA POSISTOR® PTC CHIP THERMISTORS RCUIT PROTECTION FOR OVERHEAT SENSING

chip PTC Thermistor is reflow soldering SMD type for overheat sensing for power
sistors, power diodes and power ICs in hybrid circuits.

atures :
xcellent thermal response because of no coating.
olid-state construction provides excellent mechanical vibration and impact resistance.
ontactless operation provides prolonged service life and noiseless operation.
ead is not contained in the terminations
2V Maximum Voltage

LEAD-FREE



For quantities of 1000 and up, call for quote.

THERMOMETRICS Thermistors and Sensors

NTC THERMISTORS

NTC (Negative Temperature Coefficient) thermistors decrease in resistance as temperature increases. The maximum operating temperature is 150°C. Zero-power resistance values at 25°C range from 10Ω to 250KΩ; other values available upon request.

*Resistance tolerance is ±10%, except where denoted by an asterisk which is ±20%

INRUSH CURRENT LIMITERS

Limiters protect against extremely high peak inrush current, especially in AC/DC switching power supplies. These NTC thermistors effectively control surge currents because the thermal time constant of the current limiter is longer than the electrical time constant (RC) of the thermistor and the capacitor.

Also available, by special order, with kinked leads.

PTC THERMISTORS/ RESETTABLE FUSES

The values for dissipation constant and time constant listed in the table below are reference values. Actual values are a function of mounting, air flow and other factors which affect the PTC's (Positive Temperature Coefficient) ability to dissipate heat. Standard PTC's are supplied uninsulated, but can be supplied with an insulation upon request.

SHAY / BEYSCHLAG FUSES

in Film Flat Chip Fuses

U 0603 and MFU 0805 Thin Film Flat Chip Fuses are the perfect choice for most fields nodern electronics. The highly controlled thin film manufacturing process guarantees outstanding stability of fusing characteristics.

Features :
- Advanced thin film technology
- Very quick acting fuse characteristics
- Outstanding stability of fusing characteristics
- Standard metric SMD sizes
- Green product, supports lead (Pb)-free soldering

Applications :
- Information technology
- Telecommunication
- Medical equipment
- Audio/video electronics

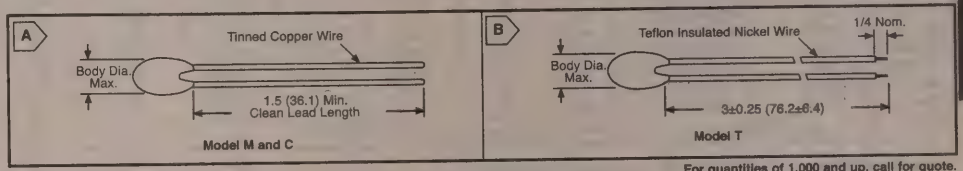
ISHAY / DALE NTC THERMISTORS

DIMENSIONS IN (mm)

, C, T Series NTC Coated Thermistors

odels M, C, and T are conformally coated, leaded thermistors for andard PC board mounting or assembly probes. The coating is ked-on phenolic for durability and long-term stability. Models M d C have tinned solid copper leads.

atures :
Small size • Wide resistance range
Model T has solid nickel wires with Teflon® insulation to provide isolation when assembled in metal probes or housings.



For quantities of 1,000 and up, call for quote.

2322 573/574 1XXXX SERIES SURFACE MOUNT MULTILAYER METAL OXIDE VARISTORS

Features:
- Surface mount multilayer surge suppressor
- Inherent bidirectional clamping
- Low capacitance types available
- Excellent energy/volume ratio
- Suitable for wave or reflow soldering
- Compliance to IEC 1000-4-2

Specifications:
- Operating temperature: -55°C to +125°C
- Response time: 0.5ns
- Maximum continuous dissipation: 5mW

Applications:
- Data lines and I/O port protection
- Protection against EMI and ESD transients
- On-board protection of ICs and transistors
- Modem protection
- LCD protection

2322 661 97XXX SERIES PTC THERMISTORS FOR OVERLOAD PROTECTION

Features:
- Ideal for pick-and-place circuit assembly
- Low mounting height
- Suitable for reflow soldering
- Small ceramic diameter for faster response
- Low heat transfer to substrate
- Flat terminations for stable positioning and good solderability

Applications:
- Telecom
  - Set top box
  - Modems
  - Central office switching (C.O.)
  - Subscriber terminal equipment (T.E.)
  - Cable TV communications

XICON Thermal Cutoffs, Thermistors, and Surge Arrestors

XICON THERMAL CUTOFFS / THERMAL-LINKS

atures:
Compact axial construction
Highly insulated
Fast, reliable operation
Special alloy that contains no cadmium
Also known as TCO's or Thermal Links

Applications:
Transformers, solenoids, ventilation fans, electric fans, small electric motors, chargers, adaptors, second battery systems, gas home appliances, fluorescent lighting, heating devices, etc.

rinciple of operation:
n abnormal temperature rise will cause the special resin used in the TCO to soften nd liquefy. As the abnormal temperature rises above the melting point of the fusible loy, the alloy melts and separates the lead wires. **Xicon Thermal Cutoffs will not eset;** the TCO must be replaced after the fault in the protected equipment is orrected.

Definitions:
- Rated Temperature: the temperature at which a TCO completely opens
- Functioning Temperature: the temperature at which a TCO begins to open
- Holding Temperature: the temperature at which a TCO will conduct the rated current for 168 hours without opening.
- Max Operating Temperature: Maximum temperature at which the device will carry full operating current without opening.

NTC THERMISTORS

3 constant signifies the dimensions
f the resistance changes against
temperature between two
ptional temperatures.

- Temperature range: -20°C to +125°C
- Maximum power rating: 500mW (@ 25°C)
- Dissipation factor: 6mW/°C (@ 25°C)
- Heat resistant, and moisture proof
- Almost indefinite life

370-NTC-T2	$29.95

GAS TUBE SURGE ARRESTORS

Features:
- Medium duty
- Two electrode
- Max. impulse discharge current (8/20μs): 10kA
- Max. AC discharge current (50Hz, 9 cycles): 65A
- Min. insulation resistance: 10^4MΩ
- Max. capacitance: 1.5pF
- AC(RMS) discharge current: 20A

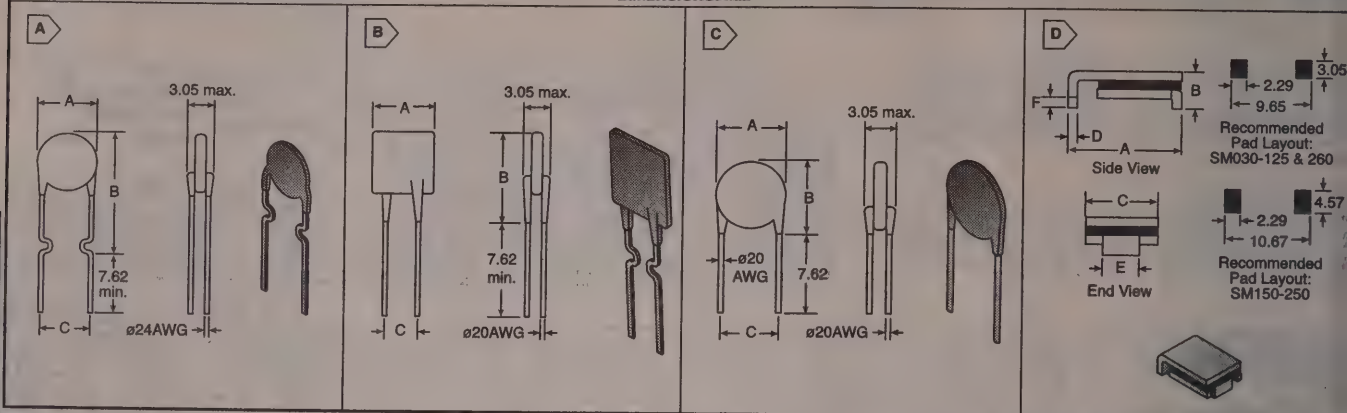
BOURNS *MultiFuse* PTC Resettable Fuses

BOURNS Reliable Electronic Solutions

DIMENSIONS: mm



MULTIFUSE® Resettable Fuses from Bourns are manufactured from a non-conductive crystalline polymer and a highly conductive carbon black. When the conductive plastic material is at normal room temperature, there are numerous carbon chains forming conductive paths through the material. Under fault conditions, excessive current flows through the material causing the temperature to rise and is accompanied by a small expansion. As the conductive particles move apart they no longer conduct current and the resistance of the device increases sharply. The material will stay "hot" as long as the power is applied. The device will remain latched, providing continuous protection, until the fault is cleared and the power is removed. The carbon chains will reform as the polymer re-crystallizes and the resistance quickly returns to its original value.

BOURNS Reliable Electronic Solutions MF-R SERIES

Features:
- Lead Free
- Radial leaded devices
- Cured, flame retardant epoxy polymer insulating material meets UL94V-0 requirements

Applications:
Almost anywhere there is a low voltage power supply and a load to be protected including:
- Computers and peripherals
- Automotive applications
- General electronics

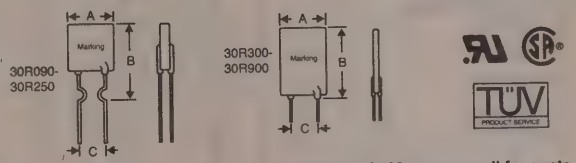
RADIAL LEADED PTC 30R SERIES

he 30R Series Resettable devices utilize a unique polymer-based, Positive Temperature Coefficient (PTC) material to protect ectrical circuits against overcurrent conditions. In normal operation, the 30R Series PTC has many conductive paths and a very low sistance. In an overcurrent condition, the temperature of the polymer material rises. This dramatically reduces the conductive paths sulting in an immediate rise in resistance. In this condition, the device provides circuit protection by significantly limiting the flow of rrent. However, once the cause of the initial overcurrent condition is eliminated, the 30R Series PTC cools down and resets to a low sistance value permitting the normal current flow to resume.



For quantities of 500 or more, call for quote.

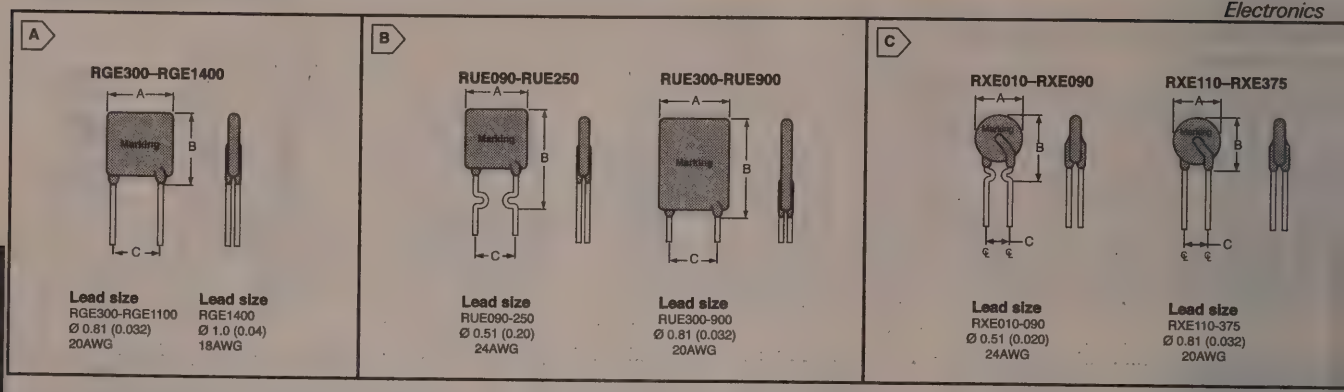
RAYCHEM PolySwitch Resettable Fuses

tyco Electronics



DIMENSIONS mm (

Raychem resettable fuses utilize a polymer based, positive temperature coefficient (PTC) material to protect electrical circuits against overcurrent conditions. In normal operations, the PTC has many conductive paths and a very low resistance. In overcurrent conditions, the temperature of the polymer material rises. This dramatically reduces the conductive paths resulting in an immediate rise in resistance. In this condition the device provides circuit protection by significantly limiting the flow of current. Once the cause of the initial overcurrent condition is eliminated, the PTC cools down and RESETS to a low resistance value permitting the normal current to resume.

RAYCHEM RGE SERIES

This product line can be used in a wide variety of automotive, computer and general electronics applications.
The RGE devices feature high current carrying capability (up to 14 amps) in a small package with fast trip times.

For quantities of 2000 and up, call for quo

RAYCHEM RUE SERIES

These devices are designed to be used in a wide variety of general electronics applications.
RUE devices complement the RXE line by providing a smaller form factor with lower resistance and higher hold current capability (up to 9 amps).

For quantities of 2000 and up, call for quo

RAYCHEM RXE SERIES

These products function as a general-purpose line of resettable fuses and are well suited for power supplies, alarm systems, speakers, motors, and many other applications.
Products range in hold currents from 0.10 amps to 3.75 amps and complement our RUE devices by providing a higher voltage rating.

For quantities of 2000 and up, call for quot

RAYCHEM PolySwitch Resettable Fuses

tyco Electronics

re than ten years ago, Raychem Circuit Protection introduced the SMD product family and polymeric PTC devices quickly became the computer industry standard for keyboard, mouse, and disk drive protection. In 1995, Raychem cuit Protection advanced the technology, reducing the size and cost of surface-mount resettable devices with the introduction of its miniSMD product series. The recent additions to the surface mount family included the nanoSMD ies, which reduces the size to a 3216mm (1206mils) footprint, one-third the size of the popular miniSMD series.

AYCHEM NANOSMD SERIES

atures:
- Voltage rating 6V
- Agency recognition: UL, CSA, TUV
- Industry's fastest time to trip
- Industry's lowest-resistance device.

Applications:
- Battery Packs
- LCD Power Screen
- SCSI
- PS/2 mouser / keyboard

RAYCHEM LTP SERIES

Rachem's PolySwitch Strap Battery Resettable device offers overcurrent protection for rechargable batteries at elavated temperatures. Made with weldable nickel terminals, and is fully compatible with current industry standards

Applications:

- Mobile phone battery packs
- Cordless phone battery packs
- Computer and PDA battery packs
- Camcorder battery packs

RAYCHEM SRP SERIES

Rachem's SRP Series offers the lowest resistance in ohm value when it comes to choosing a PolySwitch Resettable Device for your battery protection needs. The SRP can handle up to 30 volts DC with a trip rating of 7.6 amps.

Applications:

- Mobile phone battery packs
- Cordless phone battery packs
- Computer and PDA battery packs
- Camcorder battery packs

RAYCHEM PESD and SMD Chip Fuses

tyco Electronics

OLYMER ESD PROTECTORS

ychem PESD devices are designed for use in low capacitance applications, such as designs h high speed data transmission needs. The compact design offers board space savings and ger battery life due to low leakage current. Features include thick film technology, pacitance typically less than .2pF, low leakage current, trigger and clamping voltages, and a ponse time less than 1ns. These devices are capable of withstanding numerous ESD strikes d are compatible with standard reflow installation procedures.

NEW! TECHNOLOGY

atures:

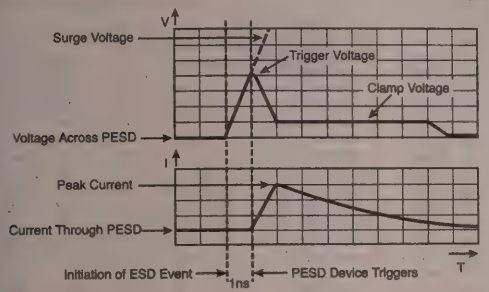
torage and Operating Temperature: -40°C - +85°C
SD Pulse Withstand: 100 pulses min., 500 pulses typ.
ested per IEC 61000-4-2, level 4, contact method)
SD Voltage Capability (tested per IEC 6100-4-2)
Contact Discharge Mode: 8kV typ., 15kV max.
Air Discharge Mode: 15kV typ., 25kV max.
HOHS Compliant
ELV Compliant

Applications for 650-PESD0402-060 and 650-PESD0603-140:

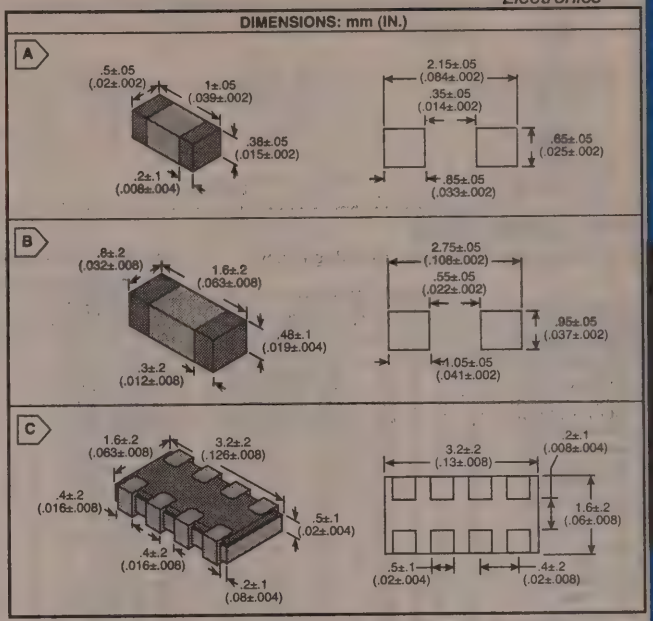
- Cellular Phones
- Portable Devices
- High Speed Ethernet
- USB 2.0 and IEEE 1394 Interfaces
- Antennas
- Printer Ports
- DVI and HDMI Interfaces

Applications for 650-PESD1206Q-140:

- Portable Devices
- High Speed Ethernet
- USB 2.0 and IEEE 1394 Interfaces
- Printer Ports
- DVI and HDMI Interfaces



DIMENSIONS: mm (IN.)



ote:

Measured during IEC 61000-4-2, level 4 pulse, 8kV contact test method
• Measured 30ns after pulse initiation

For quantities of 1000 and up, call for quote.

AST ACTING SMD CHIP FUSES

atures:

Small size with high current ratings
Excellent temperature stability
High reliability and resilience
Strong arc suppression characteristics

atures:

Monolithic, multilayer design
Lead-free construction
High temperature performance
-55° to +125°C operating range

Applications:

- Laptops
- Digital cameras
- Cell phones
- Printers
- DVD players
- Portable electronics
- Game systems
- LCD displays
- Scanners

Clear Time Characteristics:

% of rated current	Clear time at 25°C
100	4 Hours Min
250	5 Seconds Max
400	.05 Seconds Max

Agency Approvals:

- UL File# E197536

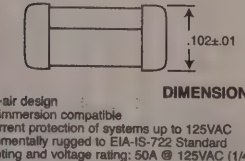
6125FA SERIES SURFACE MOUNT FAST-ACTING



DIMENSIONS: IN

- Wire-in-air design
- Solder immersion compatible
- Overcurrent protection of systems up to 125VAC
- Environmentally rugged to EIA-IS-722 Standard
- Interrupting and voltage rating: 50A @ 125VAC (1/4-12A)

MOUSER STOCK NO.	Amp (A)	Volt (V)	Price Each 1	100

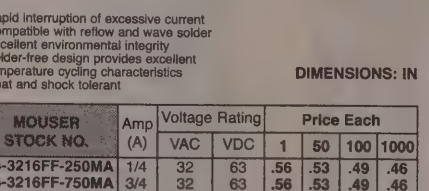
*504-6125FA4A	4	125	.47	.35

3216FF SERIES FAST-ACTING CHIP FUSES



- Rapid interruption of excessive current
- Compatible with reflow and wave solder
- Excellent environmental integrity
- Solder-free design provides excellent temperature cycling characteristics
- Heat and shock tolerant

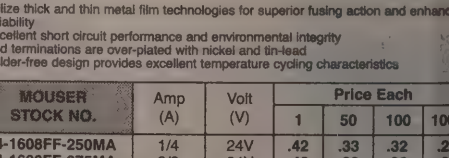
1608FF SERIES FAST-ACTING CHIP FUSES



DIMENSIONS:

- Utilize thick and thin metal film technologies for superior fusing action and enhanc reliability
- Excellent short circuit performance and environmental integrity
- End terminations are over-plated with nickel and tin-lead
- Solder-free design provides excellent temperature cycling characteristics

KEYSTONE FUSE HOLDERS AND CLIPS

Fuse Holders and Clips

Mini blade holders and clips are compatible with Littelfuse • Thru hole PC mountable
.205" x .025" standard and .110" x .032" mini blade fuses, suitable for 15 amp applications
.12" x .032" maxi blade fuses, suitable for 30 amp applications

For quantities of 5000 and up, call for quote.

MF OMNI-BLOK® FUSE BLOCK WITH FUSES

e SMF Omni-Blok® Fuseholder permits quick and easy replacement of Nano_® SMF face mount fuses. The fuse block and pre-installed fuse combination can be placed on PC board in one efficient manufacturing operation. Fuse replacement is accomplished hout exposing the PC board to the detrimental effects of solder heat.

54 Series-Very Fast Acting Fuses

LITTELFUSE FUSE HOLDERS

In-Line Fuseholder for ATO® Fuses

Specifications:

Ambient temperature: -40°C to +85°C
Body: Black thermoplastic,
Terminals: brass, tin plated, snap into body

For quantities of 500 and up, call for quote.

MOUSER STOCK NO.	Littelfuse Part No.	Fig.	Description	Price Each 1	10	100	250

CLASS T FUSE BLOCKS

Features:
- Bases are molded phenolic. To provide a low resistance connection and long-range reliability, steel reinforcing springs are supplied as standard. Larger blocks employ an integral heat sink for maximum heat dissipation.

E14721 LR73091

For quantities of 500 and up, call for quote.

OURNS CONCAVE AND CONVEX TERMINATION CHIP RESISTOR ARRAYS, LEAD FREE

atures:
Lead free version
Concave and convex termination style
Resistance tolerance ±5 %
Suitable for most types of soldering processes

pecifications:
Operating temperature range: -55°C to +125°C

AT10, CAY10:
Package power rating @ 70°C: 125 mW (J4), 63 mW (J2)
CAT 10: insulated resistors in 0804 size package
CAY 10: 2/4 isolated resistors in 0404/0804 size package

AT16, CAY16:
Power rating per resistor: 62 mW
Number of elements (isolated): 4 (J4LF), 2 (J2LF)

J2 Package

J4 Package

BOURNS Thin Film on Silicon Isolated Resistors

BOURNS® Reliable Electronic Solutions

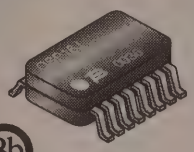
2QSP/2NBS-XX1 SERIES ISOLATED

Isolated resistor networks are commonly used in digital circuits where series resistors are required on the system bus. Fabricated with Tantalum Nitride and Nickel Chromium technology on Silicon, these resistors feature excellent stability, TCR and tracking performance. This product series is available in a range of miniature package types conforming to JEDEC standards.

Features:
- Multiple isolated resistors
- Stable thin-film-on-silicon technology
- Ultra-miniature packages to JEDEC standards

Applications:
- Pull-up/pull-down
- Ideal for space-constrained applications

Electrical Characteristics:
- Max. TCR: 150 ppm/°C
- Max. Operating Voltage: 50V
- Operating Temperature: -55/+125°C



LEAD-FREE

BOURNS Thin Film on Silicon Bussed Resistors

BOURNS® Reliable Electronic Solutions

2QSP/2NBS-XX2 SERIES

Bussed Resistor networks are typically used in DC pull-up and pull-down applications where system data or control lines must be tied to a fixed potential. Fabricated with a tantalum Nitride and Nickel Chromium on Silicon process, these resistors feature excellent stability, TCR and tracking performance. Bussed resistor networks are available in a range of miniature package types conforming to JEDEC standards.

Features:
- Multiple isolated resistors
- Stable thin-film-on-silicon technology
- Ultra-miniature packages to JEDEC standards

Applications:
- Pull-up/pull-down
- Ideal for space-constrained applications

Electrical Characteristics:
- Max. TCR: 150 ppm/°C
- Max. Operating Voltage: 50V
- Operating Temperature: -55/+125°C

BOURNS 2% SMD Thick Film Resistor Networks

BOURNS® Reliable Electronic Solutions

4800P SERIES

Specifications:
- Maximum Operating Voltage: 50V
- Temperature Coefficient of Resistance: 50Ω and above = ±100ppm/°C; below 50Ω = ±250ppm/°C
- Operating Temperature: -55°C to +125°C
- Insulation Resistance: 10,000 MΩ min.
- Dielectric Withstanding Voltage: 200 VRMS
- Package Power Rating at 70°C: 4816P: 1.28 watts
- Resistor Tolerance: 10 Ω to 49 Ω = ±1 Ω, 50 Ω to 5 MΩ = ±2%

Features:
- Standard E.I.A. package compatible with automatic placement equipment
- Standard Packaging 50 per tube
- Marking on contrasting background for permanent identification
- Compliant leads to reduce solder joint fatiguing
- Standard electrical schematics: isolated, bussed

BOURNS®
Reliable Electronic Solutions

4600X SERIES

Specifications:

Standard resistance range: 22Ω to 1MΩ
Standard resistance tolerance:
50Ω-5MΩ ±2% <49Ω=1Ω)
Operating temperature range: -55°C to +125°C
Temperature coefficient of resistance:
±100ppm/°C (<50Ω = ±250ppm/°C)
Operating voltage: 100VDC max.
Insulation resistance: 10,000MΩ min.
Resistor Tolerance: 10 Ω to 49 Ω
= ±1 Ω, 50 Ω to 5, MΩ = ±2%

Features:

- Low profile is compatible with dips
- Ammo-pak packaging available
- Recommended for rosin flux, and solvent clean or no clean flux process

For quantities of 2,000 and up, call for quote.

KOA SPEER 5% CONVEX TERMINATION RESISTOR ARRAYS

Features:
- Manufactured to type RK73 standards
- Less board space than individual chips
- Isolated resistor elements
- Convex terminators with square corners
- Marking: Body color black
  1E no marking
  1J white three-digit marking

Specifications:
- TCR: ±200
- Power Rating: 63mW
- Resistance Tolerance: 5%
- Operating Temperature Range: -55°C to +125°C

Circuit Schematic

MOUSER ELECTRONICS a tti company (800) 346-6873

VISHAY / DALE 2% Thick Film Resistor Networks

DP SERIES - MOLDED DIP

atures:
ual-in-line, molded DIP
60" [4.06mm] maximum seated height
ugged, molded case construction
ighly stable thick film
ow temperature coefficient (-55°C to +125°C) ±100PPM/°C
ompatible with automatic inserting equipment
ide resistance range

ctrical Specifications:
erance: ±2% standard
mperature coefficient: -55°C to +125°C
sistor power rating: 70°C max.
Schematics = .125 watt; 03 Schematic = .250 watt
perating temperature range: -55°C to +125°C

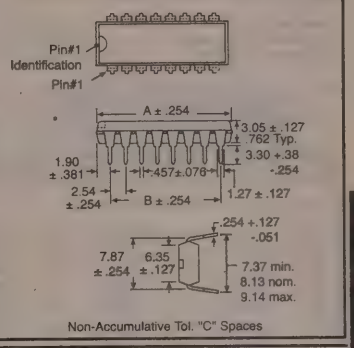
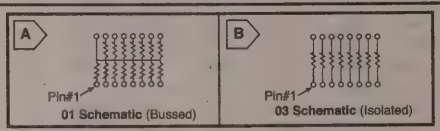
DIMENSIONS (mm)



Non-Accumulative Tol. "C" Spaces

SOMC SERIES

atures:
50" [1.27mm] lead spacing
90" [2.29mm] maximum seated height
lugged, molded case construction
ighly stable thick film
ow temperature coefficient (-55°C to +125°C) ±100PPM/°C
educes total assembly costs
ompatible with automatic surface mounting equipment
ide resistance range available
niform performance characteristics
eets EIA PDP100, SOGN-0002 outline dimensions



Electrical Specifications:
- Resistance range: 10 ohm to 1 Megohm standard. Zero ohm jumpers available.
- Tolerance: 01 and 03 schematic= ±2% standard. ±1%, ±5%, ±10%, ±20% available.
- Temperature coefficient: (-55°C to +125°C) ±100PPM/°C typical
- Resistor power rating: 70°C max.
  01 Schematics = .080 watt; 03 Schematic = .160 watt
- Operating temperature range: -55°C to +125°C

Available in 14 and 20 pin style, additional resistance values, in isolated and bussed styles.

VISHAY / DALE 2% SIP Thick Film Resistor Networks

SC SERIES - 2% CONFORMAL COATED SIP RESISTOR NETWORKS

Features:
- .195 (4.95mm) "A"
- "A" profile standard in 6 thru 10 pins

Specifications:
- Standard resistance tolerance: ±2%
- Operating temperature range: -55°C to +125°C
- Temperature coefficient of resistance: (-55°C to +125°C) ±100ppm/°C typical
- Operating voltage: 100VDC max.
- Resistor power rating: (max. @ +70°C) fig. A .125W, fig. B .20W

IRC 0805, 1206-0.1% 25 PPM SMD Thin Film Resistors

PFC SERIES TANFILM

Features:

- Available in 0805, 1206
- Passivated TaNFilm element
- Wrap-around termination
- Temperature Coefficient = 25ppm
- Tolerance= 0.1%
- Leach resistant nickel barrier termination

KOA 0402-2512 SMD Lo-Ohm Current Sense Resistors

KOA SPEER ELECTRONICS, INC.

RT73 SERIES - THICK FILM 0402, 0603, 0805, 1206, 1210, 2010, 2512

Features:

- 96/10 solder plated terminations, standard
- Meets or exceeds EIA 575, EIA PDP-100, MIL-R-55342F
- Marking: Three or four-digits on indigo protective coat. No marking. 1E size.

KOA SMD Molded Current Sense Resistors

SL AND TSL SERIES RESISTORS

Features:

- Surface mount type
- Flameproof UL94-V-O molded polymer case
- Excellent dimension accuracy, mountability and shock resistance
- Suitable for flow, reflow and hand soldering
- Resistance Tolerance: 1%
- Operating Temperature Range: -55°C to +180°C
- 1000 Piece Reels

TLR AND UR73 SERIES CURRENT SENSING RESISTORS

Features for TLR:

- Metal plate current sensing
- Metal alloy, superior corrosion and heat resistance
- Applications include current sensing, voltage division and pulse applications
- Ultra low resistance (1mΩ-20mΩ)
- Marking: Black body color with marking (3A and 2B only) (3AW: 1mΩ only)

Features for UR73:

- Very low resistance, high precision reliability
- Suitable for reflow and flow soldering
- Utilization of thick film
- Low T.C.R. achieved (±100 ppm/°C)
- Marking: Indigo body color with white marking

OA 0402, 0603, 0805, 1206, 1210, 2010 & 2512 - 1% Resistors

KOA SPEER ELECTRONICS, INC.

73H SERIES - THICK FILM

ntinual effort to support their customer base on a global nment, KOA Corporation is adopting a new global part ering system.

ures:

92 thick film resistor element
-leaching nickel barrier terminations
0 solder plated terminations, standard
ilable in 100% tin terminations (no lead)
available with epoxy bondable palladium
r terminations in 2A and 2B sizes
ts or exceeds EIA 575, EIAJ RC 2690A, PDP-100, MIL-R-55342F
king: Four-digit black on blue protective coat. marking on 1H and 1E size.
e-digit on 1J size, E-24 values only.
rating temperature: -55°C to +155°C
(ppm/°C) max = ±100ppm

RK73H SERIES - THICK FILM (CONT.)

In a continual effort to support their customer base on a global environment, KOA Corporation is adopting a new global part numbering system.

Features:

- RuO2 thick film resistor element
- Anti-leaching nickel barrier terminations
- 90/10 solder plated terminations, standard
- Available in 100% tin terminations (no lead)
- Also available with epoxy bondable palladium silver terminations in 2A and 2B sizes
- Meets or exceeds EIA 575, EIAJ RC 2690A, EIA PDP-100, MIL-R-55342F
- Marking: Four-digit black on blue protective coat. No marking on 1H and 1E size. Three-digit on 1J size, E-24 values only.
- Operating temperature: -55°C to +155°C
- TCR(ppm/°C) max: ±100ppm

MOUSER ELECTRONICS a tti company (800) 346-6873

KOA 0603, 0805, 1206 - 0.1% 25ppm Resistors

KOA SPEER ELECTRONICS, INC.

I73 SERIES - THIN FILM

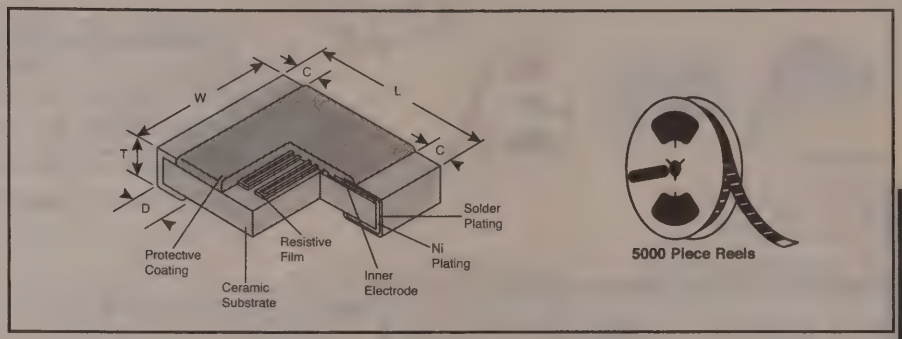
continual effort to support their customer base on a global ronment, KOA Corporation is adopting a new global part bering system.

mple:

Part Number:	New Global Part Number:
73E1ET(Code)B	RN731ELTP(Code)B25
73E1JT(Code)B	RN731JLTD(Code)B25
73E2AT(Code)B	RN732ALTD(Code)B25
73E2BT(Code)B	RN732BLTD(Code)B25

tures:

ckel chromium thin film resistor element
ti-leaching nickel barrier terminations
/10 solder plated terminations, standard
eets or exceeds EIA 576, MIL-R-55342F
arking: Four-digit, distinctive color identifiers
nly E-24 values are marked on 1J)
CR: 25ppm
lerance: 0.1%



ert Value Code from Table of Stocked Values

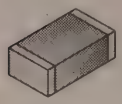
CRCW SERIES - THICK FILM - 1% SMT RESISTORS



Available in Reels

Specifications:

- Resistance tolerance: ±1%
- Operating temperature: -55°C to +150°C
- Temperature coefficient: ±100ppm
- Cut Tape and Reels available
- Industry standard sizes

* Insert **Value Code** from Table of Stocked Values

For quantities greater than listed, call for qu

WSL SERIES

Features:

- Ideal for current sensing, voltage division and pulse applications
- All welded construction
- 60/40 tin/lead copper terminations
- Solid metal Nickel-chrome or Manganese-copper alloy resistive element
- Very low inductance 0.5nH to 5nH
- Proprietary technique produces extremely low resistance values
- Excellent frequency response
- Low thermal EMF
- Tolerance 1% standard

* Insert **Value Code** from Table of Stocked Values

VISHAY / DALE 0603, 0805, 1206 - 0.1% 25ppm Resistors

VISHAY

NPW SERIES - THIN FILM RECTANGULAR, RESISTOR CHIP

Features:
- Metal film layer on high quality ceramic
- Protective top coat
- Excellent stability at different environmental conditions
- Low TC and tight tolerances
- TC: 25ppm
- Tolerance: 0.1%
- Available with tin lead or (Pb)- free solder contacts

Features:
- Wrap around terminations
- High power ratings
- All welded construction
- Superior surge capability
- Molded encapsulation
- Tolerance 1% standard
- Available in non-inductive styles with Aryton-Perry winding (WSN in lieu of WSC)
- Cut Tape or Full Reels available

WSR SERIES, 2 AND 3 WATT

Features:
- Ideal for current sensing, voltage division and pulse applications including switching, linear power supplies, and power amplifiers
- Molded high temperature encapsulation
- Very low inductance 0.5nH to 5nH
- Proprietary technique produces extremely low resistance values
- Excellent frequency response
- Low thermal EMF
- Tolerance 1% standard
- Case size: 4527
- Cut Tape or Full Reels available

ICON 0603, 0805, 1206 - 5% SMD Film Resistors

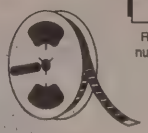
XICON

ICK FILM

ures:
h purity alumina substrate
ve or flow solderable
ap around termination
ellent high frequency characteristics
nt temperature coefficient resistance

- Inner electrode protection
- Excellent mechanical strength
- Excellent electrical stability
- High quality thick film element
- Stable high frequency characteristics
- Reduced lead inductance

Common Specification:
- Temperature coefficient:
  100Ω and below: ±500ppm
  110Ω to 470KΩ: ±300ppm
  510KΩ to 3.3MΩ: ±500ppm
  3.6MΩ to 10MΩ: ±1000ppm

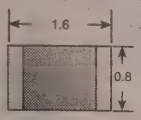


Resistor Pricing

Resistors ordered in lots of 1 reel per value can be combined with the same stock number range for lower price. Annual price agreements are also available. Call any Mouser Service Representative.

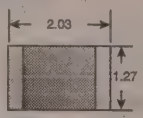
Available in Reels

Case Style Specifications:
ed power: 1/16W
x working voltage: 50V DC
x overload voltage: 100V DC
erating temperature range:
5°C to +125°C



DIMENSIONS (mm)

0805 Case Style Specifications:
- Rated power: 1/10W
- Resistance tolerance: ±5%
- Max working voltage: 100V DC
- Max overload voltage: 200V DC
- Operating temperature: -55°C to +125°C



DIMENSIONS (mm)

1206 Case Style Specifications:
- Rated power: 1/8W
- Resistance tolerance: ±5%
- Max working voltage: 200V DC
- Max overload voltage: 300V DC
- Operating temperature: -55°C to +125°C

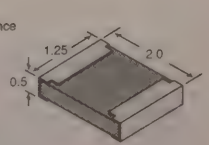
CON 0.1% SMD Thin Film Resistors

XICON

PM/°C - 0805

ifications:
rance: ±0.1%
t: ±10PPM/°C
kage size: 0805
operating voltage: 75VDC max.
er rating: 0.1W

Features:
- Thin film resistor
- Stable high frequency performance
- Uniform physical dimensions



DIMENSIONS (mm)

lable in other package sizes with lead time and MOQ requirements

Milimeters	6.35	3.18	0.76	3.05	1.27	3.05	3.68

Features:
- 1 Watt in a 2512 Package Size
- Low TCR (20 ppm/°C) resistor alloy
- Low Inductance, Rugged Construction
- High Current Handling Capacity (45 Amps Continuous Max)

Specifications:
- Tolerance: ±5%
- Power (Watts): 1 @ 70°C
- Current Rating: Range Dependent

Operating Characteristics:
- Load Life @ 70°C: 1% Δ Max
- Moisture No Load: 1% Δ Max
- Temp Cycle @ -40°C & +125°C: 1% Δ Max

Applications:
- Current Sensir
- Feedback
- High Frequenc

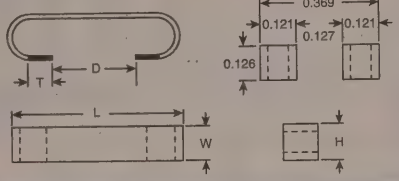
OARS SERIES OPEN AIR SENSE RESISTORS

Features:
- Superior Thermal Expansion Cycling
- Inductance ≤ 10nH
- Flameproof
- Solderable Pads (60/40 Solder Plated)
- Lead Flexible for Thermal Expansion
- Low Termination Stress ("J" Leads)

Applications:
- Current Sensing
- Feedback
- Low Inductance
- Surge and Pulse
- AC Applications (please contact the factory)

Operating Characteristics:
- Load Life @ 70°C (1000 hrs): 1% D Max.
- Moisture No Load (1000 hrs): 1% D Max.
- Temperature Cycle @ -40°C & +125°C (1000 cyc): 1% Max.



Specifications:
- Tolerance: ±5%
- Resistance Wire TCR ±20ppm/°C
- 50V Continuous Pulse Rating/Rated Voltage

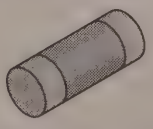
IRC 10% SMD Surge Resistors

HSF-1 SERIES

Specifications:
- Size Code: F
- Industry Footprint: 2512
- Maximum Power Rating: 1W @ 70°C
- Working Wattage: 350
- Tolerance: ±10%
- TCR (ppm/°C): ±50, ±100

Features:
- Up to triple the surge rating of the rugged CHP1
- Replaces costly surface-mount wirewound resistors
- 150°C maximum operating temperature
- 1 Watt power rating



For quantities of 2000 and up, call for q

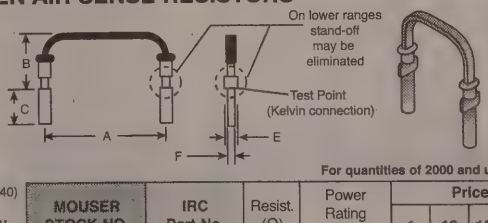
IRC 1% & 5% Leaded Current Sensing Resistors

OAR SERIES OPEN AIR SENSE RESISTORS

Note:
Contact factory for:
1. Variations of "A" dimension
2. Different lead diameter



Features:
- Welded Construction
- Flameproof
- Inductance Less than 10nH
- Solderable Copper Leads (60/40)

Operating Characteristics:
- Load Life @ 25°C (1000 hrs): 1% Max.
- Moisture No Load (1000 hrs): 1% Max.
- Temp. Cycle @ -40°C & +125°C (1000 cyc): 1% Max.

Specifications:
- Tolerance: ±5%
- Resistance Wire TCR ±20ppm/°C

Feedback:
- Low Inductance
- Surge and Pulse

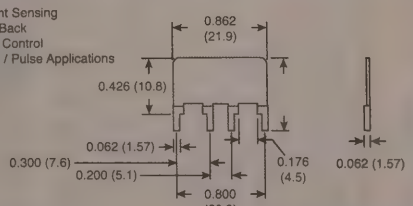
CSL SERIES - FOUR TERMINAL OPEN AIR SENSE RESISTOR

Specifications:
- 4- Terminal Kelvin connections
- 5 Watt Max power
- 55 Amp Max current
- Tolerance: 1%
- <55ppm/°C TCR

Features:
- Inductance less than 10 nanohenries
- Flameproof
- Solderable Leads (60/40 plate)
- 55 Amp Continuous Operating Current
- Inline construction
- Economical board space design
- Welded construction

Applications:
- Current Sensing
- Feed Back
- Motor Control
- Surge / Pulse Applications



For quantities of 200 and up, call for

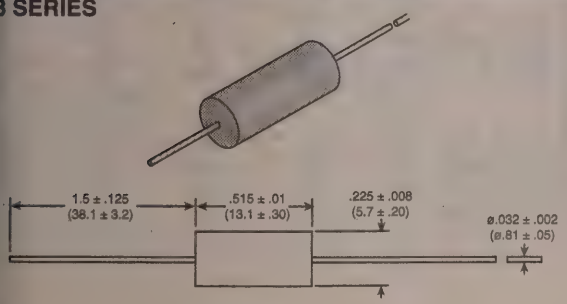
RC 5% Thick Film Metal Glaze Resistors - 3 Watt

-3 SERIES



ures:
Surge Strength
ctive as carbon
position Replacement

Specifications:
- Power Rating: 3W @ 25°C
- Tolerance: 5%
- Leads: Tin-lead electroplated copper
- TCR: ±100(T0) ppm/°C
- Voltage Rating: 1000V Max.

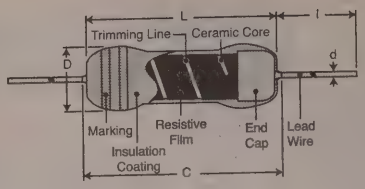
KOA SPEER 5% Carbon Film Resistors - 1/4W, 1/2W

KOA SPEER ELECTRONICS

Features:
- Suitable for automatic machine insertion
- Marking: Venetian red body color with color-coded bands on CF.



ORDERING INFORMATION

In a continual effort to support their customer base on a global environment, KOA Corporation is adopting a new global part numbering system.

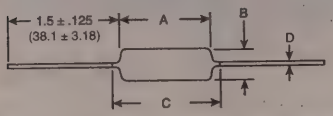
VISHAY / DALE .1% Metal Film Resistors, Precision, Ultra-high Stability

TYPE PTF SERIES

DIMENSIONS: IN (mm)

Features:
- Extremely low temperature coefficient of resistance
- Very low noise and voltage coefficient
- Very good high frequency characteristics
- Can replace wirewound bobbins
- Proprietary epoxy coating provides superior moisture protection



Model	A	B	C	D
PTF56	0.250±0.031 (3.81±0.51)	0.091±0.009 (2.31±0.23)	0.300 (7.62)	0.025 (0.64)
PTF65	0.375±0.062 (9.53±1.57)	0.145±0.016 (3.68±0.41)	0.475 (12.07)	0.025 (0.64)

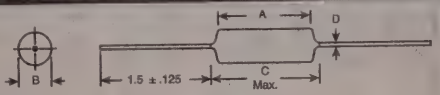
VISHAY / DALE 1% Metal Film Resistors - 1/8, 1/4 and 1/2 Watt

TYPE RN SERIES



Features:
- Very low noise
- Very low voltage coefficient
- Excellent high frequency characteristics
- Meets MIL-R-10509
- Flame retardant epoxy coating

Features:
- ±100PPM/°C temperature coefficient
- Superior electrical performance
- Flame retardant epoxy conformal coating
- Standard 5 band color code marking for ease of identification after mounting
- Tape and reel packaging

Specifications:
- Power Rating: CCF55=1/4 & 1/2 watt CCF60=1/2, 3/4, & 1 watt
- Insulation Resistance: 10,000 MΩ
- Operating Temperature: -65° to +165°C

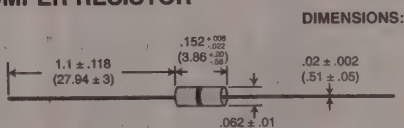
MODEL FRJ-50 ZERO OHM JUMPER RESISTOR

DIMENSIONS: IN (mm)

Features:
- Provides low resistance circuit interconnections
- Flame retardant coating
- Compatible with automatic insertion equipment

Specifications:
- Resistance: 0.01Ω max.
- Insulation Resistance: Dry 10,000MΩ; Wet 100MΩ
- Lead Material: Tin-plated copper (max. 98% tin)



For quantities of 10000 and up, call f

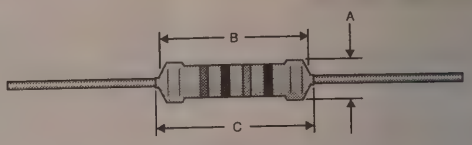
PR01/PR02/PR03 SERIES POWER METAL FILM RESISTORS

Features:
- High power in small packages
- Defined interruption behavior
- Non flammable

Specifications:
- Resistance tolerance: ±5%
- Operating temperature: -55°C to +155°C
- Temperature coefficient: ±250ppm

Applications:
- Telecommunication
- Consumer
- White goods
- Industrial electronics
- Switch mode power supplies
- Line protection
- All general purpose power applications



For quantities of 50000 and up, call for quote.

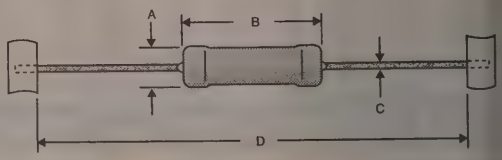
AC01/AC03/AC05 SERIES CEMENTED WIREWOUND RESISTORS

Features:
- All welded construction
- Ceramic core
- High power dissipation in small volume
- High pulse load handling capabilities
- Non-flammable cement coating
- Tinned copper-clad iron leads

Specifications:
- Resistance tolerance: ±5%



For quantities of 10000 and up, call for quote.

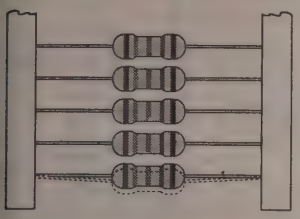
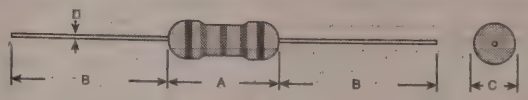
MOUSER ELECTRONICS a ttl company

CON 1% Metal Film Resistors - 1/8, 1/4 and 1/2 Watt

XICON™





W.V. = $\sqrt{P * R}$
W.V. = Working Voltage DC
P = Power (rated in watts)
R = Resistance (rated in ohms)

Actual working voltage is the lower of either the value calculated from the above formula or the value listed in the chart.

- Temperature coefficient: ±50 ppm/°C
- Epoxy coated for environmental protection
- Low noise

Xicon Series	Watt Size	Max. Working Voltage	Dimensions (mm) A	B	C	D

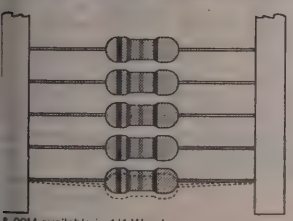
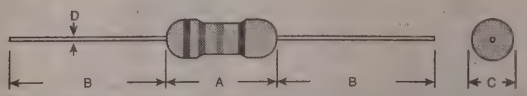
CON 5% Carbon Film Resistors - 1/8, 1/4, 1/2W and 1 Watt

XICON™





W.V. = $\sqrt{P * R}$
W.V. = Working Voltage DC
P = Power (rated in watts)
R = Resistance (rated in ohms)

Actual working voltage is the lower of either the value calculated from the above formula or the value listed in the chart.

- Low cost
- Use instead of carbon composition in low pulse applications
- Epoxy coated for environmental protection

Xicon Series	Watt Size	Max. Working Voltage	Dimensions (mm) A	B	C	D

370-BJ250-2C	8.2K, 10K, 15K, 20K, 27K, 30K, 33K, 47K, 56K, 68K, 75K, 82K, 100K	13
370-BJ250-3	100K, 110K, 120K, 130K, 150K, 160K, 180K, 200K, 220K, 240K, 270K, 300K, 330K,	1
370-BJ250-3C	360K, 390K, 430K, 470K, 510K, 560K, 620K, 680K, 750K, 820K, 910K	13
370-BJ250-C	100 each of all of the values listed for 370-BJ250-1C, 370-BJ250-2C & 370-BJ250-3C. (7200 pieces)	36

XICON 5% Metal Oxide Power Resistors - 1, 2, 3 and 5 Watt

Features:
- Smaller size
- Excellent flame retardant coating
- Stable performance in diverse environments

Specifications:
- Temperature coefficient: ±350ppm
- Resistance tolerance: ±5%
- Max working voltage: 1W, 2W, 3W: 350VAC, 5W: 500VAC
- To order tape & reel add "/reel" to Mouser stock #

XICON 5% Cement Power Resistors - 5, 7, 10, 15 and 25 Watt

VERTICAL MOUNT

Features:
- Exceptionally small, sturdy, and reliable
- Sealed with a special cement
- Excellent moisture resistance
- High temperature stability
- Ceramic flame retardant package

Specifications:
- Tolerance: ±5%
- Temperature coefficient: ±350ppm/°C max; <20Ω ±400ppm/°C

(5W leads centered 5mm1mm lead space. 7W and 10W are offset)

ures:
xdized aluminum housing ensures good humidity seal
signed for chassis or heat-sink mounting for maximum
t dissipation
minations are silver plated
der, cable, threaded or fast-on terminations
h level voltage protection
ndard terminations: 10-100 watt solder terminations;
-300 watt threaded terminations.
n-standard ohmic values available.

ifications:
ulation resistance: 10 GΩ
ectric strength:
0VAC peak (10-15W);
0VAC (25-50W);
0VAC (100-300W)
istant element:
per-nickel alloy, or nickel chrome alloy
sing: anodized aluminum
e material: ceramic steatite
inductance and special terminations available
I - Low inductance series
9001 (1994)
efer molding process insures a good humidity seal and
nanent compression fit of the concentric resistive element.

Dissipation:
the use of proprietary heat sinks
wer thermal resistance is acceptable,
ng is not recommended. For maximum
ansfer it is recommended that a heat sink
ound be applied between the resistor base
eat sink/chassis mounting surface. It is
al that the maximum hot spot temperature
°C is not exceeded and therefore the
r must be mounted on a heat sink of correct
l resistance for the power being dissipated.

mum Overload:
consult the factory for assistance
ning your particular overload application.

- Also available in 75 and 150 watt sizes
- 5% tolerance below 1Ω

For quantities of 100 and up, call for quote.

ARCOL Thick Film Power Resistors - 100 Watt

FPA SERIES

Features:
- ISOTOP/SOT227 semiconductor style package
- 100W dissipation in a small footprint
- Very low inductance
- Direct heatsink mounting - 0.85°C/W
- Due to a Non-Inductive design these elements are ideally suited for high frequency and pulse load applications

Specifications:
- TCR: 250ppm
- Power rating at 25°C: 100W
- Max working voltage: 1kV
- Working temperature range: -55°C to +155°C
- Non-Heatsink mounted rating - 2.5W

ARCOL Thick Film Power Resistors - 250 Watt

FPA SERIES

DIMENSIONS: mm

Features:
- High Power/Volume Ratio
- Direct heat sink mounting
- Due to a Non-Inductive design these elements are ideally suited for high frequency applications

Specifications:
- Power rating: 250W (heat sink at 100° C)
- Temperature coefficient: 100ppm/° C
- Max working voltage: 5000V
- Working temperature: -55° C to +155° C
- Dielectric strength: 7000V/12kV

ARCOL Axial Coated Silicon Resistors - 5 Watt

ACS SERIES

Features:
- 5 watt resistor is the size of a generic 3 watt resistor
- Inductive type resistors
- Tape & Reel: 1000 per Reel

Specifications:
- Resistance tolerance: < than 1 ohm (10%)
  1 ohm and > (5%)
- Temperature range: -55° C to +350° C
- Temperature coefficient: <1 ohm (90ppm/° C)
  1 ohm to 10 ohm (50ppm/° C)
  >10 ohm (20ppm/° C
- Insulation resistance: 1000M ohms Min.
- Dielectric withstand voltage: 500V AC

P SERIES

Non-Inductive, Heat Sink Mount TO-126, TO-220, and TO-247 Packages

Features:

Non-Inductive Design, Ideal for Power Switching Circuits, Snubbers, RF Applications: 50 Ohm performance up to 500 MHz.
Values as low as 0.005 ohm ideal for Current Sensing in Power Supplies, Motor Controls, and Battery Charging Circuits
Resistor Element Electrically Isolated from the Ceramic Heat Dissipating Mounting Surface (1500 V ACrms)
Tight Tolerance for most resistance values

Power Ratings are based on +25°C Case Temp.:

Case temp. is used to establish the max. applied power, see Derating Curve. The case temp. measurement is made with a thermocouple contacting the bottom mounting surface of the package (center of heat dissipating ceramic), the resistor mounted on the heat sink with thermal grease. See Mounting Note.

Without a Heat Sink:

Power in free air at +25°C the MP Series have
following power ratings:
MP915: 1.25 W MP916, MP925, MP930: 2.25 W
MP9100: 2.5 W MP9100: 3.5 W

Mounting Note:

Mount on a smooth, clean, and flat heat sink surface with a thermal interface material such as thermal grease.
Entire exposed ceramic area must be in contact with the heat sink. For additional technical information please refer to Caddock Applications Notes for the MP Series available online at www.caddock.com.

Screw Mounting:

Use of a compression washer (Belleville type) is recommended. The compression washer must provide a force of 300 lbs. Recommended mounting torque is 6 in-lbs. Maximum mounting torque to avoid damage to the package 8 in-lbs.

Clip Mounting:

Recommended Clip Force is 8 to 35 lbs applied to the center of the package. The clip should be smooth to avoid any concentrations of pressure.

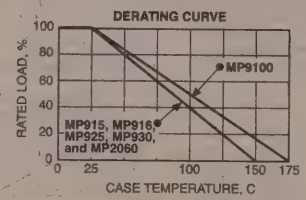

Table of Stocked Values in (Ω)

MP725 D-PACK STYLE

Features:
- Non-Inductive Design
- Values as Low as 0.020 Ohm
- Resistor Electrically Isolated from Heat Sink

Specifications:
- Power Rating: 25 W at +25°C Case Temp. (see Derating Note for Power Rating)
- Temp. Coeff. ΔR taken at +150°C, ref to +25°C
  0.50 ohm to 1.00 K ohm: -20 to +80 ppm/°C
  0.050 ohm to 0.49 ohm: 0 to +200 ppm/°C
  0.020 ohm to 0.049 ohm: 0 to +300 ppm/°C

***Derating Note: The case temperature is to be used for purposes of establishing the maximum applied power. See Derating Curve.** The case temperature measurement is made on the metal mounting tab against the molded body. Derate appropriately for the ambient temperature range, the thermal resistance of the mounting surface, and the temperature limitations of the adjacent materials (such as glass epoxy). The Thermal Resistance (film to case) is 5.00°C/W. For additional technical information refer to the Applications Note at www.caddock.com. Power dissipation is 2.5 watts, at an ambient temperature of 25°C, when mounted on a standard pcb (ex. FR-4 or G-10) with double sided copper board (2 ounce) 1 inch X 1 inch X .063 inch (thick).

Soldering Note: The case temperature of the MP725 should not exceed +219°C during reflow soldering or any other soldering process. See the applications note at www.caddock.com for more information.

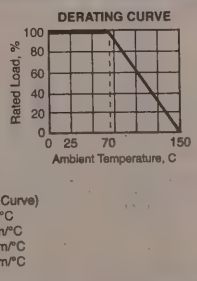
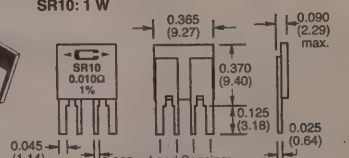
SR SERIES

Features:
- Non-Inductive Design.
- Kelvin (4 wire) Leads
- Excellent Long Term Stability
- Compact Footprint
- Values as low as 0.008 ohm ±1%

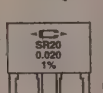
Specifications:
- Power Rating: SR10: 1 W at +70°C,
  SR20:2 Watts at +70°C (See Dearting Curve)
- Temp. Coeff. -15°C to +105°C, ref. +25°C
  0.10 ohm to 1.00 ohm: -50 to +100 ppm/°C
  0.025 ohm to 0.075 ohm: 0 to +150 ppm/°C
  0.008 ohm to 0.020 ohm: 0 to +200 ppm/°C

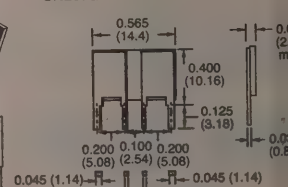


SR10: 1 W



SR20: 2 Watt





Model: SR10

For quantities of 100 and up, call for quote.

OHMITE 5% SMD Wirewound Power Resistors - 1, 1.5, 2 and 3.5 W

OHMITE.

W SERIES

se low value surface mount power resistors are ideal for current sensing applications and reduce amount of space required by traditional power resistors. They offer higher power levels than ventional chip resistors. The body is molded with UL94V0 material rated at 205°C continuous. ible J-bend terminations reduce solder joint breakage due to thermal expansion and vibration.

ecifications:
olerance: 5%
ielectric strength: 1000V
exible J-bend terminations
mperature Coefficient: ±90ppm/°C

OHMITE TAH20P SERIES 20 WATT - TO220 STYLE

Features:
- High pulse tolerant design
- Non-Inductive design
- Resistor package is electrically isolated from heat sink
- Ready for use with snap-on style heat sinks

Specifications:
- Resistance tolerance: 5%
- Maximum operating voltage: 350V
- Dielectric strength: 1800VAC
- Power rating: 20W @ 25°C
- Operating temperature range: -55°C to +175°C

Applications:
- Frequency conversion
- High Frequency balancing
- Snubbers

OHMITE TBH25P SERIES 25 WATT - TO220 STYLE

Features:
- Non-Inductive design
- Low Thermal Resistance
- Economically priced
- Designed for applications that require immediate heat sinkable power.

Specifications:
- Resistance tolerance: 5%
- Maximum operating voltage: 350V
- Dielectric strength: 1000VDC
- Power rating: 25W @ 25°C
- Operating temperature range: -55°C to +150°C

Applications:
- Power supplies
- Industrial Controls
- Automotive Steering
- Snubber/Bleeder
- Pre-Load/Damping

OHMITE TCH35P SERIES 35 WATT - TO220 STYLE

Features:
- Non-Inductive design
- Single screw mounting simplifies heat sink attachment
- Resistance element is electrically insulated from metal heat sink mounting tab

Specifications:
- Resistance tolerance: 5%
- Maximum operating voltage: 350V
- Dielectric strength: 1800VAC
- Power rating: 35W @ 25°C
- Operating temperature range: -55°C to +150°C

Applications:
- Switching power supplies
- Snubbers
- High frequency
- Voltage regulation
- Low energy pulse loading

OHMITE TDH35P SERIES 35 WATT - TO220 STYLE

Features:
- TO220 style package configuration for surface mounting applications
- Molded case for environmental protection
- Resistor element is electrically insulated from the metal heat sink tab

Specifications:
- Resistance tolerance: 5%
- Maximum operating voltage: 350V
- Dielectric strength: 1800VAC
- Power rating: 35W @ 25°C
- Operating temperature range: -55°C to +150°C
- Derating(thermal resistance): 0.23W/°K(4.28°K/W)

Applications:
- Switching power supplies
- Snubbers
- High frequency
- Voltage regulation
- Low energy pulse loading

HMITE 10% Ceramic Composition Resistors - 1 and 2 Watt

OHMITE.

/OY SERIES

OX/OY Series of fixed ceramic resistors are ideal for circuitry associated with surges, high peak power, or high energy. They offer enhanced performance in high-voltage power supplies, R-C snubber circuits, and inrush limiters. The Y resistors can often replace carbon composition resistors which can be difficult to source. They can often replace carbon composition resistors which can be difficult to source.

URES:
- places 1 and 2 watt carbon composition resistors
- ets high energy density demands
- h peak power

cifications:
- wer Rating: Based on 70°C free air rating
- sistance tolerance: ±10%
- mp. coefficient: -1300 ±300ppm/°C

Materials:
- Terminals: Solder-coated axial leads
- Coating: UL-94 V0 approved silicone
- Derating: Linear from 100% @ +70°C to 0% @ +200°C

✻ Available in OY series only

HMITE 5% High Energy Wire Wound Resistors - 3, 5 and 10 Watt

OHMITE.

SERIES HIGH ENERGY WIREWOUND RESISTORS

e Manufacturing's family of High Energy Wirewound Resistors employ special winding techniques to maximize the e joule rating of each resistor. Ohmite High Energy Wirewounds are hand wound in order to maintain the tightest le pitch (space between windings) and thereby maximize the mass of the resistive element

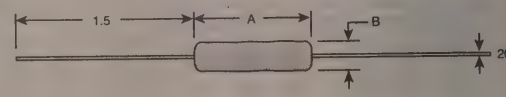
OHMITE 5% Vitreous Enamel Molded Wirewound - 3 1/4, 5, and 11 Watt

90 SERIES

Features:
- Molded construction provides consistent shape and size (permits mounting in clips which extends power rating)
- Flame resistant lead free vitreous enamel coating
- All welded construction
- Ready for use with snap-on style heat sinks

Specifications:
- Resistance tolerance: 5%
- Overload:
  3 and 5 watts: 5 times rated wattage for 5 seconds
  11 watts: 10 times rated wattage for 5 seconds
- Dielectric withstanding voltage: 1000 VAC



For quantities of 1000 and up, call for quote.

RESISTOR MOUNTING CLIPS

Features:
- Prevents severe vibration or mechanical shock to resistor
- Increase resistor wattage up to 100% when mounted on a metal surface
- Holes in clip base permit fastening to chassis with machine screws, eyelets or rivets

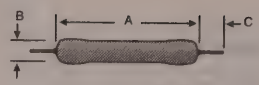
OHMITE 1% Metal Oxide Axial High Voltage Resistors

NI-MOX SERIES

tures:
ide resistance ranges
ilicone or epoxy coating
etal oxide resistive element
orks well in precision circuits

Specifications:
- Resistance Tolerance: 1%
- Voltage Rating: 1KV to 5KV
- Power Rating: .5W to 1W @ 25°C
- Operating Temperature Range: -55°C to +220°C

Applications:
- Avionics
- Medical electronics
- High gain feedback applications
- Current pulse limiters
- Vacuum and space application



For quantities of 500 and up, call for quote.

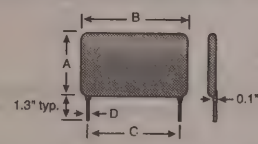
OHMITE 1% Metal Oxide Planar Resistors 1/2 Watt - 2.5 Watt

IM-MOX SERIES

ures:
h dielectric and low out gassing epoxy coating
r resistor noise
n inductive

Specifications:
- Resistance Tolerance: 1%
- Voltage Rating: 1KV to 20KV
- Power Rating Range: .5W to 2.5 watts @ 25°C
- Operating Temperature Range: -55°C to +110°C

Applications:
- High Voltage Power Supplies
- Medical Instrumentation
- Current pulse limiters
- Ionization Chambers



For quantities of 500 and up, call for quote.

OHMITE 5% Vitreous Enamel Resistors - 30, 40, and 55 Watt

250 SERIES STACKOHM

These oval-shaped ceramic core Stackohm resistors feature a low profile to permit installation in spaces with minimal height. They are also equipped with integral mounting brackets so they can be fastened to a chassis and stacked in locations with limited surface area. When properly fastened, the mounting brackets add a heat sinking benefit resulting in a smaller size per watt.

Features:

- Small size to power ratio
- Low profile and stackable
- Integral mounting bracket conducts heat to mounting surface
- All welded construction

Specifications:

- Tolerance: 5%
- Overload: 5 times rated wattage for 5 seconds
- Temperature Coefficient:
  1 to 20 Ω: ±400 ppm/°C
  Over 20Ω: ±260 ppm/°C
- Dielectric withstanding voltage: 1000 VAC

OHMITE Fixed and Adjustable Power Resistors - 300 Watt

280 SERIES CORRIB VITREOUS ENAMEL

Corrib resistors are ideal for applications involving high currents at very low resistance values. These large, heavy-duty resistors are designed to withstand frequent start-stop cycles characteristic of motor starting, dynamic braking, and other similar applications.

Features:

- Ribbed Construction aids in rapid cooling
- Designed for equipment requiring low resistance loads at low ohmic values and high current capacity
- Hollow-cored for secure attachment to chassis using thru bolts and brackets

Specifications:

- Tolerance: 10%
- Temperature Coefficient: ± 400 ppm/°C
- Dielectric withstanding Voltage: 1000VAC
- Overload: 10 time rated wattage for 5 seconds

OHMITE Aluminum Housed Wirewound Resistors - 160 to 330 Watt

OHMITE WFH SERIES

Using Ohmite's flat-core winding technology, WFH wirewound resistors are housed in flat aluminum extrusions that support attachment of a heat sink. Allowing close mounting of heat-sensitive components to save pc-board space, the devices offer superior thermal-transfer characteristics compared with standard aluminum-housed wirewounds

Features:
- Solder, Cable and "Fast-On" Termination
- More resistors in one profile possible

Specifications:
- Power Rating: 12-300W
- Temperature Coefficient: normal 50ppm - 150ppm
- Working Voltage: 1200VAC
- Insulation: Silicone Rubber & Mica

OHMITE Heat Sinkable Planar Resistors - 600 Watt and 1000 Watt

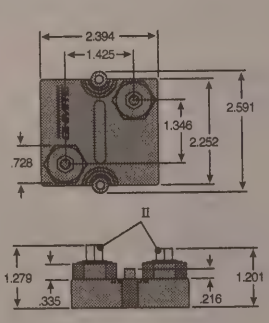
TAP 600 SERIES

The TAP600 series delivers 600 watts of reliable power to a variety of power conditioning, power transmission and power control applications. The TAP600 are designed for use in liquid, or air cooled heat sink systems used in variable speed drives, power supplies, robotics, motor control and control devices.

Features:
- Dielectric Strength: Up to 12KV
- Special design for low inductive and capacitance values
- Easy termination to contacts with M5 screws

Specifications:
- Tolerance: 10%
- Maximum Working Voltage: 5000VDC
- Operating temperaturea range: -55°C to +150°C
- Power rating: 600 watt@ 70°C (heat sink temp.)
- Temperature Coefficient: ± 150 PPM/°C
- Thermal Resistance: 8.73W/°C (0.115°C/W)

DIMENSIONS (IN)



For quantities of 100 and up, call for quote.

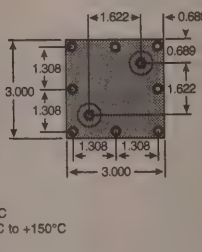
TAP 1000 SERIES

The TAP1000 series delivers 1000 watts of continuous power with thick film on alumina substrate technology to 30% smaller, the TAP1000 is capable of 2 to 4 times the power dissipation of traditional heat sinkable resis technologies. Designed for use with liquid cooled heat sinks, TAP1000 resistors are capable of dissipating 10 watts of continuous power when properly mounted. Offering the highest power available in a heat sinkable package, the TAP1000 is well suited for power conditioning, power distribution, and power control application

DIMENSIONS (IN)



- Dissipates 1000 Watts@70°C
- High Energy Rating
- Low Inductance
- Resistor element electrically isolated
- High Dielectric strength (6KV)
- Small footprint
- Tolerance: 10%
- Maximum Working Voltage: 2000VDC
- Operating temperaturea range: -55°C to +150°C
- Power rating: 1000 watt@ 70°C
- Temperature Coefficient: ± 250 PPM/°C
- Thermal Resistance: 0.05°C/Watt

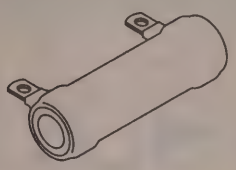
SHAY / DALE 5% Wirewound Resistors - 25, 50, 100 and 225 Watt

SERIES SILICONE

rical Specifications:
stance tolerance: ±5%
perature coefficient:
PPM/°C, 1Ω to 9.9Ω
PPM/°C, 10Ω and above

rial Specifications:
: Steatite. Chemically inert,
withstand severe thermal
k and is impervious to
ture



Applications:
Inexpensive dissipation of larger amounts of power in DC or low frequency AC circuits. Special applications include grid resistors, voltage dropping resistors, high bleeder resistor in power supplies, bias supply resistors, voltage divider networks, filament dropping resistors, load resistors, and shunt resistors.

Adjustable types, styles, tapped, non-inductive, additional ohm values, wattages, tolerances and lead styles available. Call any Mouser Service Representative

VISHAY Angstrohm Power Rheostats - 12.5 Watt to 300 Watt

y Angstrohm's broad line of power rheostats is designed to provide exceptional reliability through the application of modern manufacturing techniques and the use of sophisticated materials. The base and ring, which provide the tat foundation, is molded of high density ceramic. The most modern toroidal winding machines are used to assure a uniform wind. Resolution and power dissipation are maintained at a maximum through proper selection of wire The insulator is molded of high density, porcelain/ ceramic. Ceramic cement provides the "bonding medium" necessary to securely attach the ring and base together and to lock the windings from shifting. The locating tab provides tat indexing and a "non-turn" feature. 6o'clock is standard on all models with the terminals down. The three terminals permit use as a potentiometer or rheostat.

6539 SERIES/CONDUCTIVE PLASTIC/PRECISI

- Essentially infinite resolution
- Excellent rotational life
- Servo mount

Specifications:
- Resistance tolerance: ±15%
- Power rating: 1.0W
- Mechanical angle: continuous

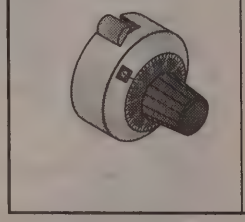
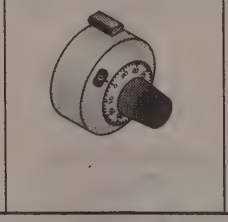
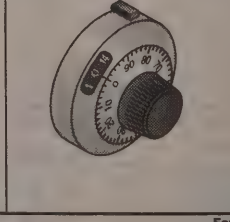
TURNS-COUNTING DIALS

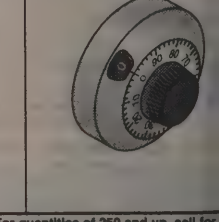
Applications:
- H-46:
  - Power supplies
  - Sensors
  - Medical
  - Automation
  - Test equipment
- H-550:
  - Automation equipment
  - Test instrument
  - Industrial machinery
  - Medical instrumentation excluding critical life support applications
  - Test Equipment

Specifications:
- Mount directly to potentiometer shaft
- No backlash
- Excellent readability
- Locking brake









For quantities of 250 and up, call for

VISHAY / SPECTROL Precision Potentiometers

MODEL 830 THREE TURN WIREWOUND

Electrical Specifications:
- Tolerance: ±3%, 200Ω ≤ Rt ≤ 150KΩ
- Power rating: 3W @ 40°C derating to 0W @ 125°C
- Electrical travel: 1,080°+4°-0°

Physical Specifications:
- Temperature: -55°C to +125°C
- Rotational Life: 500,000 shaft revolutions
- Ganging: 2 sections max.
- 3 turn 3 watts

ALPS 9MM SNAP-IN INSULATED SHAFT POTENTIOMETERS

Features:

- Thanks to its structure eliminating openings, the dust proofing capacity and flux resistance have been improved
- 9.8mm outline size is ideal for high-density set design.

Applications:

Suitable for various control applications with audio products, visual products, electronic musical instruments.

ALPS 12MM SNAP-IN INSULATED SHAFT POTENTIOMETERS

- Enhanced structural design has improved cross talk and gang error characteristics.
- R-shaped shaft end point prevents catching when inserting the knob.
- Solder bridges can hardly appear thanks to terminal configuration.

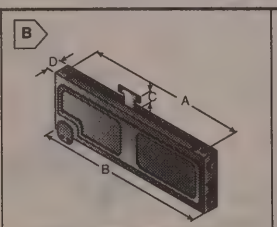
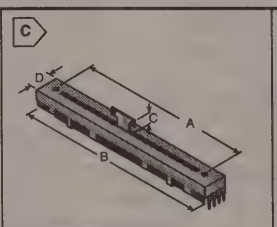
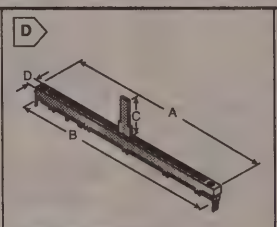
- Solderable with auto dipping.
- Available with a wide variety of detents.



- Suitable for Master volume control in high-grade audio equipment, fader for studio mixers, etc.



- Excellent operational feel by less lever wobble.
- Allows the maximum attenuation of 110dB.



- Soft, comfortable feel and improved operability.
- Allows maximum attenuation of 110dB.

Single-Turn Potentiometers

VISHAY / SPECTROL 148-149 SERIES 1/2" SQUARE SINGLE-TURN

General Specifications:
- Temperature: -20°C to +125°C
- PCB Pins
- Electrical travel: 265° ±5°

Cermet:
- Rational Life: 50,000
- Power rating: 1W @ 85°C, derating to 0W @ 150°C

Conductive Plastic:
- Rational Life: 100,000
- Power rating: 0.5W at 70°C, derating to 0W @ 125°C

VISHAY / SFERNICE KNOB POTENTIOMETERS, MODEL P16

Specifications:
- High dielectric strength: 2500VRMS
- P16 version: cermet
- PA16 version: conductive plastic
- Hermetically sealed and panel sealed
- Minimal clearance required
- Power rating: 1W @ +40°C
- Metallic or plastic knob options
- CECC 41300

PIHER 16MM CARBON SINGLE-TURN POTENTIOMETERS

PC16 Series

A completely insulated potentiometer. Made of autoextinguishable plastic UL94V-0. This modular design, which allows up to four potentiometers and a switch on a common shaft, is available in custom configurations by special order. Call any Mouser service representative for details.

Specifications:
- Tolerance: ±20%
- Nominal power (40°C): 0.25W
- Nominal voltage: 500V
- Temperature range: -25°C to +70°C
- Linear taper
- Mechanical angle of rotation: 300°±5°
- Electrical angle of rotation: 280°±20°
- Switch contact rating: 1A @ 250V
- Solder lug terminals

For quantities of 200 and up, call for quote.

BOURNS Lead Free Trimmer Potentiometers

Reliable Electronic Solutions

3364 SERIES 4MM SMD SINGLE TURN CERMET TRIMMING POTENTIOMETER, LEAD FREE

Features:
- SMD Single-Turn / Cermet / Industrial Open Frame
- Cross slot rotor designs suitable for automatic adjustment equipment
- Supplied in 12 mm embossed tape, compatible with automatic pick-and-place assembly equipment
- Recommended for reflow solder processing only
- Lead free terminals

Electrical Characteristics:
- Resistance Tolerance: ±25% std.
- Contact Resistance Variation: 5% max.
- Resolution: Infinite
- Adjustment Angle: 260°±20°

Enviromental Characteristics:
- Power Rating (50 VDC max.): 70 °C: 0.2 watt
- Temperature Range: -40 °C to +125 °C
- Temperature Coefficient: ±250 ppm/°C

LEAD-FREE

3306 SERIES 6MM ROUND SINGLE TURN CERMET TRIMMING POTENTIOMETER, LEAD FREE

Features:
- 6 mm Round / Single-Turn / Cermet Industrial / Open Frame
- Cross slot adjustment options
- Horizontal and vertical mounting styles
- Dust resistant/splash resistant covers
- PC board stand-offs and retention feature
- Front and top adjust styles
- Lead free terminals

Electrical Characteristics:
- Resistance Tolerance: ±30% std.
- Absolute Min Resistance: 1% max. (≤2K=30 ohms)
- Contact Resistance Variation: .3% max.
- Resolution: Essentially Infinite
- Adjustment Angle: 215° nom.

Enviromental Characteristics:
- Power Rating (100 Volts max.): 70 °C: 0.3 watt
- Temperature Range: -30 °C to +100 °C
- Temperature Coefficient: ±250 ppm/°C
- Load Life: 1000 hours 0.3 watt @ 70°C

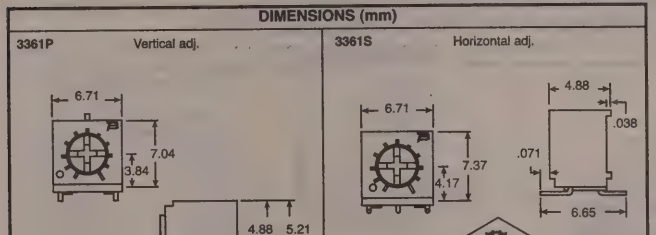
3361 SERIES 1/4" SQUARE/ CERMET/ SEALED

DIMENSIONS (mm)



Features:
- Surface mount / single turn / industrial / sealed
- Miniature package
- Rotor designed for automatic machine adjust interface
- Withstands harsh environments and immersion
- Compatible with surface mount manufacturing processes

Specification:
- Resistance tolerance: ±10% std. (tighter tolerance availiable)
- Power rating: (300 volts max.) 70°C - 0.50 watt; 125°C - 0 watt
- Temp. range: -55°C to +125°C
- Temp. coefficient: ±100ppm/°C
- Rotational life: 200 cycles

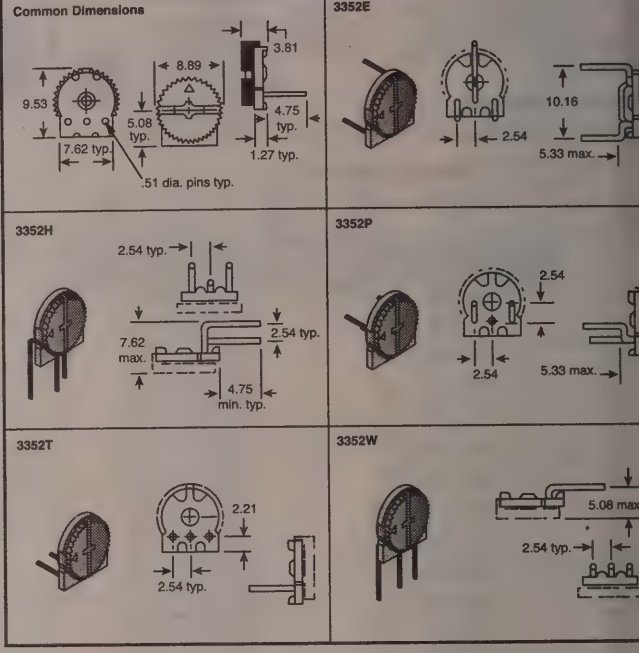
3352 SERIES 3/8" SINGLE TURN ROUND/ CERMET/OPEN FRAME/TRIMMER

DIMENSIONS (mm)



Features:
- Stable cermet element offers infinite resolution
- Very low profile
- Thumb and screwdriver adjustment

Specifications:
- Resistance tolerance: ±20% std.
- Power rating: 85°C - 0.25W; 125°C - 0W
- Temperature range: -55°C to +125°C
- Temperature coefficient: ±100ppm/°C 2K and up; ±150ppm/°C below 2K

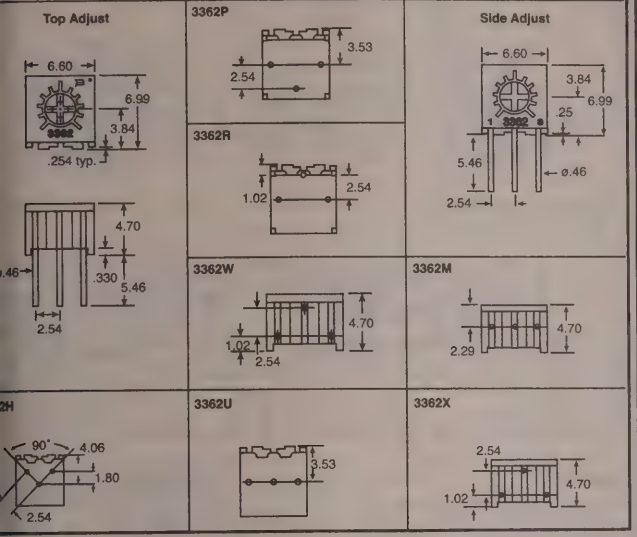
2 SERIES 1/4" SQUARE/ INDUSTRIAL/ SEALED

DIMENSIONS (mm)



ures:
- gle turn / cermet / industrial / sealed
- niature package
- tor designed for automatic machine
- ust interface
- thstands harsh environments and
- mersion cleaning processes
- ailable on tape and reel packaging

Specification:
- Resistance tolerance: ±10% std. (tighter tolerance available)
- Power rating: (300 volts max.) 70°C - 0.50 watt; 125°C - 0 watt
- Temperature range: -55°C to +125°C
- Temperature coefficient: ±100ppm/°C
- Rotational life: 200 cycles
- Seal test: 85°C fluorinert
- Marking: resistance code, terminal numbers, manufacturer's model number, style, and date code.

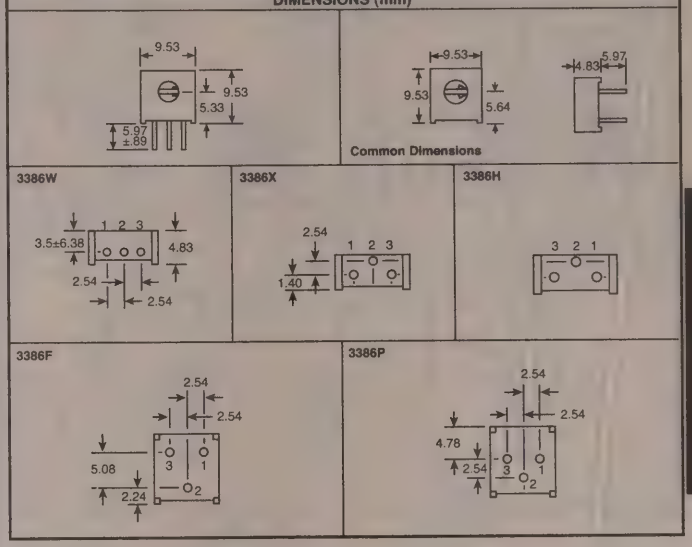
3386 SERIES 3/8" SQUARE/ INDUSTRIAL/ SEALED

DIMENSIONS (mm)



Features:
- Single turn / cermet / industrial / sealed
- Available on tape and reel
- Available with a knob for finger adjust
- Available with extended shaft
- Available with cross-slot rotor
- Top and side adjust types (F, P, H, W, X, most popular)

Specifications:
- Resistance tolerance: ±10% std. (tighter tolerance available)
- Absolute minimum resistance: 2 Ω max.
- Power rating: (300 volts max.) 85°C - 0.5 watt; 125°C - 0 watt
- Temperature range: -55°C to +125°C
- Temperature coefficient: ±100ppm/°C
- Rotational life: 200 cycles

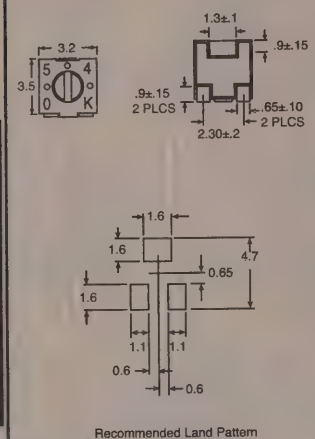
BOURNS Single-Turn Trimmer Potentiometers

3313 SERIES 3MM SQUARE/ CERMET/ SEALED

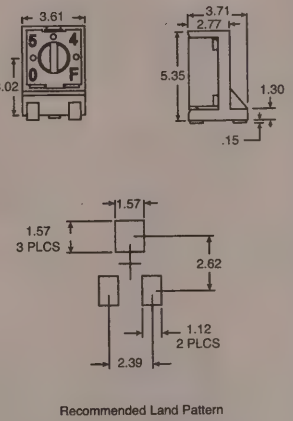
DIMENSIONS (mm)

3313J Vertical adj.



Recommended Land Pattern

3313S Horizontal adj.



Recommended Land Pattern

Features:
- Surface Mount 3 mm Square Single-Turn Cermet / Sealed
- Compatible with surface mount manufacturing processes
- Rotor stop for "in-circuit" adjustment
- 100 cycle rotational and seal life
- Patent #5043695 assembly for sealintegrity
- Plastic housing for RF applications

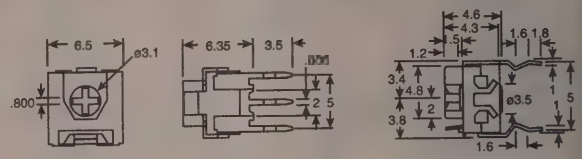
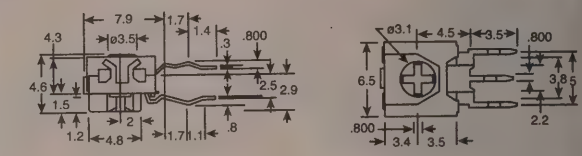
3318 SERIES 6MM TRIMMER CARBON POTENTIOMETERS

DIMENSIONS (mm)

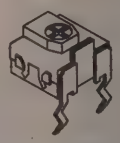
3318P



3318S



Features:
- Single-turn/carbon/commercial open frame
- Cross slot rotor design suitable for automatic adjustment equipment
- Adjustable front / back, top/bottom
- Board retention features
- PC board stand-offs
- Enclosed cover



Specifications:
- Resistance tolerance: ±20%
- Contact resistance variation: 10% max.
- Resolution: infinite
- Adjustment angle: 210° ± 15
- Power rating: 0.1 watt
- Temperature range: -10° C to 70° C
- Temperature coefficient: ±1,000 PPM/° C
- Load life: 240 hours @ 50° C (+20/-5 %ΔTR)
- Torque (operating): 20~250 gf-cm
- Stop Strength:
  Knob side: 800 gf-cm
  Reverse side: 350 gf-cm
- Terminals: Solderable pins
- Marking: resistance code
- Standard packaging:
  500 pcs. per bag

3314 SERIES 4MM SQUARE/ SMD/ CERMET/ SEALED

Features:
- Surface mount / single turn / industrial / sealed
- Compatible with surface mount manufacturing processes.
- Compatible with popular vacuum pick-and-place equipment.

Specifications:
- Resistance tolerance: ±20% std.
- Temp. range: -55°C to +125°C
- Temp. coefficient: ±100ppm/°C
- Mechanical angle: 240° nominal
- Torque: 180g-cm typical
- Stop strength: 300g-cm typical
- Marking: manufacturer's code, resistance code, and date code
- Wiper: positioned at 50% nominal

PIHER 6MM CARBON TRIMMER

DIMENSIONS (mm)

Features:
- Carbon resistive element
- Dust proof enclosure
- Polyester substrate
- Also upon request:
  - Wiper positioned at 50% or fully clockwise
  - Supplied in magazines for automatic insertion
  - Long life model PT-6...E (10,000 cycles)
  - Without crimping model. PT-6...SC
  - Housing available in self extinguishable plastic (VL94V0)

Specifications:
- Power rating: 0.1W
- Linear taper
- Temperature range: -25°C to +70°C
- Mechanical rotation: 235°±10°
- Electrical rotation: 200°±20°
- Tolerance: ±20%

For quantities of 5,000 and up, call for quote.

PIHER 6MM CARBON POTENTIOMETER

ifications:
- chanical Rotation Angle: 280° ± 10°
- rque: 0.2 to 3 Ncm. (0.28 to 4.2 in-oz)
- erance: 100Ω ≤ Rn ≤ 1MΩ ±30
- minal Power: 50°C (122°F): 0.1W
- erating Temperature: -25°C +70°C (-13°F +158°F)
- Electrical Rotation Angle: 245° ± 25°
- Stop Torque: >7.5 Ncm. (10.5 in-oz)
- Max. Voltage: 100 VDC
- Taper: linear
- Equivalent noise resistance: ≤ 5%
- End Resistance: ≤ 2% Rn (10Ω min.)

Features:
- Carbon resistive element
- Polyester substrate
- Over-moulding manufacturing technique
- SMD or through hole
- Embossed tape (for SMD), Tape on reel, Ammopack and Magazine packaging for automatic insertion and bulk for manual assembly
- Wiper positioned at 50%
- Both sides cross slot easy adjustment
- Accidental rotor movement protected
- Traceability insured through date code marking
- Assembly method: Stand up, Lay down

For quantities of 5,000 and up, call for quote.

PIHER 10MM CERMET TRIMMERS

Specifications:
- Power rating: 0.33W
- Temperature range: -40°C to +90°C
- Mechanical rotation: 235°±5°
- Electrical rotation: 220°±20°
- Linear taper
- Tolerance: ±20%

Features:
- Cermet resistive element
- Dust proof enclosure
- Plastic material according to UL94V-0
- Alumina substrate

Available upon Request:
- Wiper positioned at 50% or fully clockwise
- Supplied in magazines for automatic insertion
- Long life model for low cost control potentiometers applications
- Self extinguishable plastic UL 94V-0
- Cut track option
- Special Tapers
- Mechanical detents
- Low and extra low torque verions
- Special switch option

DIMENSIONS (

PIHER 15MM CERMET TRIMMERS

Specifications:
- Mechanical Rotation Angle: 265° ± 5°
- Electrical Rotation Angle: 250° ± 20°
- Torque: 0.5 to 2.5 Ncm. (0.7 to 3.4 in-oz)
- Stop Torque: > 10 Ncm. (>14 in-oz)
- Tolerance: 100Ω < Rn < 1M Ω = ±20
- Max. Voltage:250 VDC (lin) 125 VDC (no lin)
- Nominal Power: 70°C (158°F) 0.50W (lin) 0.25W (no lin)
- Taper: Linear
- Residual Resistance: ≤5.10 Rn (2Ω min.)
- Equivalent Noise Resistance: ≤ 3% Rn (3 Ω min.)
- Operating Temperature: -40°C + 90°C (-40°F + 194°F)

Features:
- Cermet Resistive Element
- Dust Proof Enclosure
- Plastic Material According to UL94V-0
- Alumina Substrate

Available upon Request:
- Wiper positioned at 50% or fully clockwise
- Long life model for low cost control pot. applications
- Supplied in magazines for automatic insertion
- Low Torque option
- Available as SPDT switch
- Special tapers
- Mechanical detents

For quantities of 500 and up, call for quote.

SHAY / SFERNICE 3MM SINGLE TURN SMD, SQUARE, EALED, CERMET TRIMMERS

cifications:
lerance: ±20%
perating temperature range: -55°C to +125°C
otational life: 100 cycles

- Power rating: .125W @ 70°C, 0W @ 125°C
- Temperature Coefficient: ≤100 ohm ± 150ppm/°C, >100 ohms ± 100ppm/°C

atures:
ompatible with surface mount manufacturing rocesses
00 cycle rotational and seal life

VISHAY / SPECTROL 3/8" SINGLE-TURN CERMET TRIMMERS WITH KNOBS

Specifications:
Tolerance: ±10%
Coefficient of resistance: ±100ppm/°C
Rating: 0.5 W @ 70°C, derated linearly to 0 W @125°C

- Contact resistance variation: 2% or 2Ω, whichever is greater
- Electrical travel: 270°

Features:
Sealed for cleaning in common solvents
Easy adjustment and stability

BOURNS Multi-Turn Cermet Trimmer Potentiometers

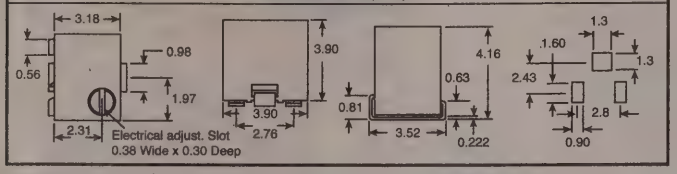
BOURNS® Reliable Electronic Solut

3223 SERIES 3MM SMD TRIMMING POTENTIOMETER

DIMENSIONS (mm)



Features:

- Surface Mount 3 mm Square / Multiturn / Cermet / Industrial / Sealed
- Sealed to withstand board wash processing
- Pick and place centering design for automated placement compatibility
- Flush adjustment screw
- Meets EIA/ EIAJ/IPC/VECI SMD standard trimmer footprint
- Top Adjust

Specifications:

- Resistance tolerance: ±20% std.
- Power rating: 85°C - 0.25W; 150°C - 0W
- Temperature range: -65°C to +150°C
- Temperature coefficient: ±100ppm/°C
- Humidity: MIL-STD-202 Method 106, TRS ±3%; IR 10 MΩ

LEAD-FREE

VISHAY Multi-Turn Trimmers

VISHAY / SFERNICE 4MM MULTI-TURN SMD, SQUARE, CERMET TRIMMERS

Features:
- Sealed to withstand board wash processing
- Pick and place centering design
- 4mm design meets EIA SMD standard trimmer footprint
- Top and side adjust styles
- Temperature coefficient: ±100ppm/°C

Specifications:
- Tolerance: ±10%
- Oper. temp. range: -65°C to +150°C
- Rotation cycling: 200 cycles
- Power rating: .25W @ +85°C
- Temperature coefficient: ±100ppm/°C

VISHAY / SPECTROL MODEL 64 3/8" 25-TURN CERMET TRIMMERS

Specifications:
- Tolerance: ±10%
- Coefficient of resistance: ±100ppm/°C
- Rating: 0.5 W @ 70°C, derated linearly to 0W @ 125°C
- Contact resistance variation: 2% or 2Ω, whichever is greater
- 25 turns nominal

Features:
- Sealed for cleaning in common solvents
- Easy adjustment and stability

VISHAY / SPECTROL MODEL 43P 3/4" 20 TURN CERMET TRIMMERS

Specifications:
- Coefficient of resistance: ±100ppm/°C
- Rating: 0.5W @ 70°C, derated linearly to 0W @ 125°C
- Maximum voltage: ≤ 400V
- Temperature range: -55°C to + 125°C
- Contact resistance variation: 3% or 3Ω, whichever is greater

Features:
- Unique "T" slider block design
- Easy adjustment and stability

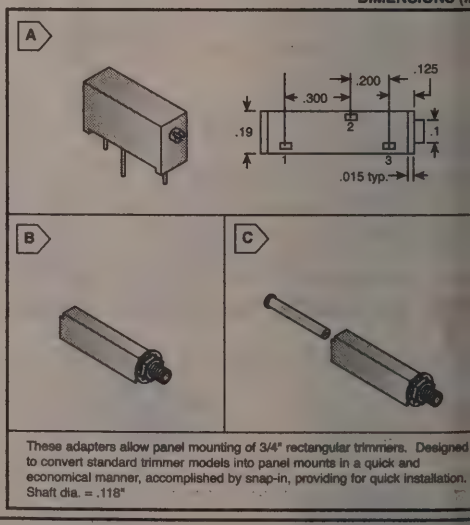
DIMENSIONS (I



These adapters allow panel mounting of 3/4" rectangular trimmers. Designed to convert standard trimmer models into panel mounts in a quick and economical manner, accomplished by snap-in, providing for quick installation. Shaft dia. = .118"

VISHAY / SPECTROL TRIMMER ADJUSTMENT TOOL

Features:
- Extended as well as recessed blade for critical adjustments
- Designed to adjust trimmer potentiometers of all sizes
- Made of glass filled nylon with corrosion resistant stainless steel blades

DIMENSIONS (mm)

'S SERIES 85°C ALUMINUM ELECTROLYTICS

tures:
et value for filter and bypass applications not requiring wide temperature or high ripple current
'S series offers significant cost savings over tantalum capacitors
rtical case style make automatic mounting and reflow soldering easy

Specifications:
- Capacitance tolerance: ± 20%
- Temperature range: -40°C to +85°C
- Load life: 2000 hours @ 85°C
- Capacitance range: 0.1μF to 1000μF
- Voltage range: 10VDC to 100VDC

For quantities of 1000 and up, call for quote.

FK SERIES 105°C ALUMINUM ELECTROLYTIC, LOW ESR, SMD

tures:
to a 5000 hour load life capability
fers lowest ESR and long life for filtering, passing, and power supply decoupling
- With the low impedance performance approaching low ESR tantalum capacitors offers a signifigant cost savings compared to tantalum capacitors
- Vertical case style make automatic mounting and reflow soldering easy

Specifications:
- Capacitance tolerance: ± 20%
- Temperature range: -55°C to +105°C
- Capacitance range: 3.3uF to 6800uF
- Voltage range: 6.3VDC to 100VDC
- Load life: 2000 hours @ +105°C (4.0-10mm dia)
  5000 hours @ +105°C (12.5-18mm dia)

For quantities of 500 and up, call for quote.

Aluminum Electrolytic Capacitors

CDE CORNELL DUBILIER ALUMINUM ELECTROLYTIC, 105°, HIGH VOLTAGE, LOW IMPEDANCE

AEB Series

Cross Reference			
CDE	NIC	Tecate	Panasonic
AEB	NACVF	MXLH	EEV-EB
AFK	NACK	MXZZ	EEV-FK
AVS	NACE	MXM	ECE-V

Features:

- High voltage applications include input bus capacitors in board mounted miniature AC/DC power supplies
- Ideal for power supply input and other high voltage applications due to low impedance ratings up to 450 VDC
- Vertical case style make automatic mounting and reflow soldering easy
- Long life
- Low Impedance

Specifications:

- Capacitance tolerance: ± 20%
- Temperature range: -20° C to +105° C
- Capacitance range: 2.2uF to 100uF
- Voltage range: 160VDC to 450VDC
- Load life: 3000 hours @ +105° C J Case
  4000 hours @ +105° C K Case
  5000 hours @ +105° C L-S Cases

luminum and Polymer Aluminum Electrolytic Capacitors

CDE CORNELL DUBILIER

CORNELL DUBILIER FLATPACK® LONG LIFE ALUMINUM ELECTROLYTIC CAPACITORS

MLP Flatpack® series unique flat design increases available board space by 27% compared to standard round acitors. The broad, flat sides make heat-sinking simple and effective, and the box shape encourages efficient ding. High-purity material assure extremely long life, and for values rated at 250V and less exhibit superior -temperature impedance down to -55°C.

itures:
ow profile replacement for snap-in capacitors
:an readily heat sink to double the ripple capability
leer-hermetic welded seal assures 50-year life

Type MLP:
- Military
- Telecom
- Computer power supply modules
- Circuit cards

ecifications:
leight: < 1/2"
Capacitance: 220-20,000µF
Voltage: 25-450VDC
Operates: -55°C to 85°C for 250V, -40°C to 85°C for >250V
,000-Hour life test: 85°C
ype MLP delivers 25 joules of energy storage in a 1/2" height
ith 50 years life @ +45°C

CORNELL DUBILIER ESRE AND ESRD SERIES LOW ESR SMD SOLID POLYMER ALUMINUM CAPACITORS

d polymer aluminum capacitors combine the high capacitance capability of an electrolytic component with the high frequency ormance of film capacitors. When the need for low impedance at high frequency is critical for your design, one SPA chip is able of replacing several liquid electrolyte aluminum or tantalum capacitors connected in parallel.

el for bypassing high frequency noise, and for switching frequency filtering in DC/DC conversion.

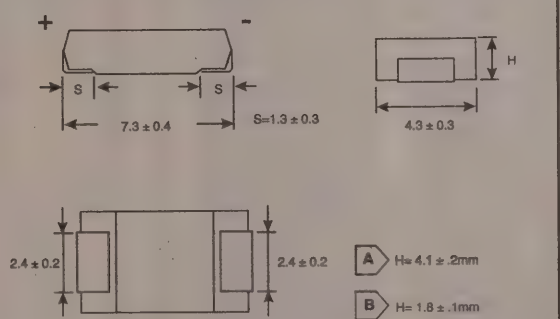
e solid electrolyte delivers a typical expected operating life of more than 50 years.

ecifications:
perating temperature range: -55°C to +105°C
urge voltage: 125% of rated voltage
apacitance tolerance: ±20% @ 120Hz and +20°C
C leakage current: ≤4V; to I ≤ .06CV (µA)
>4V; to I ≤ .04CV (µA) or 3µA

Applications:
- Motherboard By-Pass
- Switching supply input/output filters
- Power supply decoupling
- High frequency noise reduction
- Laptop LCD displays
- Automotive digital equipment
- Portable electronic equipment

itures:
ltra low E.S.R.
igh ripple current rating - up to 3.0 Amps
ltra stable - no change in imp. & e.s.r. from -55°C to +105°C
educed parts count - replaces three or more tantalum caps
herently more reliable, and ignition free

DIMENSIONS (mm)



Reel quantities start at 2000 pcs for ESRE and 3500pcs for ESRD.

KEMET 125°C Low ESR Aluminum Organic Capacitors - AO-CAP

KEMET

KEMET enters the world of aluminum capacitors with the introduction of the AO-CAP, designated the A700 Series, which has been targeted for power management applications. With aluminum as the anode material, aluminum oxide as the dielectric, and a conductive polymer to replace the wet electrolytic historically used in aluminum capacitors, KEMET has advanced beyond existing aluminum organic capacitors. The KEMET A700 Series AO-CAP is also an ideal alternative to high-capacitance ceramics. Its outstanding high frequency performance helps reduce component counts, cost-effectively saving board space.

The KEMET AO-CAP is totally free of lead with excellent surge current performance and long-term reliability. There is no recommended de-rating of application voltage to reduce failure rate. The operating temperature is -55°C to +125

The KEMET AO-CAP is offered in the same EIA industry standard case sizes and packaging formats as KEMET's tantalum surface-mount capacitor lines.

Features:

- Extremely low ESR
- High capacitance retention for superior performance at high operating frequencies
- Non-ignition Failure Mode
- No "dry-out" or "wear-out" related failure mechanism
- No voltage derating up to +125° C
- True Surface-mount capability
- Overall lower placement costs
- PB Free
- Self healing mechanism
- MSL3 Packaging

Other ESR Ratings Available

chicon UWT 105°C SMD SERIES (LEAD FREE)

cifications:

- erating temperature range: -55 ~ +105° C
- ltage range: 4 ~ 50V
- pacitance range: 0.1~ 1500μF
- pacitance tolerance: ± 20% at 120Hz/ 20°C
- Leakage current: After 2 minutes application of rated voltage, leakage current is not more than 0.01CV or (3μA), whichever is greater.
- Endurance: 1000 hours @ 105°C

lication note:

igher voltage capacitor may be used in a er voltage application.

LEAD-FREE

Available in Tape & Reel

For quantities of 500 and up, call for quote.

chicon UUD 105°C LOW IMPEDANCE SMD SERIES (LEAD FREE)

cifications:

- erating temperature range: -55 ~ +105° C
- ltage range: 6.3 ~ 50V
- pacitance range: 0.1~ 1500μF
- idurance: 5000 hours (2000 6-3A) @ 105°C
- Capacitance tolerance: ± 20% at 120Hz/ 20°C
- Leakage current: After 2 minutes application of rated voltage, leakage current is not more than 0.01CV or (3μA), whichever is greater.

lication note:

igher voltage capacitor may be used in a lower voltage application.

LEAD-FREE

Available in Tape & Reel

nichicon UWX 85°C SMD GENERAL PURPOSE SERIES (LEAD FREE)

Specifications:

- Operating Temperature Range: -40°C ~ +85°C
- Voltage Range: UWP: 4V ~ 50V
- Capacitance Range: 0.1 ~ 330µF
- Capacitance Tolerance: ±20% @ 120Hz, 20°C
- Leakage current: After 2 minutes application of rated voltage, leakage current is not more than 0.01CV or 3µA, which ever is greater.

Endurance:

- 2000 hours @ 85°C

Features:

- Designed for surface mounting on a high density PC board
- SMD type with 5.5mm height

Application Note:

- A higher voltage capacitor may be used in a lower voltage application.

LEAD-FREE

nichicon UWP 85°C BI-POLAR SMD SERIES (LEAD FREE)

Specifications:

- Operating Temperature Range: -40°C ~ +85°C
- Voltage Range: UWP: 6.3V ~ 50V
- Capacitance Range: 0.1 ~ 330µF
- Capacitance Tolerance: ±20% @ 120Hz, 20°C
- Leakage current: After 2 minutes application of rated voltage, leakage current is not more than 0.05CV or 10µA, which ever is greater.

Endurance:

- 1000 hours @ 85°C with polarity inverted every 250 hours.

Features:

- Designed for surface mounting on a high density PC board
- SMD type with 5.5mm height

Application Note:

- A higher voltage capacitor may be used in a lower voltage application.

LEAD-FREE

chicon UWT 105°C SMD SERIES

cifications:

- erating temperature range: -55 ~ +105° C
- ltage range : 4 ~ 50V
- pacitance range: 0.1~ 1500μF
- pacitance tolerance: ± 20% at 120Hz/ 20°C

d Life:

1000 hours application of rated voltage at C, capacitors meet the characteristics l at right.

- Leakage current: After 2 minutes application of rated voltage, leakage current is not more than 0.01CV or (3μA), whichever is greater.

Capacitance change	Within ± 25% of initial value for capacitors of ø3mm unit, and 16V or less Within ± 20% of intial value for capacitors of 25V or more.
tan δ	200% or less of initial specified value
Leakage current	Initial specified value or less

llication note:

igher voltage capacitor may be used in a er voltage application.

Available in Tape & Reel

For quantities of 500 and up, call for quote.

chicon UUD 105°C LOW IMPEDANCE SMD SERIES

cifications:

- erating temperature range: -55 ~ +105° C
- ltage range : 6.3 ~ 50V
- pacitance range: 0.1~ 1500μF

d Life:

1000 hours, application of rated ge at 105°C, capacitors meet the teristics listed at right.

- Capacitance tolerance: ± 20% at 120Hz/ 20°C
- Leakage current: After 2 minutes application of rated voltage, leakage current is not more than 0.01CV or (3μA), whichever is greater.

Capacitance change	Within ± 25% of initial value
tan δ	200% or less of initial specified value
Leakage current	Initial specified value or less

lication note:

igher voltage capacitor may be used in a lower voltage application.

Available in Tape & Reel

For quantities of 500 and up, call for quote.

nichicon UWX 85°C SMD GENERAL PURPOSE SERIES

Specifications:

- Operating Temperature Range: -40°C ~ +85°C
- Voltage Range: UWP 4V ~ 50V
- Capacitance Range: 0.1 ~ 330µF
- Capacitance Tolerance: ±20% @ 120Hz, 20°C
- Leakage current: After 2 minutes application of rated voltage, leakage current is not more than 0.01CV or 3µA, which ever is greater.

Features:

- Designed for surface mounting on a high density PC board
- SMD type with 5.5mm height

Application Note:

- A higher voltage capacitor may be used in a lower voltage application.

Load Life:

After 2000 hours application of rated voltage at 85°C the capacitors meet the characteristics listed at right.

Capacitance change	Within ±20% of initial value (±25% for 4V)
tan δ	Initial specified value or less
Leakage current	Initial specified value or less

nichicon UWP 85°C BI-POLAR SMD SERIES

Specifications:

- Operating Temperature Range: -40°C ~ +85°C
- Voltage Range: UWP: 6.3V ~ 50V
- Capacitance Range: 0.1 ~ 330µF
- Capacitance Tolerance: ±20% @ 120Hz, 20°C
- Leakage current: After 2 minutes application of rated voltage, leakage current is not more than 0.05CV or 10µA, which ever is greater.

Features:

- Designed for surface mounting on a high density PC board
- SMD type with 5.5mm height

Application Note:

- A higher voltage capacitor may be used in a lower voltage application.

Load Life:

After 1000 hours application of rated voltage at 85°C with the polarity inverted every 250 hours, capacitors meet the characteristics listed at right.

Capacitance change	Within ±20% of initial value (±25% for 4V)
tan δ	200% or less of initial specified value
Leakage current	Initial specified value or less

MKA SERIES SMD CAPACITORS

LEAD-FREE

ecifications:

)perating Temperature Range: -40°C to +105°C
'oltage Range: 6.3 to 50VDC
:apacitance Range: 0.1 to 1,000uF
:apacitance Tolerance: +/- 20% at +20°C, 120Hz
lated Lifetime: 1000-2000 hours depending on case size
eakage Current: .01CV or 3μA,whichever is greater, after 2 minutes at +20°C

Features:

- Solvent proof
- Designed for lead free, high temperature reflow soldering

5°C SMD (Lead Free)

3 Volt

For quantities 2000 and up, call for quote.

MV/MVK SERIES SMD CAPACITORS

The MV and MVK series are the standard vertical chip capacitors designed for reflow soldering.
The maximum height for most of these capacitors is 5.5mm, making them ideal for use in low profile situations.

Specifications:

- Operating Temperature Range: -40°C to +85°C for MV Series, -40°C to +105°C for MVK Series
- Voltage Range: 4 to 63VDC for MV Series
- Voltage Range: 6.3 to 50VDC for MVK Series

Features:

- Capacitance Range: 0.1 to 1,000uF
- Capacitance Tolerance: +/- 20% at +20°C, 120Hz
- Rated Lifetime: 1000-2000 hours depending on case size

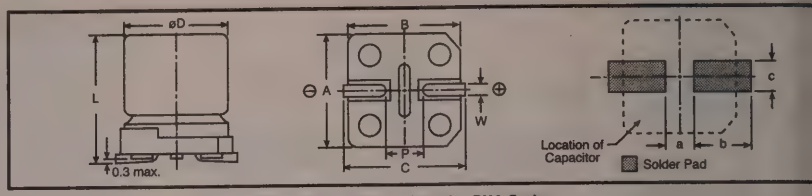
UNITED CHEMI-CON Polymer Aluminum Capacitors

UCC PXA 105°C SMD SOLID POLYMER ALUMINUM SERIES (LEAD FREE)

The PXA series are suitable for DC-DC converters, voltage and decoupling applications used in computer equipment.

Specifications:
- Operating Temperature : -55°C to +105°C
- Voltage Range: 6.3 to 25VDC
- Capacitance Range: 10 to 820uF
- Capacitance Tolerance: ± 20%
- Rated Lifetime: 2000 hours

Features:
- Solvent proof
- Designed for reflow soldering
- Ultra low ESR



LEAD-FREE

UCC PXC 105°C SMD SOLID POLYMER ALUMINUM SERIES, LOW ESR (LEAD FREE)

Specifications:
- Operating temperature : -55°C to +105°C
- Voltage Range: 2.5 to 16VDC
- Capacitance Range: 27 to 470uF

Features:
- Solvent proof
- Cost effective polymer tantalum replacement
- 20 to 30% lower ESR than PXA series
- Designed for two reflow soldering cycles

LEAD-FREE

UCC PSA 105°C RADIAL SOLID POLYMER ALUMINUM SERIES, LOW ESR (LEAD FREE)

The PSA series uses a solid functional polymer as the electrolyte. This polymer technology insures more stable performance and higher reliability over the expected lifetime than normal liquid electrolyte capacitors. PSA capacitors are constructed of lead-free materials that can withstand high temperature lead-free soldering. This series are suitable for use in DC-DC converters, voltage regulators, and decoupling applications and are recommended replacements for OS-CON™ capacitors.

Case Dimensions for PSA Series

Case Code	øD	L	øD max.	L max.	ød	F±
F11	ø6.3	9.8	øD+0.5	L+1.0	0.8	2

CORNELL DUBILIER Aluminum Electrolytic Capacitors

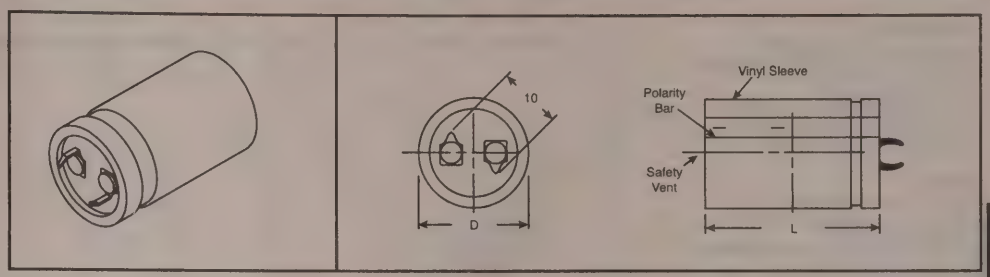
CDE CORNELL DUBILIER

80LQ, 85°C SERIES - SNAP MOUNT HIGH RIPPLE ALUMINUM ELECTROLYTICS

DIMENSIONS: mm

Specifications:
- Voltage rating: 200VDC to 450VDC
- Operating temperature: <250V: -40°C to +85°C; 350V: -25°C to +85°C
- Capacitance Tolerance: 20%
- Life test: 2000 hours @ +85°C at full load
- Leakage Current: ≤ 3 √ CV μA at 5 min.

Features:
- More capacitance per case size
- Average of 27% smaller and more than 10mm shorter than Type 380LX
- Approaching the capability of the 380LX, the 380LQ enables you to shrink equipment size and retain the original performance



For quantities of 50 and up, call for quote.

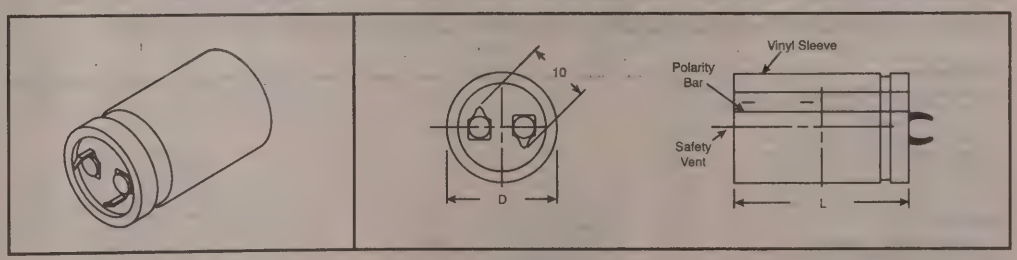
80LX, 85°C SERIES - SNAP MOUNT ALUMINUM ELECTROLYTICS

DIMENSIONS: mm

Specifications:
- Voltage Rating: 25VDC to 450VDC
- Operating Temperature: <300V: -40°C to +85°C; 350V: -25°C to +85°C
- Capacitance Tolerance: 20%
- Life Test: 3000 hours @ +85°CC at full load
- Leakage Current: ≤ 3 √ CV μA at 5 min.
- MTA Ripple Life: 3000 hours @ 85°C

Features:
- More capacitance per case size
- Ideal for switching power supply input and output circuits and motor drives



For quantities of 50 and up, call for quote.

381LQ, 105°C SERIES - SNAP MOUNT HIGH RIPPLE ALUMINUM ELECTROLYTICS

DIMENSIONS: m

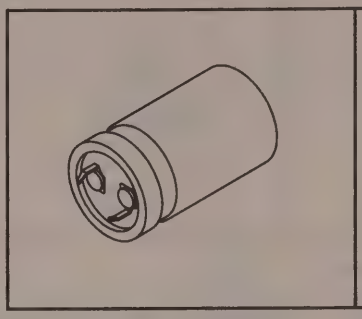
Specifications:

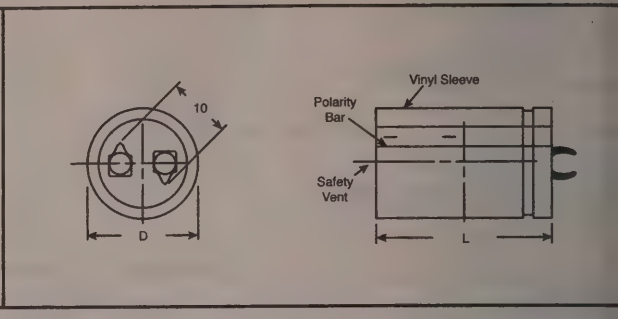
- Voltage rating: 200VDC to 450VDC
- Operating temperature: <315V: -40°C to +105°C; >350V: -25°C to +105°C
- Capacitance Tolerance: 20%
- Life test: 2000 hours @ +85°C at full load
- Leakage Current: ≤ 3 √ CV μA at 5 min.
- EIA Ripple Life: 8000 hours @ 85°C

Features:

- More capacitance per case size
- Average of 23% smaller and more than 5mm shorter than Type 381LX
- The 381LQ enables you to shrink equipment size and retain the original performance

NEW FROM SUPPLIER





For quantities of 50 and up, call for quote.

381LX, 105°C SERIES - SNAP MOUNT HIGH RIPPLE ALUMINUM ELECTROLYTICS

DIMENSIONS: m

Specifications:

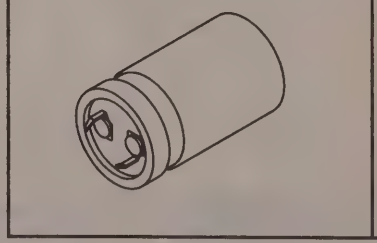
- Voltage Rating: 16VDC to 450VDC
- Operating Temperature: <315V: -40°C to +105°C; ≥ 350V: -25°C to +105°C
- Capacitance Tolerance: 20%
- Leakage Current: ≤ 3 √ CV μA at 5 min.
- EIA Ripple Life: 12,000 hours @ 85°C

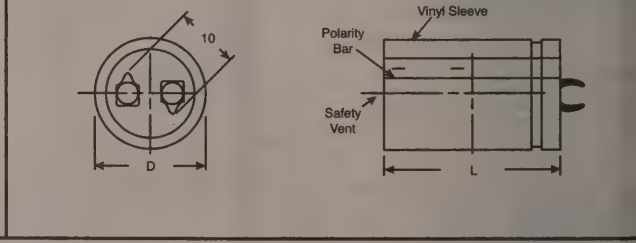
Features:

- More capacitance per case size
- 4 Times the life of 380LX Series
- High ripple capability

Applications:

- Power supply input and output circuits
- Motor-drives





For quantities of 50 and up, call for quote.

DCMC HIGH CAPACITANCE COMPUTER GRADE SERIES

atures:
w ESR
gh capacitance value
andle large ripple currants
ermal-Pak extended cathode construction assures cool
eration with heat flow from the capacitor element to the can

ecifications:
oltage range: 6.3VDC to 450VDC
mperature range: -40°C to 85°C
olerance: <200VDC = -10 to +75%
≥200VDC = -10 to +50%
apacitance Range: 110uF to 2.7F
fe: 2000 hours @ 85°C

Applications:
- Power supply filters
- UPS systems
- Computer hold-up power
- Energy storage applications

MALLORY COMPUTER GRADE CGS 85°C SCREW TERMINAL SERIES

Mallory CGS Series Equivalents

Collins - CES Series
General Electric - 86F Series
Mepco-electra - 3186/91C & 91F Series
Rubycon - LSA Series

Specifications:
- Temperature range: -40° to +85°C
- DC Leakage Current:
  I = .006 √CV after 30 minutes
  Not to exceed 6mA
  C = Capacitance in μF
  V = Rated Voltage
  I = Leakage Current in mA

QA Stability Test:
Apply WVDC for 2,000 hrs at 85°C
- Capacitance change ≤10% from initial limits
- DC leakage currents meets initial limits
- ESR ≤ 175% of initial measured value

DIMENSIONS (IN)

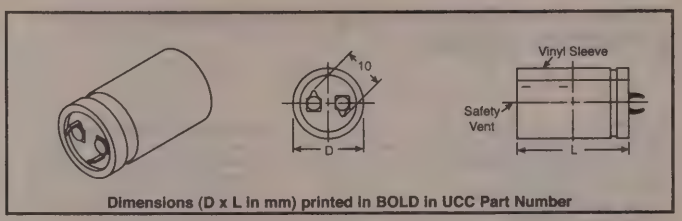
KMH 105°C SNAP MOUNT HIGH CAPACITANCE SERIES

KMH series are the standard 105°C, large capacitance, snap-in capacitors. The very high CV es and ripple current capabilities make these capacitors ideal for use in power supply filter ilts. The standard KMH capacitors are non-solvent proof and are not recommended when genated cleaning solvents are used.

cifications:

- Rated Lifetime: 2,000 hours @ +105°C

perating Temperature range:
0°C to +105°C for 6.3 to 100VDC,
5°C to +105°C for 160 to 450VDC



Dimensions (D x L in mm) printed in BOLD in UCC Part Number

For quantities 1000 and up, call for quote.

SMH 85°C SNAP MOUNT HIGH CAPACITANCE SERIES

The SMH series are the standard 85°C, large capacitance, snap-in capacitors. The very high CV values and ripple current capabilities make these capacitors ideal for use in power supply filter circuits. The standard SMH capacitors are non-solvent proof and are not recommended when halogenated cleaning solvents are used.

Specifications:

- Operating Temperature range:
  -40°C to +85°C for 6.3 to 100VDC,
  -25°C to +85°C for 160 to 450VDC
- Rated Lifetime: 2,000 hours @ +85°C

For quantities 1000 and up, call for quote.

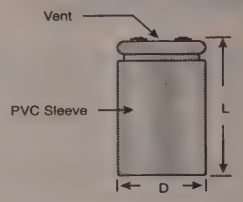
VISHAY / SPRAGUE Computer Grade Aluminum Capacitors

VISHAY / SPRAGUE 36DY 85°C SCREW TERMINAL HIGH CAPACITANCE SERIES

Features:
- The industry standard for large can aluminum capacitors
- Ideal for high wattage power supplies and energy storage applications
- Capacitance values to 2.2 farads
- Largest CV available
- Highest voltage available

Performance Characteristics:
- Operating temperature: -40°C to +85°C
- Capacitance tolerance: -10%, +50%
- Life validation test: 2000 hours @ + 85°C
  - Δ CAP ≤ 15% from initial measurement
  - Δ ESR ≤ 1.5 x initial specified limit
  - Δ DCL ≤ initial specified limit



For quantities of 100 and up, call for quote.

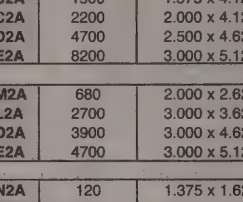
VISHAY / SPRAGUE POWERLYTIC® 36DX 85°C SCREW TERMINAL, HIGH CAPACITANCE., HIGH RIPPLE SERIES

Features:
- High capacitance per case size
- High ripple current
- Low leakage current
- Long shelf life and operating life

Performance Characteristics:
- Operating temperature: -40°C to +85°C
- Capacitance tolerance: +75%, -10% (25 WVDC to 100 WVDC)
  +50%, -10% (200 WVDC to 450 WVDC)



For quantities of 100 and up, call for quote.

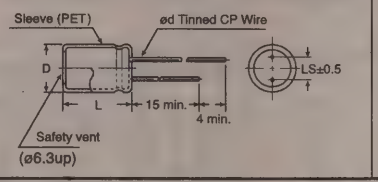
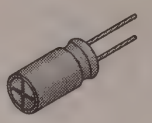
nichicon UVR 85°C GENERAL PURPOSE SERIES (LEAD FREE)

DIMENSIONS (mm)





Specifications:

- Operating temperature range: -40°C ~ +85°C (6.3 ~ 400V), -25°C ~ +85°C (450V)
- Voltage range: 6.3 ~ 450V
- Capacitance range: 0.1 ~ 33000µF
- Capacitance tolerance: ±20% at 120Hz, 20°C
- Endurance: 2000 hours @ 85°C

Leakage Current

6.3V ~ 100V	160V ~ 450V
After 1 minute application of rated voltage, leakage current is not more than 0.03CV or 4 (µA), whichever is greater.	After 1 minute application of rated voltage, CV ≤ 1000: I = 0.1CV + 40µA or less.
After 2 minutes application of rated voltage, leakage current is not more than 0.01CV or 3 (µA), whichever is greater.	After 1 minutes application of rated voltage, CV > 1000: I = 0.04CV + 100µA or less.

Application note:

- A higher voltage capacitor may be used in a lower voltage application.

LEAD-FREE

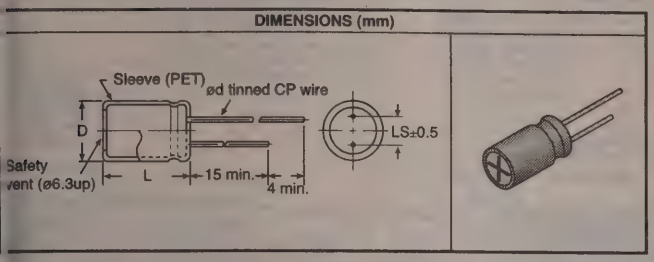
nichicon UVZ SERIES 105°C CAPACITORS (LEAD FREE)

DIMENSIONS (mm)



Specifications:

- Operating temperature range: -55°C ~ +105°C (6.3 ~ 100V), -40°C ~ +105°C (60 ~ 400V), -25°C ~ +105°C (450V)
- Voltage range: 6.3 ~ 450V
- Capacitance range: 0.1 ~ 33000μF
- Capacitance tolerance: ±20% at 120Hz, 20°C
- Small case sizes as VR series, but operating over wide temperature range of -55°C ~ 105°C

Application note:

- A higher voltage capacitor may be used in a lower voltage application

Endurance:

- 1000 hours @ 105°C

LEAD-FREE

Leakage Current:

6.3V ~ 100V	160V ~ 450V
After 1 minute application of rated voltage, leakage current is not more than 0.03CV or 4 (μA), whichever is greater. After 2 minutes application of rated voltage, leakage current is not more than 0.01CV or 3 (μA), whichever is greater.	After 1 minute application of rated voltage, CV ≤ 1000: I = 0.1CV + 40μA or less. After 1 minutes application of rated voltage, CV > 1000: I = 0.04CV + 100μA or less.

For quantities of 1000 and up, call for quote.

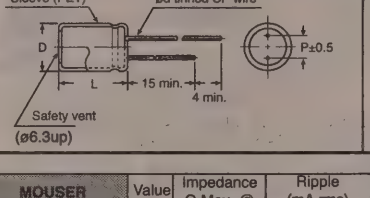
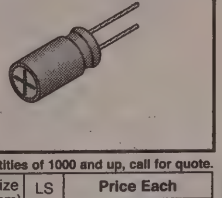
nichicon UPW 105°C LOW IMPEDANCE, HIGH REL. SERIES (LEAD FREE)

DIMENSIONS (mm)





Features:

- Low impedance and high reliability
- Endurance: 2000 hours: ØD 5-6.3
  3000 hours: ØD 8
  5000 hours: ØD 10
  7000 hours: ØD 12
  8000 hours: ØD 16-18

Application note:

- A higher voltage capacitor may be used in a lower voltage application.

Specifications:

- Operating temperature range: -55°C ~ +105°C (6.3 ~ 100V)
- Voltage range: 6.3 ~ 100V
- Capacitance range: 0.47 ~ 15000µF
- Capacitance tolerance: ±20% at 120Hz, 20°C

LEAD-FREE

For quantities of 1000 and up, call for quote.

chicon UHE 105°C LOW IMPEDANCE, HIGH REL. SERIES (LEAD FREE)

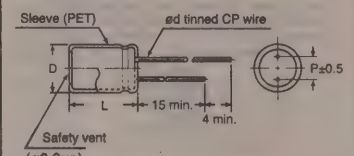
tures:
ad free product
gh reliabilty
ng life–up to 10,000 hours

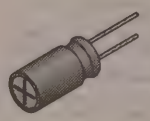
cifications:
perating temperature range: -40°C to +105°C
oltage range: 6.3 - 100 Vdc
apacitance range: 6.8 to 18000uF
apacitance tolerance: ±20% at 120 Hz, 20°C
eakage current: After 2 minutes of rated voltage, leakage rrent is not more than 0.01CV or 3(uA)

LEAD-FREE

lication Note:
higher voltage capacitor may be ed in a lower voltage application.

DIMENSIONS (mm)





Endurance:

Case Size (Diameter)		5-6.3	8-10	12.5-16-18
Rated Voltage V	6.3-10	4000 Hrs.	6000 Hrs.	8000 Hrs.
	16-100	5000 Hrs.	7000 Hrs.	10000 hrs.

For quantities of 1000 and up, call for quote.

nichicon USR 7MM 85°C SERIES, GENERAL PURPOSE (LEAD FREE)

Specifications:

- Operating temperature range: -40°C ~ +85°C
- Voltage range: 6.3 ~ 50V
- Capacitance range: 0.1 ~ 470µF
- Endurance: 2000 hours @ 85°C
- Capacitance tolerance: ±20% at 120Hz, 20°C
- Leakage current: after 2 minutes application of rated voltage, leakage current is no more than 0.01CV or 3µA, whichever is greater

Application Note:

- A higher voltage capacitor may be used in a lower voltage application.

LEAD-FREE

nichicon UVP 85°C BI-POLAR SERIES (LEAD FREE)

Specifications:

- Operating temperature range: -40°C ~ +85°C
- Voltage range: 6.3 ~ 100V
- Capacitance range: 0.47 ~ 6800µF
- Capacitance tolerance: ±20% at 120Hz, 20°C
- Leakage current: After 5 minutes application of rated voltage, leakage current is not more than 0.03CV or 3µA, whichever is greater.
- Endurance: 2000 hours @ 85°C with polarity reversed every 250 hours

Features:

- Standard bi-polarized series for entertainment electronics
- Ideal for circuits where reverse voltage is applied when switches are turned off or on or where the polarity is not constant

Application Note:

- A higher voltage capacitor may be used in a lower voltage application.

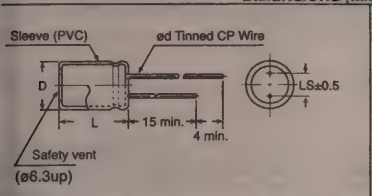
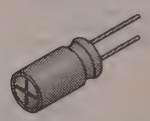
ichicon UVR 85°C GENERAL PURPOSE SERIES

DIMENSIONS (mm)





Specifications:

- Operating temperature range: -40°C ~ +85°C (6.3 ~ 400V), -25°C ~ +85°C (450V)
- Voltage range: 6.3 ~ 450V
- Capacitance range: 0.1 ~ 33000µF
- Capacitance tolerance: ±20% at 120Hz, 20°C

Application note:

- A higher voltage capacitor may be used in a lower voltage application.

Leakage Current

6.3V ~ 100V	160V ~ 450V
After 1 minute application of rated voltage, leakage current is not more than 0.03CV or 4 (µA), whichever is greater. After 2 minutes application of rated voltage, leakage current is not more than 0.01CV or 3 (µA), whichever is greater.	After 1 minute application of rated voltage, CV ≤ 1000: I = 0.1CV + 40µA or less. After 1 minutes application of rated voltage, CV > 1000: I = 0.04CV + 100µA or less.

Endurance: After 2000 hours application of rated voltage at 85°C, capacitors meet the characteristics requirements listed at right.

Capacitance change	Within ±20% of initial value
tanδ	200% or less of initial specified value
Leakage current	Initial specified value or less

For quantities of 1000 and up, call for quote.

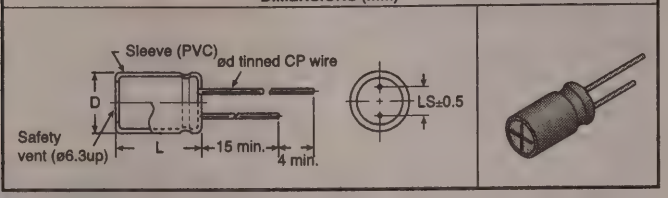
nichicon UVZ 105°C SERIES

DIMENSIONS (mm)



Specifications:

- Operating temperature range: -55°C ~ +105°C (6.3 ~ 100V), -40°C ~ +105°C (60 ~ 400V), -25°C ~ +105°C (450V)
- Voltage range: 6.3 ~ 450V
- Capacitance range: 0.1 ~ 33000μF
- Capacitance tolerance: ±20% at 120Hz, 20°C
- Small case sizes as VR series, but operating over wide temperature range of -55°C ~ 105°C

Application note:

- A higher voltage capacitor may be used in a lower voltage application

Leakage Current:

6.3V ~ 100V	160V ~ 450V
After 1 minute application of rated voltage, leakage current is not more than 0.03CV or 4 (μA), whichever is greater. After 2 minutes application of rated voltage, leakage current is not more than 0.01CV or 3 (μA), whichever is greater.	After 1 minute application of rated voltage, CV ≤ 10 I = 0.1CV + 40μA or less. After 1 minutes application of rated voltage, CV > 1000: I = 0.04CV + 100μA or less.

Endurance:
After 1000 hours application of rated voltage at 105°C, capacitors meet the characteristics requirements listed at right.

Capacitance change	Within ±20% of initial value
tan δ	200% or less of initial specified val
Leakage current	Initial specified value or less

For quantities of 1000 and up, call for quote.

hicon UPW 105°C LOW IMPEDANCE HIGH REL. SERIES

Specifications:
- Operating temperature range: -55°C ~ +105°C (6.3 ~ 100V)
- Voltage range: 6.3 ~ 100V
- Capacitance range: 0.47 ~ 15000μF
- Capacitance tolerance: ±20% at 120Hz, 20°C

Endurance:
- 2000 hours: ØD 5-6.3
  3000 hours: ØD 8
  5000 hours: ØD 10
  7000 hours: ØD 12
  8000 hours: ØD 16-18

Features:
- Low impedance and high reliability

Application note:
- A higher voltage capacitor may be used in a lower voltage application.

nichicon USR 7MM 85°C GENERAL PURPOSE SERIES

Specifications:

- Operating temperature range: -40°C ~ +85°C
- Voltage range: 6.3 ~ 50V
- Capacitance range: 0.1 ~ 470µF
- Capacitance tolerance: ±20% at 120Hz, 20°C
- Leakage current: after 2 minutes application of rated voltage, leakage current is no more than 0.01CV or 3µA, whichever is greater

Endurance:
After 2000 hours application of rated voltage at 85°C, capacitors meet the characteristics requirements listed at right.

Capacitance change	Within ±20% of initial value
tan δ	200% or less of initil specified value
Leakage current	Initial specified value or less

nichicon UVP BI-POLAR 85°C SERIES

Specifications:

- Operating temperature range: -40°C ~ +85°C
- Voltage range: 6.3 ~ 100V
- Capacitance range: 0.47 ~ 6800µF
- Capacitance tolerance: ±20% at 120Hz, 20°C
- Leakage current: After 5 minutes application of rated voltage, leakage current is not more than 0.03CV or 3µA, whichever is greater.

Features:

- Standard bi-polarized series for entertainment electronics
- Ideal for circuits where reverse voltage is applied when switches are turned off or on or where the polarity is not constant

Application Note:

- A higher voltage capacitor may be used in a lower voltage application.

Endurance:
After 2000 hours application of rated voltage at 85°C with the polarity inverted every 250 hours, capacitors meet the characteristics requirements listed at right.

Capacitance change	Within ±20% of initial value
tan δ	200% or less of initil specified value
Leakage current	Initial specified value or less

DIMENSIONS (mm)

ichicon TVX 85°C AXIAL SERIES

ecifications:

perating temperature range: -40°C to + 85° C (6.3 to 250V), -25°C to +85°C (315 to 450 V)
oltage range : 6.3-450V.
apacitance range: 0.47 to 10000μF
apacitance tolerance: ± 20% at 120Hz/ 20°C

plication Note:

higher voltage capacitor may be used in a lower voltage application.

d Life:

r 2000 hours application of rated voltage at C, capacitors meet the characteristics listed ght.

Capacitance change	Within ± 25% of initial value
tan δ	200% or less of initial specified value
Leakage current	Initial specified value or less

DIMENSIONS (mm)

Aluminum Electrolytic Capacitors

ELNA MEMORY BACK-UP CAPACITORS

The DB and DX Series has a total withstand voltage rating of 5.5 Volts. Utilizing ELNA's unique flat spring technology, which enhances the reliability of the internal coin cells. This Series is ideal for a wide range of applications from consumer applications to sophisticated instrumentations.

Features:

- For memory back up in electronic devices
- Small size, large capacitance
- Wide temperature range: -25°C to +70°C
- Minimum self-discharging
- Capacitance tolerance: -20% to +80%

DX Series

For quantities of 1000 and up, call for quote.

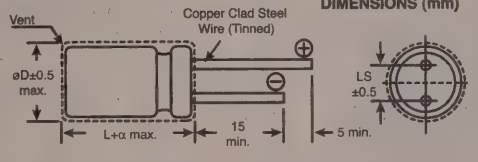
ELNA DOUBLE LAYER CAPACITORS

The DZ Series is an entirely new type of high current capacitor that has extremely low internal resistance (only 10% of standard double layer caps), capable of undergoing virtually unlimited charge/discharge cycles with no deterioration. With capacitance ranging from 1F to 100F and internal resistance from ≤0.08 to 1.0 ohms, they are ideal for CMOS backup, or they can function as a simple power supply.

Specifications:

- Temperature range: -40°C to +70°C
- Capacitance tolerance: -20% to +80%

DIMENSIONS (mm)



DZ Series

UCC LXY SERIES 105°C LOW IMPEDANCE CAPACITORS

The LXY Series capacitors have a low impedance and are designed for use in situations at high frequencies. The LXY capacitors are ideal for use in switching power supplies, as their characteristics include a wide temperature range, long life, and low impedance.
The LXY Series capacitors are solvent proof.

Features:

- Low Impedance
- High Frequency Applications

Specifications:

- Operating Temperature range: -55°C to + 105°C
- Voltage Range: 10 to 63VDC
- Capacitance Range: 10 to 8,200μF
- Capacitance Tolerance: ± 20% at +20°C, 120Hz
- Rated Lifetime: 2,000 - 8,000 hours depending on case size
- Leakage Current: 0.01CV or 3μA, whichever is greater, after 2 minutes at +20°C

5D MINIATURE - 85°C GENERAL PURPOSE TYPE

cifications:
- perating temperature: -40°C to +85°
- lerance: ±20%
- e validation test: 2000 hours @ +85°C

Features:
- 85°C Max. temperature
- High CV per case size
- Solvent resistant construction (through 100 WVDC)
- Low Profile Ratings

For quantities of 500 and up, call for quote.

517D MINIATURE 105°C RADIAL LEAD TYPE

Specifications:
- Operating temperature: -55°C to +105°C, ≤ 100VDC -40°C to +105°C ≥ 160VDC
- Tolerance: ±20%
- Rated lifetime: 2000 hours @ +105°C

Features:
- 105°C Max. temperature
- High CV per case size
- Solvent resistant construction (through 100 WVDC)
- High temperature operation

For quantities of 500 and up, call for quote.

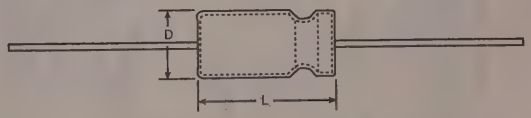
TYPE TVA ATOM® 85°C ALUMINUM MINIATURE AXIAL LEAD

Specifications:
- Operating temperature:
  -40°C to +85°C (≤100VDC)
  -20°C to +85°C (150VDC-450VDC)
  -20°C to +65°C (≥ 500VDC)
- Capacitance tolerance: ±20%

Features:
- 85°C maximum temperature
- Low leakage current.
- Ideal for application in TV sets, auto radios, radio-phone combinations, and electronic testing equipment



For quantities of 250 and up, call for quote.

TYPE TE LITTL-LYTIC® 105°C ALUMINUM CAPACITORS

Specifications:
- Operating temperature: -40°C to +105°C
- Capacitance tolerance:
  +75%, -10% (≤ 50VDC)
  +50, -10% (≥ 100VDC)

Features:
- 105°C maximum temperature
- Welded terminal connectors
- Metal-encased with clear plastic outer insulating sleeve
- Ideal for use as coupling capacitors. Minimum drain and l battery life when used in battery bypass applications

For quantities of 1000 and up, call for q

TYPE 516D AXIAL LEAD ALUMINUM CAPACITORS

Specifications:
- Operating Temperature: -40°C to +85°C
- High CV per case size
- Capacitance tolerance: ±20%

Features:
- 85°C maximum temperature
- High CV per case size
- Solvent resistant construction

For quantities of 1000 and up, call for

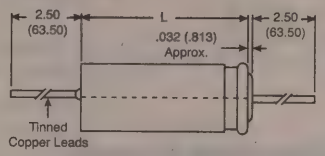
TYPE 39D POWERLYTIC® 85°C, ALUMINUM ELECTROLYTIC CAPACITORS

formance Characteristics:
perating Temperature: -20°C to +85°C
apacitance Tolerance: 10 WVDC to 75 WVDC, +75%, -10%;
100 WVDC to 450 WVDC, +50%, -10%
issipation Factor: 10 WVDC and 15 WVDC capacitors, 150%;
25 WVDC and 30 WVDC capacitors, 60%;
40 WVDC and 50 WVDC capacitors, 45%;
75 WVDC and 100 WVDC capacitors, 30%;
150 WVDC to 450 WVDC capacitors, 18%.

Features:
- Designed for applications requiring greatest possible capacitance in small physical case sizes.
- Supplement original Type 36D can-type capacitors, offering lower capacitance values in smaller sizes with axial leads.
- Welds at all critical anode and cathode terminals eliminate riveted or pressure connections to assure freedom from open circuit even when operated in the microvolt or millivolt signal range.
- Pressure-sensitive safety vent.
- Service life of 10 years or more in normal circuit applications.
- Capacitors have an outer plastic-film insulation.



For quantities of 100 and up, call for quote.

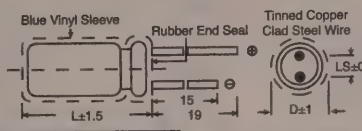
XICON 85°C Radial Aluminum Electrolytic Capacitors

85°C RADIAL ALUMINUM ELECTROLYTIC CAPACITORS

Specifications:

- Operating temperature range:
  10V to 250V: -40°C to +85°C
  350V to 450V: -25°C to +85°C
- Tolerance: ±20%

DIMENSIONS (mm)



5mm - 13mm diameter available packaged in Tape and Box. To order Tape and Box, add - TB to Mouser Stock No.

Dia	L/S	Dia	L/S
4	1.5	16	7.5
5	2.0	18	7.5
6.3	2.5	22	10
8	3.5	25	12.5
10	5.0		
13	5.0	Tape	5.0

Application Note:
A higher voltage capacitor may be used in a lower voltage application.

∗ Standard lead space for tape and box package is 5.0mm

For quantities 2000 and up, call for quote.

XICON High Temperature Aluminum Electrolytic Capacitors

105°C HIGH TEMP. RADIAL ELECTROLYTICS

trical Specifications:

erating temperature range: -40°C to +105°C
leakage current: I=0.01CV or 3μA max.
pacitance tolerance: ±20%

lication Note:
her voltage capacitor may be
in a lower voltage application.

5mm to 13mm Diameter available packaged in Tape and Box. To order Tape and Box, add - TB to Mouser Stock No.

LEAD SPACE CHART (mm)

Dia	L/S	Dia	L/S
4	1.5	13	5.0
5	2.0	16	7.5
6.3	2.5	18	7.5
8	3.5		
10	5.0	Tape	5.0

105°C HIGH TEMP. AXIAL ALUMINUM ELECTROLYTICS

fications:

ating temperature range: 10V to 250V: -40°C to +105°C
to 450V: -25°C to +105°C
ance: ± 20%

Application Note:
A higher voltage capacitor may be used in a lower voltage application.

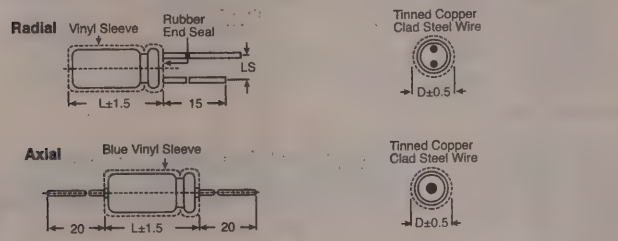
XICON Non-Polar, Bi-Polar, High Frequency and Low ESR Capacitors

NON-POLAR AND BI-POLAR



DIMENSIONS (mm)

Non-Polarized Axial and Radial Electrolytics

For use in circuits that are reversed in polarity or circuits to which short duration AC voltages are impressed.

Specifications:

- Capacitance tolerance: ±10%
- Leakage current: I=0.02CV=3μA max.
- Vinyl sleeve color: blue
- Dissipation factor (25°C): @120Hz=15% @1KHz=20%
- Operating temperature range: -40°C to +85°C

LOW ESR ELECTROLYTIC CAPACITORS

Features:

- High permissible ripple current
- Wide operating temperature range
- Suited for switching power supplies

Specifications:

- Operating temperature: -55°C to +105°C
- Life test: load life = 2000 hours
- Leakage current: 0.01CV or 3μA

5mm to 13mm Diameter available packaged in Tape and Box. To order Tape and Box, add - TB to Mouser Stock No.

Application Note:

A higher voltage capacitor may be used in a lower voltage application.

LOW LEAKAGE CURRENT ELECTROLYTICS

rical Specifications:
eakage current: I=0.002CV or 0.4μA whichever is greater
rating temperature range: -40°C to +85°C
acitance tolerance: ±20%
l space for Tape and Box is 5.0mm

Application Note:
A higher voltage capacitor may be used in a lower voltage application.

XICON 7mm Height Radial Electrolytic Capacitors

7MM HEIGHT 105°C RADIAL ELECTROLYTIC CAPACITORS

Specifications:
- Operating Temperature: -40°C to +105°C
- Tolerance +/- 20%
- Leakage Current: I = .01CV or 3uA whichever is greater
- Meets Tight Board Space Requirements.
- Can be used in place of expensive tantalum capacitors.

7MM NON-POLAR RADIAL ELECTROLYTIC CAPACITORS

Specifications:
- For use in circuits that reverse in polarity or circuits to which short duration AC voltages are impressed.
- Meets Tight Board Space Requirements.
- Capacitance tolerance +/- 20%.
- Operating Temperature Range -40°C to +85°C.
- Leakage Current: I=.05CV or 10 uA whichever is greater.

SUB MINIATURE ALUMINUM ELECTROLYTIC CAPACITORS - 7MM HEIGHT

Specifications:
- Meets tight board space requirements
- Capacitance tolerance: ±20%
- Operating temperature range: -40°C to +85°C
- DC leakage current: (after 3 minutes application of DC working voltage at 25°C) I = 0.02CV +3µA max
- Replacement for expensive tantalum capacitors
- Lead space for Tape and Box is 5.0mm

Application Note:
A higher voltage capacitor may be used in a lower voltage application.

Cross Reference:
Panasonic: KA Series

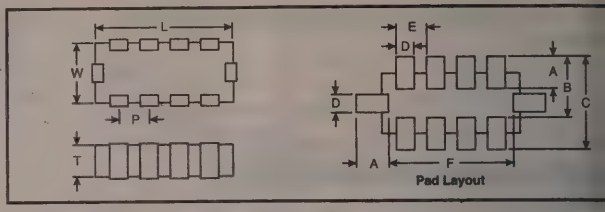
AVX Feedthru 0805/1206 Capacitors

W3F4 SERIES: 4 ELEMENT 1206 FEEDTHRU ARRAY

The Feedthru Capacitor Array contains four elements with a common ground connection. This makes them an ideal choice for Multi-line designs needing EMI suppression, broadband I/O filtering or Vcc power line conditioning. Additional benefits are reduced component count and PCB space savings. The unique construction provides low parallel inductance and offers excellent decoupling capability for all high di/dt environments. It provides significant noise reduction in digital circuits to <5 GHz.



Specifications :
- Capacitance Tolerance: +50%, -20%
- Current Rating 300mA:
- Insulation Resistance: 1000MΩ
- DC Resistance: <0.6ø
- Operating Temperature Range: -55 to +125°C

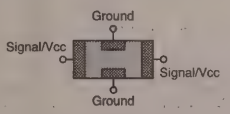
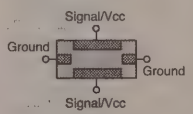
W2H/W3H SERIES HIGH CURRENT FEEDTHRU CAPACITORS

High current feedthru capacitors are designed as a broadband EMI filter that is specially designed to have high current handling capability. These SMT feedthru filters offer an optimized frequency response with high attenuation across a wide RF spectrum due to optimized parallel and series inductances.

Applications:
- Power Amplifier (PA) Decoupling
- DC/DC converters
- Power Supervisory Circuits
- Digital to RF Block Filtering
- Telecom
- LCD Displays
- Charge Pump Converters



W2H1 - 0805 Style



W3H1 - 0612 Style

Key Features/Benefits:
- SMD Device
- Broadband filtering
- Operates at frequencies up to 5GHz
- Attenuation of >30dB

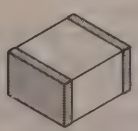
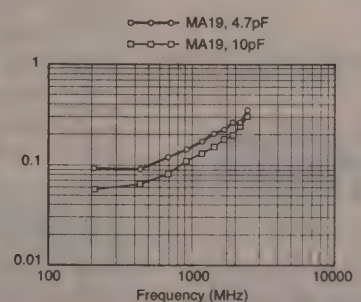
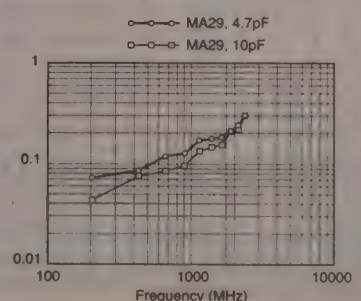
Specifications:
- Temperature Range: -55°C to +125°C
- Temperature Coefficient: P90
- Terminations: Palladium Silver covered by a Nickel interface and coated with Tin Plating.
- Very High Q at high frequencies.
- High RF Power capabilities.
- Impervious to environmental conditions.
- Low noise.







TDK Ceramic Capacitor Arrays

2 ELEMENT CAPACITOR ARRAYS

Features:

- Multiple capacitors (2) in one package
- Reduced space needed for equal capacity
- Unique electrode construction reduces crosstalk in RF applications
- Decreases mounting time by 50% compared to individual components
- No polarity

4 ELEMENT CAPACITOR ARRAYS

Features:

- Multiple capacitors (4) in one package
- Highly effective in EMC countermeasure applications
- Unique electrode construction reduces crosstalk in RF applications
- Decreases mounting time by 75% compared to individual components
- No polarity

F / W3F SERIES FEEDTHRU 0805 / 1206 CAPACITORS

al Description:

line of feedthru capacitors are ideal choices for EMI suppression, broadband I/O filtering, or Vcc power line conditioning.
nique construction of a feedthru capacitor provides low parallel inductance and offers excellent decoupling capability for all high di/dt
onments and provides significant noise reduction in digital circuits to <5GHz.

Specifications:

- Current Rating: 300mA
- Insulation Resistance: 1000MΩ
- DC Resistance: <0.6Ω
- Operating Temperature Range: -55°C to +125°C

/ INDUCTANCE CAPACITORS - 0612 / 0508 IDC (INTERDIGITATED CAPACITORS)

al Description:

ow equivalent series inductance (ESL), surface mountable, high speed decoupling capacitor in 0612
508 case size.
ured inductances of 120pH (for 0612) and 95pH (for 0508) are the lowest in the FR4 mountable device family.
sing current flow creates opposing magnetic fields. This causes the fields to cancel, effectively reducing the
alent series inductance.
ct solution for decoupling high speed microprocessors by allowing the engineers to lower the power delivery
ance of the entire system through the use of eight vias.
ll reduction in decoupling components due to very low series inductance and high capacitance.

Specifications:

- Capacitance Tolerance: ±20% Preferred (10% Available)
- Operating Temperature Range: X7R= -55°C to +125°C, X5R= -55°C to +85°C
- Temperature Coefficient: ±15% (0VDC)
- Voltage Ratings: 4, 6.3, 10, and 16 VDC
- Dissipation Factor: 4V, 6.3V = 6.5% max; 10V = 5.0% max; 16V = 3.5% max
- Insulation Resistance (@ +25°C, RVDC): 100,000MΩ min, or 1,000MΩ per μF min., whichever is less
- Dielectric Strength: No problems observed after 2.5 x RVDC for 5 seconds at 50mA max current
- CTE (ppm/C): 12.0
- Thermal Conductivity: 4-5W/M K
- Terminations Available: Plated nickel and solder
- Maximum Thickness: 0.037" (0.95 mm)

AVX ACCU-P® THIN-FILM RF / MICROWAVE CAPACITORS

Features:

- Minimal batch to batch variability of parameters at high frequency.
- Low ESR, High Q, Low Capacitance
- Inspected, test and quality control procedures in accordance with ISO 9001, CECC, IECQ, USA MIL Standards guarantee product of the highest quality.
- Preferred device in R & D labs and productions environment where hand soldering is used.

Electrical Specifications:

- Temperature range: -55°C to +125°C
- Temperature Coef.: 0 ±30ppm/°C dielectric code "J"
- Cap. measurement: 1Mhz, 1 Vrms
- Insulation resistance: $\geq 10^{11}$ Ohms (≥10^{10} Ohms for 0201 and 0402 size)
- Proof voltage: 2.5 U_R for 5 secs.
- Aging Characteristics: Zero
- Dielectric Absorbtion: 0.01%

Applications:

- Cellular Communications
- CT2/PCN
